ANNUAL
REPORT

PHF

PAKISTAN HUMANITARIAN FORUM

I would like to express my heartfelt appreciation and gratitude to the PHF member organizations, affiliates, government institutions, key stakeholders, and dedicated frontline humanitarian workers for their unwavering support and tireless efforts in providing aid and assistance to those affected by the 2022 devastating floods in Pakistan. In the face of overwhelming challenges, the flood-affected people of Pakistan have demonstrated incredible resilience, strength, and courage. Their ability to rebuild their lives and communities is truly inspiring, serving as a testament to the indomitable human spirit and the power of community solidarity. Together, we can continue making a meaningful difference in their lives, helping them regain stability and hope for a brighter future. I would like to commend the efforts of European Civil Protection and Humanitarian Aid Operations (ECHO) for supporting PHF's coordination and advocacy efforts. ECHO's commitment to humanitarian principles, including neutrality, impartiality, and independence, strengthens its role in facilitating effective and sustainable humanitarian assistance.

MESSAGE FROM CHAIR - BOARD OF TRUSTEES, PHF

Progress, Partnership, and Resilience: PHF's Annual Report showcases impactful achievements in improving lives and fostering collaboration for a resilient and prosperous Pakistan.

I am pleased to present the annual report of the Pakistan Humanitarian Forum (PHF), which highlights the exceptional achievements of our member organizations in the past year. Together, we have made significant progress in improving the lives of the most vulnerable and marginalized communities across Pakistan.

The past year has been challenging due to the impact of the devastating floods that affected many parts of the country. Nevertheless, thanks to the invaluable support of our partners, the member organizations of PHF have continued to play a vital role in alleviating the sufferings of communities across Pakistan.

We are proud of the role that our member organizations have played in improving the economic conditions of communities, building the capacity of local actors, enhancing preparedness and response to crises, and improving coordination among different departments and authorities. These efforts have

contributed significantly to improving the lives of the targeted communities.

PHF plays a vital role as a representative forum of the INGOs working in Pakistan, by advocating for humanitarian principles, promoting accountability and transparency, and ensuring effective coordination among stakeholders. As we move forward, the PHF remains committed to achieving the Sustainable Development Goals (SDGs) and to collaborating with government institutions, UN agencies, civil society organizations, and other key stakeholders. We recognize the importance of working together to ensure a coordinated and effective response to humanitarian crises and to build a more resilient Pakistan.

I would like to thank our members, donors, partners, and stakeholders for their continued support, and I look forward to working with all of you to build a better future for the people of Pakistan.

Lt. Gen. Omer Mehmood Hayat (R)
Chair - Board of Trustees, PHF

PHF Board of Trustees

The Pakistan Humanitarian Forum (PHF) Board of Trustees, led by Lt. Gen Omer Hayat (R), comprises five esteemed members who play a vital role in guiding the organization. They provide strategic guidance, governance, and representation for the PHF. The board is responsible for making policy decisions, ensuring effective financial management, advocating for the humanitarian sector, and ensuring programme effectiveness and risk management. Through their collective efforts, the PHF Board of Trustees contributes to the success of the organization in its endeavors related to humanitarian and development work.

MESSAGE FROM CHAIR EX-COM, PHF

Building resilience, transforming lives: PHF Members' impactful humanitarian efforts in Pakistan

I am honored to present to you the annual report of the Pakistan Humanitarian Forum (PHF), which showcases the remarkable achievements of PHF member organizations over the past year. Working collectively, we have successfully implemented a total of 400 projects across Pakistan, with 294 projects specifically dedicated to providing crucial humanitarian assistance in response to the devastating floods of 2022. An additional 106 projects have focused on development interventions. These initiatives have had a profound and positive impact on the lives of millions of individuals across the country, and their successful implementation was made possible through a total funding of over 330 million USD.

The remarkable contributions of International Non-Governmental Organizations (INGOs) in the aftermath of the 2022 flood cannot be overstated. INGOs played a pivotal role in delivering vital support during the relief, rescue, and early recovery stages. As we look ahead, we acknowledge the crucial role that INGOs

will play in the Resilient, Recovery, Rehabilitation, and Reconstruction of the flood-affected areas of Pakistan.

Furthermore, I would like to express our sincere gratitude to the government of Pakistan for their continued support and partnership. The PHF remains unwavering in its commitment to improve the lives of the poor, marginalized, and vulnerable people in Pakistan. We firmly believe that by strengthening our partnerships with the government, the UN agencies, civil society organizations, and other stakeholders, we can ensure a coordinated and effective response to humanitarian crises that may arise within the country.

I extend my deepest appreciation to our member organizations, donors, partners, and stakeholders for their support in achieving our collective mission. The PHF remains steadfast in our commitment to transparency, accountability, and good governance as we work together to build a prosperous and resilient Pakistan for all.

Mr. Adil Sheraz
Chair Ex-Com, PHF

PHF Executive Committee

The PHF Executive Committee comprises of eight INGOs country directors. They provide strategic leadership, oversee program implementation, represent PHF in external engagements, and ensure effective coordination and advocacy within the humanitarian and development sector in Pakistan. Their expertise and guidance contribute to the success of the PHF and its member organizations.

About Pakistan Humanitarian Forum (PHF)

The Pakistan Humanitarian Forum (PHF) serves as an independent and registered organization, acting as a voice for international non-governmental organizations (INGOs) in their engagements with the Government of Pakistan, UN humanitarian and development agencies, and civil society organizations. Its establishment in 2003 aimed to facilitate coordination among member organizations and present notable program interventions to relevant stakeholders. With the evolution of its purpose, the forum has now established a permanent secretariat, ensuring transparency and efficacy in its operations.

Comprising 42 INGOs, the PHF plays a pivotal role in delivering humanitarian aid and implementing development projects across Pakistan. Additionally, it encompasses eight affiliate members, including the National Humanitarian Network (NHN), Médecins Sans Frontières (MSF), International Federation of Red Cross and Red Crescent Societies (IFRC) and International Committee of the Red Cross (ICRC). Through collaboration with these entities, PHF strengthens the humanitarian-development nexus within Pakistan, particularly during any natural disasters, crises, and emergency situations. The contributions made by PHF member organizations have been instrumental in fostering positive change and addressing pressing challenges in the country.

© Right to Play

Vision

Together for a resilient and prosperous Pakistan.

Mission

- Our Mission is to enhance the social and economic conditions of marginalized, vulnerable individuals, regardless of their age, gender, race, ethnicity, religion, and creed. We strive to achieve the Sustainable Development Goals (SDGs) and Pakistan's Vision 2025 goals.
- We aim to engage civil society networks to streamline healthcare, education, water and sanitation, nutrition, poverty reduction, skills/vocational training, livelihood development, and women empowerment to contribute to the socio-economic development of Pakistan.

PHF Guiding Principles

In our work, we prioritize the following principles:

- **Partnership:** We believe in working together with each other and all relevant stakeholders to achieve our goals through collaboration and cooperation.
- **Representation:** We ensure that our members' voices are heard, and their perspectives are reflected in our work.
- **Integrity:** We value trust, transparency, and unity among our members and strive to maintain these principles in all our interactions.
- **Excellence:** We aim to promote the use of best practices, standards, and high-quality programs in emergency, recovery, and development work.
- **Dignity:** We adhere to humanitarian principles that emphasize the importance of upholding human dignity in all our work.

How Does PHF work

The PHF Secretariat is accountable through the Country Coordinator, and the annually elected Executive Committee and Chair, to the PHF membership. The work of the PHF is guided by a five-year strategic framework and annual programmes for each PHF service. The Secretariat has dedicated staff supporting the services that the PHF delivers: Coordination and Information; Policy and Communications. The Country Coordinator and the Executive Committee are mandated to represent the PHF externally in alignment with the PHF positions and priorities. A General Members' Meeting takes place monthly along with regular meetings of permanent and ad-hoc thematic coordination working groups. The PHF highlights and showcases the achievements of its member organizations by developing high quality publications and organizing events. For capacity building, the PHF organizes different learning events, webinars and other significant meetings with the relevant stakeholders.

PHF Structure

Board of Trustees: PHF Board of Trustees comprises of five esteemed members who play a vital role in guiding the organization. They provide strategic guidance, governance, and representation for the PHF. The board is responsible for making policy decisions, ensuring effective financial management, advocating for the humanitarian sector, and ensuring program effectiveness and risk management..

Executive Committee: An Executive Committee of members is formed to monitor, inform, guide, and assist in the work of PHF. The body serves as a traditional NGO

board and is led by the Chair of the Ex-com. This body has 8 members (including the Chair) and represents the profile of the membership. Members of Executive Committee 2023:

- 1- Care International (Chair)
- 2- Save the Children (Deputy Chair)
- 3- Mercy Corps
- 4- Muslim Aid
- 5- Welthungerhilfe
- 6- Muslim Hands
- 7- International Rescue Committee
- 8- ACTED

The General Forum: Refers to the body consisting of all the members of the forum represented by the most senior legal representative in the country. This includes Country Directors, Country Representatives, Chief of Mission or their formal delegates who are authorized to make decisions on their behalf.

Secretariat: The PHF Secretariat manages and delivers essential services on behalf of the membership, prioritizing coordination and accountability. Led by the PHF Country Coordinator, the Secretariat ensures effective representation of INGOs and provides timely feedback to the membership. By fostering collaboration and maintaining high standards of service delivery, the Secretariat contributes to the success and impact of PHF's mission.

PHF Team

At the core of our forum is a team of seasoned professionals, who actively promote dialogue, cooperation, and information sharing among humanitarian actors. With a focus on inclusivity and efficiency, we facilitate joint action, enable efficient resource allocation, and foster synergy to address humanitarian and development challenges holistically.

PHF Key Achievements

In 2022, Pakistan Humanitarian Forum (PHF) achieved significant milestones in the humanitarian and development sectors, particularly in its flood response efforts. It demonstrated commitment to addressing the needs of flood-affected communities on priority basis. Through close collaboration with UNOCHA, PHF facilitated rapid needs assessments in all provinces, ensuring timely and accurate information on the most pressing issues faced by flood-affected communities. This information guided response strategies and resource allocation.

Additionally, PHF played a vital role in fostering collaboration, information sharing and coordinated response efforts amongst I/NGOs by organizing regular field coordination meetings. This enhanced synergy and efficiency in delivering assistance. The PHF also provided support and advocacy for INGOs, addressing challenges related to taxation and access. This ensured effective coordination and utilization of INGO resources in flood-affected areas. To ensure alignment with national disaster management frameworks and promote efficient coordination, the PHF actively engaged with the National Disaster Management Authority (NDMA), NIDM and Provincial Disaster Management Authorities (PDMAs), which facilitated seamless coordination in the overall response.

PHF's successful development and dissemination of impactful social media and mass media campaigns played a crucial role in highlighting the needs of flood-affected communities, raising awareness among donors and the international community, and mobilizing support for the response efforts. Donor engagement and advocacy were also prioritized, with PHF providing regular updates and insights on the flood situation and advocating for support in addressing emerging needs. PHF closely worked with the Humanitarian Country Team (HCT) and facilitated the launch of the flash flood appeal. PHF ensured collaboration, information sharing, and alignment of efforts among stakeholders, optimizing the impact of the response.

PHF also represented its member organizations and the Pakistani community, advocating for their needs to the international donor community. PHF received significant recognition for its exceptional contributions at the seventh session of the Global Platform for Disaster Risk Reduction (GP2022) held in Bali, Indonesia. PHF showcased its remarkable achievements at Bangkok's 2022 Regional Humanitarian Partnership Week organized by ADRRN, CWSA, ICVA, and UN OCHA. In September 2022, PHF met with UN Secretary General Antonio Guterres showcasing the forum's active involvement in addressing the ongoing humanitarian crisis caused by devastating floods in Pakistan. During his visit to the flood-affected areas, the Secretary General expressed solidarity and support for the local community. He acknowledged and appreciated the continuous efforts made by PHF and its member organizations in responding to the flood situation.

PHF made a noteworthy contribution to the successful holding of the International Conference on Climate Resilient Pakistan, in Geneva on January 9,

PHF Annual Report Launch Event 2021

2023. Through its member organizations' international headquarters, the PHF effectively mobilized support for the Government of Pakistan and advocated for the cause of climate resilience. PHF played a key role in the successful revision of the flash flood appeal by collaborating closely with the United Nations (UN) and providing valuable feedback on thematic sectors and information management. As a result of the forum's efforts, the appeal was revised based on recent Rapid Needs Assessments (RNAs), increasing the initial amount from \$160 million to \$816 million to address emerging needs resulting from the climate-induced disaster that impacted 33 million people and claimed over 1700 lives. The revised appeal aimed to provide urgent assistance to 9.5 million people in the most affected districts.

With the support of ECHO, a comprehensive Protection Mainstreaming Manual was translated, providing guidance on integrating protection considerations into all aspects of the flood response. This ensured the well-being and safety of

vulnerable individuals and communities. PHF actively participated in international events, contributing to knowledge sharing, exchanging best practices, and fostering global partnerships in disaster response. Additionally, PHF developed and disseminated timely Situation Reports to key stakeholders, providing critical updates, response updates from PHF members, and information necessary for evidence-based decision-making and coordinated action.

PHF's strong coordination with provincial and federal government authorities fostered working relationships, ensuring the effective utilization of government resources and a unified approach in flood response. Overall, these achievements highlight the dedication, coordination, and effectiveness of PHF that complement the collective efforts of humanitarian actors in making a positive impact on the lives of flood-affected communities, working towards their recovery and building resilience for the future.

Annual Overview 2022

In 2022, PHF member organizations (INGOs) implemented 400 projects throughout Pakistan including AJ&K and Gilgit Baltistan. These projects included 296 dedicated to providing humanitarian assistance, particularly in response to 2022 floods, and 104 focused on development interventions. These initiatives, worth over \$330 million, benefited more than 21.2 million people across the country. PHF emphasizes the importance of long-term recovery and reconstruction in flood-affected areas, extending its commitment beyond immediate response efforts. PHF's annual report expresses gratitude to the Government of Pakistan for its support and highlights the forum's unwavering commitment to improving the lives of marginalized and vulnerable communities. It emphasizes the need to strengthen partnerships with government institutions, UN agencies, humanitarian actors, civil society organizations, and other stakeholders to foster a cohesive and effective humanitarian response.

PHF Flood Response Coordination

As we reflect on the events of 2022, it becomes evident that Pakistan experienced a profound awakening to its vulnerability in the face of climate change. The floods that swept across the nation served as a grim reminder that despite Pakistan's minimal contribution to global greenhouse gas emissions, it remains highly susceptible to the devastating consequences of environmental shifts. The magnitude of the disaster surpassed even the infamous floods of 2010, leaving a trail of destruction in its wake. However, it was the poorest households and regions with limited human development resources that bore the brunt of this calamity. With approximately one-third of the country submerged, the lives of 33 million people were directly impacted, and nearly 8 million were forced to flee their homes in search of safety. The total damage is estimated at PKR 3.2 trillion (US\$14.9 billion), total loss at PKR 3.3 trillion (US\$15.2 billion), and total needs at PKR 3.5 trillion (US\$16.3 billion) with the housing, agriculture, and transport sectors suffering the most severe blows. It is in these circumstances that the provinces of Sindh, Balochistan, Khyber Pakhtunkhwa, and Punjab emerged as areas requiring significant recovery and reconstruction assistance.

Pakistan Humanitarian Forum (PHF) proved to be a vital platform for coordinating efforts among its member organization (INGOs) and other stakeholders, including the government institutions, civil society organizations and UN agencies. Throughout the entire emergency response cycle, PHF remained proactive and engaged in addressing the devastating floods. PHF supported

initiating rapid needs assessments and ensured effective outreach to the most affected areas, demonstrating their commitment to swift action. PHF's successful development and dissemination of impactful social media and mass media campaigns (Press statements, media talks, TV and Radio shows) played a crucial role in highlighting the needs of flood-affected communities, raising awareness among donors and the international community, and mobilizing support for the response efforts. PHF played an instrumental role in resource mobilization, leveraging the strength of its member organizations' headquarters. PHF actively advocated for support and funding, which was reflected in their participation in the Geneva Donors Conference on Pakistan Floods. Through these efforts, PHF successfully mobilized significant financial resources to aid the flood-affected communities.

PHF recognized the importance of coordination structures at the district and provincial levels, as well as with UN OCHA and the National Humanitarian Network (NHN). PHF facilitated the establishment of these structures to ensure seamless coordination among humanitarian actors involved in the flood response. This collaborative approach maximized the efficiency and effectiveness of interventions, avoiding duplication and promoting cohesive action. Moreover, the Pakistan Humanitarian Forum, in collaboration with its Executive Committee and members, joined hands with the government of Pakistan to mobilize and advocate for the country's climate catastrophe and climate justice case at the international level. This united front highlighted the urgency of addressing climate-related challenges in Pakistan and garnered support from the international community. By establishing coordination structures and advocating for Pakistan's climate justice case, PHF demonstrated its commitment to addressing the immediate and long-term needs of flood-affected populations while also advocating for broader systemic change in response to climate-related challenges.

Humanitarian Interventions

The humanitarian sector, supported by the PHF member organizations, stands as a powerful force of compassion and aid, offering a glimmer of hope to individuals and communities across Pakistan. Through their interventions in climate change adaptation, disaster risk management, economic development, education in emergencies, food security & livelihoods, health, nutrition, protection, shelter, assistance to Afghan refugees, IDPs and WASH. These organizations have made a profound impact on countless lives, with a remarkable funding volume of over 270 million USD, having outreach in Sindh, Balochistan, Punjab, Khyber Pakhtunkhwa, AJ&K and Gilgit Baltistan, delivering critical assistance and empowering communities in their journey towards resilience. During the devastating floods, the unparalleled response of PHF member organizations showcased their unwavering commitment as they swiftly provided comprehensive support, meeting the essential needs of affected communities. Their tireless efforts have not only alleviated suffering but also served as a catalyst for rebuilding lives and fostering a brighter future. The indomitable spirit of PHF member organizations in the face of adversity reflects the extraordinary significance of the humanitarian sector in transforming lives and shaping a more compassionate society.

● Food Security, Livelihood, & Cash Assistance

During the 2022 flood response in Pakistan, several organizations made significant contributions in the Food Security and Livelihoods sector. These organizations, including ACTED, Action Against Hunger, CARE International Pakistan, CBM, CESVI, CONCERN Worldwide, Diakonie, HelpAge International, Human Appeal, IRC, Islamic Relief, JEN, Mercy Corps, Muslim Aid, Muslim Hands, Qatar Charity, Relief International, Save the Children, SIF, Solidar Suisse, Tearfund, and WHH worked diligently to address the food security challenges and restore livelihoods of the affected communities.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Islamabad

Humanitarian Interventions

Food Security, Livelihoods & Cash Assistance

ACTED | ACTED

Acted extended assistance to flood-affected communities in Sindh, Pakistan. The organization supplied food to 10,000 households in Dadu District, which benefited 24,254 vulnerable families. Additionally, 3,476 nursing mothers received supplementary feeding. Winterization kits were provided to 320 households, and cash for work opportunities were offered to 201 men and 201 women for restoring infrastructure and livelihoods. Acted also provided multi-purpose cash assistance to 25 households through the Localized Multi-Hazard

© ACTED

Anticipatory Action Facility. During the Pakistan Flood 2022 season, the organization allocated funds to support 400 households with cash grants and hygiene kits and provided water tankers to 1420 families for the provision of clean drinking water. In Sukkur district, unconditional cash assistance was granted to victims of the Monsoon Flood, along with mini repair toolkits for infrastructure rehabilitation. Acted specifically prioritized Ghotki district by providing cash assistance to address essential needs and promote community engagement in repair and restoration endeavors.

ACTION AGAINST HUNGER

Emergency Assistance Project supported 1,200 households in Thatta and Badin Districts of Sindh Province. The project provided 230 latrine kits, 230 hand wash stations, and 1,150 bars of soap. Additionally, 2,000 children aged under 5 received MNPs. The project also trained 70 community health volunteers and WASH committees on hygiene promotion, disease prevention, and water system operation and maintenance. Finally, the project conducted psychosocial support and community engagement sessions and developed IEC material focusing on key messages related to nutrition, health, and WASH.

© Care

CARE | CARE INTERNATIONAL

CARE International implemented three key projects, i.e. The Pakistan Flood Response 2022 DRA project, Harnai Earthquake Response Project and Flood Emergency Project in Punjab.

Under DRA project, 3200 households were provided with WASH kits, food & hygiene kits and NFI kits. CARE International provided support to 300 earthquake affected families in District Harnai which included Tents/Shelters, NFI, Food Packages,

Hygiene Kits & Dry Pit Latrine. CARE International Pakistan provided life-saving support to 3065 flood-affected families and 18390 individuals in Rajanpur, Punjab. The project's outcome level included the provision of essential items such as food, hygiene kits, and NFI kits, as well as hygiene awareness to support at-risk communities.

ERF project included the provision of food baskets to 800 affected households in Sukkur. Under the DEC project, 46577 individuals benefitted through provision of food, health, protection, tents, hygiene kits and NFI items.

CBM, under the inclusive humanitarian action initiative, supported four dedicated projects other than certain immediate responses within active projects at the time of emergency i.e. the floods and Covid19.

These projects supported differently abled persons, their families and other most deserving people severely affected by the devastating flooding in 2022 with basic life needs identified at grassroots level. Key support in these projects involved cash assistance and provision of food items, hygiene kits, assistive devices etc. Furthermore, poor households impacted by Covid-19 were also supported by CBM. All the projects under the umbrella of the inclusive humanitarian action initiative helped the local economy by injecting funds directly into the communities which stimulated economic activities. By targeting vulnerable groups and

promoting resilience, the initiative contributed to a more equitable and sustainable recovery process. Overall, CBM's projects played a vital role in effectively responding to floods and assisting affected communities to rebuild their lives with honor and dignity.

CESVI was awarded a project to provide humanitarian assistance to communities affected by the rains and floods in Pakistan until 2022. The project focused on supporting flood-affected families in four districts, including two districts in Sindh and two districts in Balochistan. The intervention included two key components, namely, Multi-Purpose Cash

Assistance (MPCA) and Water, Sanitation & Hygiene (WASH) promotion. Through the provision of MPCA, affected families were empowered to purchase the items they needed the most, while the WASH component ensured access to clean water and improved hygiene practices.

CESVI also partnered with the World Food Programme (WFP) to provide food supplies to 10,000 families affected by the 2022 floods in Umerkot District of Sindh, Pakistan. The project aimed to address the immediate food needs of the affected families by providing them with the rations. The provision of food and ration support was critical in ensuring that affected families had access to adequate nutrition and could sustain themselves during the crisis.

CONCERN worldwide | CONCERN WORLDWIDE

Sindh Drought Resilience Program (SDRP) was implemented by CONCERN Worldwide, with funding from the United States Agency for International Development (USAID)/Bureau for Humanitarian Assistance (BHA), to enhance the resilience of drought-affected communities in Sindh, Pakistan. The program benefited 121,514 individuals with 55% female through integrated activities in District Umerkot and Tharparkar. The program addressed early recovery needs by building resilience in various sectors, including risk management policy and practice, food security and agriculture, market system recovery, and water, sanitation, and hygiene (WASH) initiatives. The project increased community awareness, established disaster management committees, early warning systems, and training sessions with farmers on climate-smart agriculture techniques. Furthermore, the program focused on the rehabilitation of WASH infrastructure to improve the living conditions of affected communities.

Diakonie Katastrophenhilfe | DIAKONIE KATASTROPHENHILFE

The project implemented by Diakonie Katastrophenhilfe through its implementing partner PVDP (Participatory Village Development Program) provided humanitarian assistance to flood-affected households in District Mirpurkhas, Sindh. Under the project, One Off Cash Assistance of Rs 25000 was provided to 750 affected households along with uninterrupted daily water supply for initial two

© Diakonie Katastrophenhilfe

months through water trucking at the village level. In addition, 750 inclusive Hygiene Kits, Non Food Items (kitchen items, mosquito nets, blankets), and 750 Bio Sand Nadi Filters after two months of water distribution were provided under the project which also included distribution of feed and fodder for 3,750 livestock (01 large and 04) small animals) of 750 households for two months. Two vaccination campaigns were also conducted in addition to provision of cotton seeds and fertilizers to 428 small farmers.

HELPING HAND FOR RELIEF AND DEVELOPMENT | HHRD

HHRD initiated its Pakistan Flood Relief Efforts in 2022 by coordinating with various regions and departments concerned to gather latest information on the flood effects. The organization responded with the first phase of relief by providing food packages in all 04 provinces of Pakistan. The relief efforts of HHRD extended to other heavily affected districts across all the provinces, including Gilgit/Baltistan. The organization provided a range of support, such as cooked food, dry ration, clean drinking water,

non-food items (jerry canes, kitchen sets, hygiene kits, mosquito nets), shelter materials (shelter kits, transitional shelters, and tents), and livelihood support (seeds, fertilizers, and technical assistance to affected farmers). Furthermore, HHRD organized free mobile medical camps in all the affected districts, ensuring access to essential healthcare services. HHRD's comprehensive response covered a total of 45 rain/flood-affected districts in Pakistan, demonstrating their commitment to addressing the immediate needs of the affected communities and providing vital support to 341,000+ people during the flood relief operations.

HELPAge INTERNATIONAL

HelpAge International, in partnership with Welthungerhilfe, through German Federal Foreign Office (GFFO) funded program provided life-saving support to flood-affected vulnerable households in Jhal Magsi, Balochistan Province and Shikarpur and Jacobabad Districts in Sindh, Pakistan. This included cash disbursement among 600 households, distribution of winterization kits among 400 households, and provision of shelter, food, health, WASH services, and protection to older people and their families through various activities. HelpAge International provided multipurpose cash grants (PKR 20,000/80 GBP) to the most vulnerable OP/PWD and their families. It was a one-time cash transfer activity. 69% of respondents of RNA conducted by HAI submitted that they could utilize

cash. Among them, 38% reported having utilized the cash for their shelter needs, 15% for food while 9% for health. Accessing local markets in Jhal Magsi District is challenging for the beneficiaries due to limited availability of transport and damaged road infrastructure. In-kind support was provided in Dadu and Jhal Magsi. The target of the activity was 1,854 households (1004 in Khairpur, 500 in Dadu and 350 in Nowshera), which supported 12978 family members.

HUMAN APPEAL

As a response to the COVID-19 pandemic, Human Appeal started a project titled 'Community Based COVID-19 Risk Management (CBCRM) & Technology based Socio-Economic Adaptation Programme', which apart from raising awareness on precautions for COVID-19 and vaccination, aimed at providing training and livelihood opportunities to those whose lives were impacted.

The project provided affected microbusinesses with e-commerce and in-kind & financial support to adapt alternate/e-business model resilient to any pandemic. To address the issue of rising unemployment and promote resilient and innovative startups, selected youth including fresh graduates were trained in e-commerce skills. Then the best candidates were financially supported in their innovative startups. Shortlisted enterprises were provided with a grant of up to Rs50,000. This project benefitted a total of 5,155 lives.

The project 'Unconditional Cash Transfer to 15,000 people affected by floods in Jamshoro, Sindh', improved the lives of a total of 84,221 flood affected people in Sindh province.

INTERNATIONAL RESCUE COMMITTEE

The International Rescue Committee (IRC) along with its implementing partners undertook eight projects in four provinces over the span of 10 months (from August 2022 till date). The target districts were Lasbela, Nushki, Jhal Magsi, Sohbatpur, Jaffarabad and Naseerabad in Balochistan; Dadu, Badin, Khairpur, Sanghar, and Mirpur-khas Districts in Sindh; Rajanpur District in Punjab. DI Khan, and Charsadda Districts in Khyber Pakhtunkhwa. The projects successfully supported 49,490 households, including those headed by women, persons with disabilities, transgender individuals, and minorities, with Multipurpose Cash Assistance (MPCA). The projects aimed to prevent further vulnerabilities and negative coping strategies by meeting their critical basic needs. Key activities included selecting affected areas, forming community committees, identifying vulnerable households, and distributing cash following SOPs. IRC established feedback mechanisms and monitoring systems for cash distribution processes as well as conducted post-distribution monitoring. IRC's projects effectively addressed immediate needs, promoted resilience, and supported the most vulnerable populations affected by the floods.

ISLAMIC RELIEF

Islamic Relief responds to emergencies of various scales, such as floods and droughts, at any given time and place. We help the affected communities with life-saving assistance including food, shelter, water, and protection. Islamic Relief has been on the ground providing support to the people over the last 10 months. Islamic Relief was the first humanitarian organization to respond to the disaster since the 3rd of August in the areas including Nushki, Sohbat Pur and Quetta in Balochistan, Tank, Nowshera, Charsadda and DI Khan in Khyber Pakhtunkhwa and Malir, Karachi, Thatta, Dadu, Qamber Shahdad Kot and Mirpur Khas in Sindh and distributed tents, food packs, drinking water, tarpaulin sheets, hygiene kits, multipurpose Cash grant and Kitchen sets to around 1.4 Million peoples.

JEN is active in Dadu District, Sindh to respond to

the 2022 floods. In the initial phase, JEN distributed food and non-food items to more than 5,000 families in severe need of humanitarian assistance. In addition to Sindh, JEN also supported 400 vulnerable families with livestock fodder in Nowshera.

In phase 2 of the flood response, JEN is working on an agriculture project to support farmers affected by the floods to restart their livelihoods. In collaboration with the Agriculture Department, JEN will support farmers to start cultivation of Rabi season crops.

Mercy Corps conducted relief efforts in the Flood Emergency Balochistan (HLR) project. The project aimed to address the extensive damage caused by flash floods in various districts of Balochistan. The floods resulted in the partial and complete destruction of thousands of houses, loss of lives, damage to infrastructure, and the displacement of people. Mercy Corps distributed food and non-food items to 660 vulnerable households, prioritizing those with the greatest need based on vulnerability criteria. They also conducted sessions on health, hygiene, and safe drinking water. The project was implemented in a safe and participatory manner, ensuring the satisfaction of the affected communities. The assistance provided by Mercy Corps helped address the immediate and critical needs of the affected households, particularly in terms of food security.

Muslim Aid through its project "Localized Multi-Hazard Anticipatory Action Facility Pakistan - Sanghar District" supported communities in Naseerabad and Sanghar through GFF anticipatory Action Facility multi-hazard relief project. This project benefited 820 families through provision of Winterization kits, Hygiene Kits and Livelihood Support including seeds, fertilizers, and agriculture tool kits.

MUSLIM HANDS

In response to the 2022 floods across 27 districts in Sindh, Balochistan, South Punjab, and Khyber Pakhtunkhwa, Muslim Hands (MH) provided essential assistance to 994,880 individuals. During the relief phase, MH distributed food, water, and hygiene kits which benefitted over 300,000 people. The organization also ensured education continuity for 15,300 students, conducted mobile medical camps and provided healthcare services, winterization kits and nutrition support to 185,496 individuals.

During the recovery phase, MH focused on rebuilding and rehabilitating the affected communities. The organization constructed 110 permanent houses in Balochistan, established 25 classrooms in Sindh and Khyber Pakhtunkhwa, and supported

230 small businesses in Khyber Pakhtunkhwa to promote livelihoods. Additionally, MH provided cash assistance to 4,000 women/widow-headed families, with a particular emphasis on orphans in their “Orphan Sponsorship” program.

MH’s comprehensive efforts were instrumental in providing emergency relief and aiding the recovery and rehabilitation of flood-affected communities.

QATAR CHARITY

Pakistan’s geophysical conditions, climate extremes and high degrees of exposure

and vulnerability have categorized it as a severely disaster-prone country. As a key program pillar, Qatar Charity demonstrated its commitment to the humanitarian response by actively engaging in disaster relief projects throughout 2022. In line with the Government of Pakistan priorities, Qatar Charity played a proactive role to cater to the needs of 950,444 affected communities in Punjab, Sindh, Khyber Pakhtunkhwa, Baluchistan, and AJ&K through life saving projects to provide food assistance, shelter, non-food items (NFIs), and WASH to ensure the well-being and good health of those affected by the floods.

Moreover, shelter and NFIs were provided to help individuals and families to recover and rebuild their lives. Qatar Charity diligently worked with NDMA to reduce the outbreak of diseases in the flood affected areas through provision of medicines, worth PKR 18 million as a support from the community of Qatar.

Relief International implemented two projects to prevent the primary and secondary impacts of the COVID-19 pandemic on off-camp

Afghan refugees in Khyber Pakhtunkhwa, Pakistan. The projects aimed to address the immediate and secondary needs of Afghan refugees and host communities in the target districts. The projects were aligned with RI's country COVID-19 response plan, Pakistan Humanitarian Response Plan (HRP), and UNHCR's country strategic plan. The projects had three objectives: protecting target communities from COVID-19, responding to the immediate impacts of COVID-19, and preparing youth for employment to respond to the long term economic impacts of COVID-19.

Relief International supports flood-affected communities in selected districts of Khyber Pakhtunkhwa, Pakistan. Its project aims to reach out to more than 40,000 Afghan refugees and host communities to recover from the impacts of flooding, restore their livelihoods, and reduce the adverse impacts of harmful coping mechanisms among households.

Secours Islamique France (SIF) collaborated with multiple donors to provide crucial relief and rehabilitation support after the 2022 floods in Pakistan through "Emergency Response-2022" project. They distributed food packs, cash grants, animal fodder, vaccines, and conducted capacity-building activities on disaster risk reduction in the districts of Khyber Pakhtunkhwa, Sindh and Balochistan as well as Islamabad.

SIF, in partnership with the World Food Programme (WFP), provided food items to over 31,000 households. Furthermore, SIF's "Support to Marginalized families for Integrated Livelihoods and Economic Empowerment" (SMILE) initiative supported vulnerable communities by addressing food security and non-food item needs, such as Qurbani meat (sacrificial meat), Ramadan food packs, and Eid gift packs. The initiative also included capacity-building activities for enterprise development, the formation of cooperative groups, and training. SIF organized recreational activities for over 3,500 children.

Districts, where SIF intervened in response to the 2022 floods, included Upper Dir, Upper & Lower Chitral, Larkana, Sanghar, Tharparkar, Dadu, Shikarpur, Quetta, Pishin, Kila Saifullah, and Lasbela.

The project included rehabilitating 50 existing communal water pumps, installing 30 new pumps, 25 water filtration plants, and kits, and conducting 120 hygiene sessions for at least 3,000 beneficiaries, with a minimum of 50% female participation. Additionally, 350 individuals have received Enterprise Development training and cash grants to establish businesses. Two protection/diversion walls will be constructed to mitigate the risk of flooding.

SOLIDAR SUISSE

SOLIDAR Suisse has played an important role in responding to the devastating 2022 floods in Pakistan. In partnership with local organizations, Solidar actively coordinated humanitarian and relief efforts and supported the most vulnerable flood affected people in districts Nowshera and Sanghar in Khyber Pakhtunkhwa and Sindh respectively. The flood response was in line with the recommendations provided in Pakistan Flood Response Plan 2022. More than 27,000 people benefitted from relief items such as food, non-food items, winterization and hygiene and dignity kits in both the provinces. The assistance provided was enough for survival and well-being for up to 40 to 60

days. The relief package was designed in accordance with the needs of the affected communities and in line with nutrition guidelines provided by Nutrition International. SOLIDAR collaborated closely with relevant government authorities and other humanitarian actors during the projects' implementation. SOLIDAR expresses its gratitude to SWISS SOLIDARITY for its magnanimous financial contribution towards these projects.

Save the Children | SAVE THE CHILDREN

Save the Children executed two projects to provide emergency relief assistance to the flood-affected vulnerable communities in Districts Jacobabad, and Sanghar, Sindh. The projects included the provision of food baskets, non-food items (hygiene kits, household kits, shelter kits), and hygiene promotion and psychosocial first aid sessions. The DRA project also included the provision of Multi-Purpose Cash Assistance (MPCA) to the selected households.

Tearfund | TEARFUND

Tearfund responded to the floods and heavy rains by implementing 7 projects under FSL. The DRA Flood Response Project distributed agricultural inputs to farmers and provided multi-purpose cash assistance to households. The DEC Flood Response Project supported 2,100 vulnerable households with cash assistance and 1,500 small farmers with agricultural inputs. Hygiene promotion sessions and the distribution of hygiene kits benefited many

© Save the Children

households. In Peshawar, the Emergency Food and Relief Commodities Assistance project provided food, hygiene items, and basic household items to 200 vulnerable households. The Tearfund Netherlands Response project reached 4,200 beneficiaries with

food packages, hygiene kits, and health sessions. The Flood Response - Khyber Pakhtunkhwa project assisted 250 flood-affected families with food packages, mosquito nets, blankets, and hygiene kits. The Flood Response through Localized Multi-

Hazard Anticipatory Action Facility project supported 350 households in highly affected areas with shelter assistance, non-food items, and temporary income opportunities. The Torrential Rain Response project helped 300 affected families with relief packages and dewatering activities.

Welthungerhilfe's interventions mainly focus on alleviating hunger and contributing to food and nutrition security. In the year 2022, Welthungerhilfe and partners responded to the devastating floods in Pakistan by providing emergency relief and recovery support to affected communities in Sindh, Baluchistan, Punjab, and Khyber-Pakhtunkhwa. Jointly with local partners and through its own funds, Welthungerhilfe was able to reach out to communities quickly and provide life-saving assistance. Funded by FCDO and BMZ, multi-sectoral relief and early recovery interventions followed. These covered food, cash assistance, water point rehabilitation, shelter, NFIs, hygiene kits, agricultural input, health/hygiene and nutrition education sessions, livestock vaccination, etc. In total 89,167 persons (42,528 male, 46,639 female) benefitted directly from one or more services. The projects continued and are ongoing in 2023 and have thus far reached additional beneficiaries.

● Climate Change

The climate change sector is of utmost importance when it comes to tackling the global environmental crisis and its impact on communities and ecosystems. ACTED, CARE International Pakistan, Islamic Relief, and Muslim Hands played significant role in this sector. Through their initiatives, these organizations actively worked towards combating climate change, promoting sustainability, and building resilience. Their efforts have contributed to safeguarding the environment, protecting vulnerable communities, and creating a more sustainable future for all.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Gilgit Baltistan

13 CLIMATE ACTION

Humanitarian Interventions

Climate Change

ACTED | ACTED

In Umerkot District, Pakistan, ACTED undertook a 14-month initiative to bolster the resilience of communities impacted by drought. With climate change intensifying drought occurrences and agricultural limitations, the intervention sought to address these challenges comprehensively. Acted employed practical measures and embraced a participatory approach, focusing on enhancing

livelihood resilience through community capacity building and reinforcing disaster risk reduction practices. The intervention centered on three Union Councils of Umerkot, benefiting a total of 63,840 individuals. Various activities were implemented, including climate-smart agriculture training, on-farm technical support, provision of cash assistance for seeds and seedlings, livestock management training, and multi-purpose cash assistance. By

supporting these highly vulnerable communities and bolstering their ability to navigate climate-related risks, these initiatives aimed to foster long-term resilience and sustainability.

CARE | CARE INTERNATIONAL

CARE International implemented a heatwave response project in District Sibi in Baluchistan. The project aimed to protect the vulnerable community from heatwaves by provision of protection kits, cooling stations, and disseminating information through IEC material displayed at various parts of the districts. In District Sibi 1350 individuals were provided with heatwave protection kits.

The project also involved the establishment of five temporary cooling facilities at strategic locations, the development of Information, Education, and Communication (IEC) materials on heatwave preventive measures and the equipping of the local community and volunteers with emergency first aid management procedures for heatstroke. Arrangements were made for female beneficiaries e.g.: separate distribution points. If female beneficiaries were unable to visit distribution sites, the kits were delivered to their doorsteps or left with a family member for delivery to their homes. Special

© ACTED

arrangements were made for fruit and vegetable sellers, as they were not able to visit distribution sites. Therefore the kits were transported and provided to them at their worksites.

ISLAMIC RELIEF

The impact of climate change is hitting Pakistan harder than is often realized. Heatwaves and floods are occurring more frequently. Islamic Relief ensures that climate is a major consideration in all its work and supported 532,567 people in 2022. In AJ&K, our aim was to engage communities in Haveli and Bagh through a plantation and advocacy campaign for the protection of biodiversity and policy discussions. This included the plantation of 67,000 wild trees on government and private land, establishment of 10 fruit orchards, construction of 20 gabion/retaining walls with bioengineering techniques, and the building of 6 check dams to reduce water flow velocity over drainage ditches.

In Sindh, IR aimed to enhance the capacity of communities and civil society to engage with the government on climate change adaptation and governance. This involved development of climate-sensitive off-farm and on-farm livelihood models in targeted communities, particularly for vulnerable coastal farmers. Despite challenges in obtaining necessary permits and staff recruitment we were able to reach 5,853 people through different interventions and engagement with youth and

© Muslim Hands

various networks. We are also working with the national government to develop and implement policies to address climate change. Additionally, we are working with the media and academia to raise awareness among people about the worsening effects of climate change on Pakistan. We have also installed solar plants and windmills in Khyber Pakhtunkhwa and Balochistan to provide alternative energy solutions.

MUSLIM HANDS

Overall MH provided help to 123520 people. MH distributed 60 water tanks in Sindh & 74 in South Punjab. 50 room air coolers and water chillers were distributed in South Punjab. 20 heatwave stabilization camps were established in hot climate areas of Sindh, Balochistan, South Punjab and Central Punjab.

● Disaster Risk Management (DRM)

Disaster Risk Management (DRM) is a critical endeavor with the objective of mitigating the impact of disasters on vulnerable communities. Organizations such as Action Against Hunger, Aga Khan Agency for Habitat (AKAH), CESVI, CONCERN Worldwide, Diakonie Katastrophenhilfe, IMC, and Islamic Relief have actively remained involved in implementing DRM projects in 2022. They collaborated closely with local stakeholders and communities to develop and implement comprehensive DRM strategies, including early warning systems, disaster response plans, capacity building initiatives, and infrastructure development.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Islamabad, Gilgit Baltistan

Humanitarian Interventions

Disaster Risk Management (DRM)

AKAH

Aga Khan Agency for Habitat

The Aga Khan Agency for Habitat implemented several projects in flood response and rehabilitation efforts in Pakistan. Its initiatives included the construction of lightweight prefabricated homes for flood-affected families and providing safe and durable housing solutions. These homes offered quick and efficient shelter to those who had lost their homes in the floods. The agency also worked on strengthening and rehabilitating

flood mitigations that had been damaged by the floods, including embankments and levees, with the aim to prevent future flooding and protect the communities. The organization undertook the restoration and rehabilitation of drinking water supply schemes that had been damaged, ensuring that affected communities had access to safe and reliable water sources. Additionally, the agency provided essential non-food items like hygiene kits, blankets, and cooking utensils to meet the

immediate needs of flood-affected families, along with distributing food items to ensure nutritious meals during the recovery phase. Through this comprehensive approach, the Aga Khan Agency for Habitat played a crucial role in supporting affected communities and helping them rebuild their lives in a sustainable and resilient manner.

ACTION AGAINST HUNGER

Action Against Hunger implemented multiple projects in Pakistan to provide emergency assistance and improve disaster preparedness. The project “Multisector Emergency Support for Communities in Sindh” focused on providing aid to the flood-affected communities in Kambar Shahdadkot and Khairpur districts. It involved various interventions such as provision of livestock kits, agricultural inputs, and tools, cleaning of irrigation channels, rehabilitation of water supply systems, construction of latrines, distribution of health and hygiene kits, conducting awareness sessions, medical camps, and micronutrient distribution. Another project called “Improved Pakistan Mission’s Preparedness and Readiness” aimed to assess the early recovery phase after recent floods and ensure stocked emergency WASH supplies for a quick response to vulnerable communities. Lastly,

© AKAH

the project “Strengthening Disaster Preparedness Systems in Sindh” focused on enhancing early warning monitoring, risk communication, and coordination for rapid-onset disasters through the operationalization of a centralized anticipatory action management information system. It also aimed to advocate for better linkages between social safety nets and disaster management departments and support the integration of early warnings and information dissemination to at-risk communities.

CESVI implemented the project “Strengthening resilience of populations vulnerable to recurrent disasters and emergencies in Sindh” with funding from ECHO. The project aimed to enhance the

capacity of district administrations in implementing Disaster Risk Reduction (DRR) measures. The focus was on developing and improving DRR plans at the district level, ensuring that they are comprehensive and effective in addressing the specific vulnerabilities and risks faced by the population. By strengthening the district administration’s capabilities in DRR, the project aimed to enhance the resilience of vulnerable populations in Sindh, enabling them to better cope with and respond to recurrent disasters and emergencies.

Concern Worldwide implemented the project “Responding to Pakistan’s Internally Displaced (RAPID) III” with funding support from BHA. The

project aimed to respond to medium and large-scale disasters in Pakistan while also focusing on capacity building of Disaster Management Authorities (DMAs) and NGOs in disaster preparedness, planning, and response. The integrated 2022 flood response was implemented in 16 districts of Sindh and Balochistan, with additional country-wide protection sub-grants specifically addressing the needs of the transgender community benefiting a total of 520,424 individuals with 27% female, 44% children and 2% transgender. The flood response prioritized life-saving humanitarian assistance in the sectors of shelter and settlement, water, sanitation, and hygiene (WASH), Multi-Purpose Cash Assistance (MPCA), and protection. Additionally, the project emphasized the capacity building of DMAs and local NGOs to enhance disaster preparedness, planning, and effective humanitarian response.

A project is being implemented by Diakonie Katastrophenhilfe in partnership with Community World Services Asia (CWSA) and Participatory Village Development Program (PVDP), which is aimed at strengthening livelihoods and improving the resilience of vulnerable agricultural communities in Districts Tharparkar and Umerkot of Rural Sindh, Pakistan. The duration of the project is from 01 December 2021 to 31 October 2023. In the first year of its implementation, the project achieved multiple outputs including the distribution of Multi-Purpose Cash Assistance of 8,000 PKR each to 1,000 farmers

for three months during lean period (April to June) and disbursement of a complete agriculture package to 1,000 farmers. The package included local breed of goats, cropping seeds (Millet and Cluster bean), seasonal vegetable gardening seeds and kits, hayrack, livestock shelter, fruit, and fodder trees. The agriculture package was distributed before the monsoon allowing the affected farmers to cultivate their land and benefit from other assistance to become more resilient to the negative impacts of the drought. CBDRM plan was also developed at the village level, which involved establishing an ERT and providing them with training and toolkit. This

intervention equipped them to be well prepared for future emergencies /crises.

International Medical Corps (IMC) project “Building Resilience and Preparedness in Pakistan” was aimed at strengthening the resilience and preparedness of Afghan refugees living in Pakistan’s Khyber Pakhtunkhwa province. This equipped them with the necessary resources to respond to disasters. The region frequently experiences floods, during monsoon season and landslides,

and earthquakes in its mountainous areas. These disasters often lead to food shortages and disease outbreaks. Given the existing strain on healthcare facilities and weak systems in the country, Afghan refugees have limited resources to function as their own first responders. The project focused on providing the Afghan refugees with the support and tools they needed to enhance their resilience and preparedness in the face of such challenges.

ISLAMIC RELIEF

Mitigating the disaster risks and reducing climate related damages is one of our top priorities in Pakistan. IR has built the resilience of communities by engaging children, women, men, and the elderly in spreading knowledge about the importance of disaster risk reduction (DRR) and creating awareness among communities to reduce disaster risks. Overall it supported 14,101,156 people. At the time of disasters, collaboration is key in helping the communities. Islamic Relief in collaboration with Shelter Box has distributed shelter kits among the affected communities in Sindh and Balochistan. Islamic Relief and UNDP have joined hands to assist the people who suffered huge losses in the recent floods. Working together with Disasters Emergency Committee (DEC), Islamic Relief is providing lifesaving aid to the people in DI Khan and Tank, including blankets, food packs, hygiene kits, which are still essential for the people affected by the floods.

● Economic Assistance in Emergencies

Economic development holds great significance in the realm of disaster response and recovery, as it plays a crucial role in rebuilding communities, empowering individuals, and fostering sustainable growth. In 2022, ACTED, HelpAge International, HOPE'87, Islamic Relief, and Tearfund successfully implemented a range of impactful economic development projects in flood response. These organizations played a pivotal role in the recovery and rebuilding efforts. Their initiatives not only provided immediate relief but also emphasized the importance of long-term economic development, empowering communities, and fostering sustainable growth for a resilient future.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Islamabad

Humanitarian Interventions

Economic Assistance in Emergencies

ACTED | ACTED

Acted implemented the “Cash Assistance and Restoration of Livelihoods in Sindh Province, Pakistan” project, focusing on Umerkot District. The 10-month intervention was aimed at addressing the recovery needs of vulnerable populations and bridging the gap between emergency response and rehabilitation. Small farmers and daily wage laborers, already affected by drought, locust attacks, and the COVID-19 pandemic, faced additional challenges due to recent floods. The project was aligned with the ongoing response efforts by other humanitarian actors in the district to maximize impact. The project encompassed various activities such as community-based disaster risk management, COVID-19 prevention, climate-smart agriculture, cash-for-work programs, health and hygiene initiatives, nutrition support, small business grants, and infrastructure construction. Emphasizing a participatory approach and community capacity building, the project facilitated rapid recovery and resilience building for sustainable livelihoods which included construction of roads, seed storage bins, water ponds for animals, and animal shelters.

HelpAge International | HELPAGE INTERNATIONAL

HAI's project “Life-Saving Support to

Flood 2022 Affected Communities in Jacobabad” aimed to support individuals severely impacted by the floods in Pakistan. HelpAge International distributed bedding & temporary kits, and disbursed cash to address immediate needs. The organization also worked to support the affected communities by providing relief and assistance in areas such as housing, infrastructure, and agricultural recovery.

In another project “Responding to urgent needs of Flood affected vulnerable people including older people’s families and families of People with

disabilities in District Jhal Magsi, Balochistan, Pakistan,” HelpAge International focused on addressing the specific needs of older people and the differently abled persons. It provided non-food items, cash grants, hygiene kits, and conducted awareness sessions on key hygiene practices. Additionally, assistive devices were distributed amongst them to enhance their mobility and reduce dependency, so that they can better perform routine chores.

HelpAge International also actively supported flood-affected older people in Nowshera District, Khyber Pakhtunkhwa, through the project “Supporting immediate lifesaving needs of flood-affected older people by providing multipurpose cash grant in Nowshera District Khyber Pakhtunkhwa.” The project aimed to provide multipurpose cash transfers to meet the immediate lifesaving needs of older people and their families. The organization worked in partnership with local implementing partners and utilized mobile cash transfer services to ensure efficient and timely assistance.

HOPE'87 | HOPE'87

The project “Fighting the Impact of COVID-19 Pandemic in Pakistan (FICP)” implemented by HOPE'87 aimed to enhance the skills and

competencies of young women and men, with a focus on Afghan refugees, to mitigate the negative effects of the pandemic. It was co-funded by the Federal Ministry of Social Affairs, Health, Care and Consumer Protection, Austria. The project offered courses in various areas including digital technology, art, and crafts, tailoring and embroidery, 21st Century skills education, construction and renovation, marble mosaic, and biotechnology for medical labs. Key activities included mapping deserving participants, providing specialized skills training, conducting general training on Mental Health and Psychosocial Support, organizing team building and strategic time management techniques, offering incubation support along with the provision of shared space with fully equipped tools and establishing linkages with small and medium enterprises, among others.

ISLAMIC RELIEF

Islamic Relief supported 242,343 people in regaining their livelihoods after losing everything to floods. Islamic Relief is all set to

rehabilitate indigenous irrigation water harvesting structures and diluting/rehabilitation of kacha irrigation channels through cash-for-work, food-for-work, and food-for-assets interventions in the flood-affected areas. In addition, farmers are being trained in resilient agriculture and good livestock management practices to promote a resilient lifestyle among the affected population.

The rehabilitation of damaged shops and businesses along with the development of small & medium enterprises will enable the people to earn their livelihoods and provide for their families including decent meals shelter and education to their children. Islamic Relief distributed cash grants and de-watering pumps to support flood-affected communities in BLN. The organization reached out to 80,000 people, ensuring transparent cash transfers and efficient distribution. Through the distribution of food packages, hygiene kits, and multipurpose cash grants, IR supported the most vulnerable households. Islamic Relief and UNDP have joined hands to help the people who suffered huge losses in the recent floods. The partnership will create income opportunities for households affected by the floods & support the construction of community infrastructure. In an effort to economically empower women, Islamic Relief is providing them with startup grants as well as vocational and enterprise trainings.

Tearfund | TEARFUND

Tearfund executed two projects in response to

socio-economic challenges and the impact of floods on communities. The first project, named “Empowering Communities to Address Socio-Economic Challenges II,” aimed to enhance the economic empowerment of women and youth, thereby strengthening the local community. This initiative sought to foster a change in community attitudes by utilizing available resources to find solutions for common issues. It involved the establishment of three skills development centers, providing capacity building to the community, promoting tree plantation, and raising awareness among participants about environmental conservation and sustainability.

The second project, titled “Localized Multi-Hazard Anticipatory Flood Response II,” aimed to improve food security and provide essential veterinary aid to communities affected by floods. This project distributed 135 packages of dry animal feed and 100 Agri-input packages containing seeds and fertilizers for the rabi/kharif season. It also implemented cash-for-work programs for 70 households, focusing on the repair and rehabilitation of 50 animal shelters.

Education in Emergencies

Education in emergencies is of special importance in safeguarding the well-being and future prospects of individuals, particularly during times of crisis. Organizations such as AAR Japan, ACTED, CARE International Pakistan, CRS, HELVETAS, HOPE'87, IRC, KNK Japan, Right to Play, and SOLIDAR SUISSE have recognized this significance and implemented projects to ensure education continuity and support the recovery process. These initiatives primarily focused on rebuilding schools, providing necessary resources, supporting teachers, and creating safe learning environments for affected communities.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Islamabad, Gilgit Baltistan

Humanitarian Interventions

Education in Emergencies

AAR Japan developed a project aimed at increasing the education opportunities for differently abled children in Haripur District, Khyber Pakhtunkhwa Province. The project introduced the concept and practice of Inclusive Education (IE) to enable

differently abled children to study together with other children while considering reasonable accommodation for them.

Building upon the achievements of the first and the second year, the project aims to implement IE in two schools: KTS Boys' School and PATHAN Girls' School

Under the FCDO-funded Leave No Girl Behind initiative, ACTED implemented the 4-year project "Closing the Gap: Educating Marginalized Girls in Sindh and Khyber Pakhtunkhwa." It focused on non-formal education in Districts of Kashmore, Jacobabad (Sindh), and Lakki Marwat Khyber Pakhtunkhwa, addressing barriers to education. The program included Accelerated Learning, Literacy and Numeracy classes, as well as skills development/TVET and financial literacy training. ACTED, in partnership with others, implemented the "Pakistan Flood Response 2022" project. Supported by Education Cannot Wait, it aimed to provide inclusive and quality learning for flood-affected children. Temporary learning spaces were established, and psychosocial support was offered. As part of the program, teacher training, gender- and age-sensitive services, and culturally appropriate educational information were provided. ACTED also focused on mental health and psychosocial support, conducted capacity building activities on gender-based violence, implemented interventions related

to menstrual health & hygiene and conducted an enrollment campaign.

The goal of our three-year project is to improve the well-being of the most vulnerable Afghan refugees and host community children - especially girls and those with disabilities - through the provision of inclusive, equitable and sustainable quality education in a safe and accessible learning environment.

Marginalized Afghan refugees and host community children and adolescents are empowered through increased access to inclusive, equitable and quality education in Baluchistan and Khyber Pakhtunkhwa provinces.

Enhanced the psychosocial well-being of the most vulnerable Afghan refugees and Pakistani children in schools by implementing prompt and robust response mechanisms that address their protection concerns to actively and confidently navigate their lives.

The project directly targeted 9,570 individuals (including 8,000 children, 370 teachers and 1,200 PTSMC members). Additionally, 39,470 individuals comprising 38,000 community members (Parent, elders, religious leaders, education officials etc.) will also benefit from it, 760 children were referred to UNHCR primary schools and 710 children to high schools (Of the direct beneficiaries) , thereby deriving further indirect benefits from the project.

CRS and partners are supporting 55 schools in three districts: Jacobabad and Dadu in Sindh, and DI Khan in Khyber Pakhtunkhwa through their EiE projects. The project aims to improve children's access to schools in their communities through the rehabilitation of flood-damaged schools, psychosocial support to the children and rehabilitation of WASH facilities and supplies. The

© Helvetas

CRS is supporting the schools in teaching-learning materials, recreational kits, and teachers training on multigrade and activity-based learning. The project has reached 13,066 students. Currently, the CRS is expanding the project to more schools to reach the additional children in the respective districts. It is closely coordinating its activities with the education sector working groups, provincial education departments and PDMAs.

HELVETAS implemented the project "Humanitarian Response to Address the Immediate Life Needs of Vulnerable Afghan Communities in Khyber Pakhtunkhwa - Pakistan." The project provided health, education, and protection services to Afghan refugees in six districts of Khyber Pakhtunkhwa, enhancing their resilience and

© Yasir Aslam @ HOPE'87/ Cover photo

addressing their immediate and chronic needs. Through a unique identification process and referral approach, vulnerable individuals were reached and provided with specialized services, assistive devices, and rehabilitation. The project also focused on strengthening public health facilities and enrolling Afghan children in non-formal and formal education programs. The outcomes included targeted enrollment, provision of learning materials, counseling, catch-up classes, teachers training, and the provision of necessary materials and equipment for education. It has an integrated approach in identifying non-school going children in all 3 components i.e., education, health, & protection.

I HOPE'87

HOPE'87 implemented the project "Access for Out of School Children to Education and Safe Schools in Pakistan (ACCESS)" The project aimed to expand access to education for over 188,610 children, including Afghan children, who were out of school or at risk of dropping out. It focused on improving learning outcomes, providing psychosocial support to teachers, strengthening school management committees, and enhancing capacity in public health emergency and disaster management. The project also had wider transformative impacts, such as raising community awareness on COVID-19 prevention, improving social and economic status, promoting female

participation in governance, and preparing future female education leaders. The interventions included establishing community schools, teachers' training for quality education, provision of educational materials and infrastructure, social-emotional learning activities, enrollment campaigns, and support for Afghan students through an education voucher scheme. The project aimed to improve primary school access, enrollment, retention, and the quality of primary education.

I INTERNATIONAL RESCUE COMMITTEE

The IRC, in collaboration with its implementing partners, supported 248,172 clients focusing on improving access to education for the girls affected by the floods in targeted districts namely Nushki, Jafferabad, Naseerabad, Sohbatpur and Awaraan in Balochistan.

© KNK

communities and schools. Child clubs were also established and equipped with life skills training. Dignity kits for girls of reproductive age and hygiene kits for children were distributed to ensure their well-being and hygiene. Rehabilitation of 10 government Schools was completed in the targeted districts.

| KNK JAPAN

The KNK project focused on improving girls' secondary education in Battagram, Mansehra and Abbottabad Districts in Khyber Pakhtunkhwa by expanding school facilities, providing teacher and parent training, and implementing ICT and life skills education. Outcomes included constructing classrooms and toilets in GGSS Havelian, GGSS Shamdara, and GGSS MMK, and achieving significant improvements in enrollment and dropout rates. Net enrollment rates increased to 100% in GGSS Shamdara, 105% in GGSS Havelian, and 52.5% in GGSS MMK, while dropout rates decreased to an average of 2.69%, with GGSS MMK at 0%, GGSS Shamdara at 4.8%, and GGSS Havelian Village at 3.27%. Teachers' training, parent involvement, and life skills training were successfully implemented. Advocacy efforts involved forming community advocacy groups and utilizing Girls' Youth Ambassadors through social media and enrollment campaigns. The next project aims to continue with the same goals (facilities, training, ICT, and life skills education) in GSS Thakot, GGSS Oghi, and GGMS Banna Allai.

The IRC established Safe Healing and Learning Spaces (SHLS) to provide emergency education, life skills, and psychosocial support. The IRC

also established and reactivated child protection committees and Parent-Teacher-Student Management Committees (PTSMCs) in targeted

© Solidar Suisse

The “Building Back Better” project, implemented by Right to Play, focused on addressing the educational challenges caused by the COVID-19 pandemic. The project ensured that children had continued access to safe, engaging, and high-quality education, even during remote learning. As part of the project, consultative meetings were conducted with key stakeholders such as the District Coordination for Assistance and Rehabilitation (DCAR), the Social and Emotional Learning Department (SELD), and the School Textbook Board (STBB). Trained coaches facilitated regular play-based learning activities with a gender responsive approach, ensuring

equitable access to educational opportunities for both girls and boys. By implementing these initiatives, the project promoted resilience and ensured the continuity of education for children in challenging circumstances. Additionally, to engage children in meaningful learning experiences, sports tournaments and festivals were organized in and around the targeted schools.

SOLIDAR supported over 11000 vulnerable refugees in the urban refugees’ settlement of Peshawar through the provision of food and Non-food Items.

The relief package was designed in accordance with the specific needs and requirements of the Afghan refugees and implemented with strict adherence to humanitarian principles including impartiality, transparency, accountability, neutrality, and non-discrimination.

To address the educational challenge of refugee children, 08 Non-Formal Education centers have been established within refugee communities in urban settlements in Peshawar. More than 360 children are enrolled in these NFE centers thereby receiving basic education. A significant portion of the enrolled children were working as rag pickers, fruit sellers, and polythene sellers. The project empowered eight women support groups by supporting them in implementing health and hygiene, GBV and child protection awareness raising sessions as well as linkage/referral activities within the respective communities. SOLIDAR works closely in cooperation with government authorities to implement the project. SOLIDAR commends Swiss Solidarity, AWO, and Volkshilfe/NiN for their generous financial support. Moreover, another project improved basic education access for 1175 disadvantaged children, reducing their risk of child labour, abuse, and violence. The project also provided on-the-spot-support to teachers in improving teaching and learning methodologies. Moreover, it also sensitized members of disadvantaged communities – mostly parents – about child rights, particularly focusing on organizing communities to prevent the worst forms of child labour, violence, and abuse.

Health

Ensuring access to healthcare services in emergencies is of paramount importance as it addresses the immediate health needs of affected populations and contributes to their overall well-being, resilience, and recovery. Organizations such as CARE International Pakistan, CONCERN Worldwide, HelpAge International, Human Appeal, IMC, International Rescue Committee, Jhpiego, MDM, Mercy Corps, Muslim Hands, and Save the Children have implemented impactful healthcare projects. Their initiatives included a wide range of healthcare services including emergency care, reproductive health support, vaccination campaigns, mental health support, and capacity building.

3 GOOD HEALTH AND WELL-BEING

Humanitarian Interventions

Health

 | CARE INTERNATIONAL

CARE International Pakistan implemented two projects in Pakistan related to COVID-19 response:

The project “CUSA Second Wave Covid-19 Emergency Response Pooled Fund” supported the public sector health facilities in targeted districts to prepare and respond to the COVID-19 emergency through the provision of medical equipment, WASH-IPC kits, and training in health facilities and the catchment areas. It also included the distribution of medical equipment, PPEs, and WASH kits to health facilities. Awareness sessions on health, hygiene, and vaccination were conducted in catchment areas and educational institutes.

Another project “Strengthening government sector health system and providing immediate emergency response to curtail the outbreak of COVID-19 across Pakistan in Punjab, Sindh, Baluchistan, and Khyber Pakhtunkhwa provinces (Pakistan COVID-19 Response ECHO)” supported government to overcome the significant obstacles in delivering essential Covid-19 testing and medical assistance to at-risk populations. It focused on providing health packages, WASH support, health advice through telephones and distribution of soaps to vulnerable households in 14 districts across Pakistan.

 | CONCERN WORLDWIDE

Concern Worldwide implemented six programs with a focus on the health sector, benefiting a total of 2,346,466 individuals. The three COVID-19 emergency response projects were executed in Sindh, Khyber Pakhtunkhwa and Baluchistan with the financial support of ECHO, and BPRM. The three flood emergency response projects were implemented in Sindh with the funding support from FCDO, DEC and Community Chest of Korea (CCK) which focused on improving the health sector at the institution and community level. The COVID-19 response projects prioritized the health system and supported the government’s COVID-19

© Concern Worldwide

response plan through the provision of PPEs, laboratory and other diagnostic equipment, and non-medical equipment such as nebulizers, oxygen concentrators, disinfection materials, LHW toolkits, and sanitation and handwashing stations, besides creating mass awareness. The flood response projects focused on providing primary healthcare services through mobile health camps and static health facilities. Priority was given to the recovery of critical infrastructure in the targeted health facilities, while clean delivery kits were provided to pregnant women and referral support to the patients needing secondary care.

| HELPAGE INTERNATIONAL

HelpAge International undertook a humanitarian program in five flood-affected regions in Pakistan, in collaboration with local partners such as HANDS, CDF Jhal Magsi, REEDS Pakistan, and IDEA. The program had a strong focus on providing immediate assistance to the highly vulnerable individuals, including older people, their families, and the differently abled persons. The program achieved significant outcomes, including the distribution of hygiene kits that led to improved sanitation practices and a reduced risk of diseases. Vulnerable individuals and families were provided

with bedding and winterization kits, ensuring they had adequate shelter and protection during harsh weather conditions. Dignity kits were distributed, positively impacting the well-being and self-esteem of the affected population, with specific attention given to older individuals and the differently abled persons. Protection kits were provided, equipping individuals with safety measures, identification documents, personal safety items, and access to legal assistance when needed. The distribution of multipurpose cash assistance empowered the affected households to address immediate needs and make decisions according to their priorities.

| HUMAN APPEAL

In response to the urgent need for medical assistance in the flood-affected regions of Pakistan, Human Appeal undertook a remarkable initiative by establishing mobile medical clinics in the flood affected regions of Sindh and Punjab. The mission drove this innovative project to effectively address the pressing healthcare needs of the communities adversely impacted by the floods.

The mobile medical clinics were a lifeline for the affected populations, as they brought essential healthcare services directly to them. Staffed by compassionate medical professionals, these clinics ventured into remote areas in specially outfitted vans. This strategic approach ensured that even the most isolated and hard-to-reach communities could access the vital medical care they desperately

required. The primary objective of the project was to provide comprehensive and immediate healthcare support. The clinics offered consultations to individuals in need, diagnosing their conditions, and prescribing appropriate medications, all free of cost, benefiting 7,372 individuals.

| IMC

IMC implemented the “Emergency Flood Response” project in Sindh and Khyber Pakhtunkhwa, providing primary healthcare services, including disease prevention, injury management, reproductive health, and WASH services. Eleven Medical Mobile Teams (MMTs) were deployed in Districts Jamshoro, Mirpur Khas, Dadu (Sindh), and Charsadda Khyber Pakhtunkhwa. These teams conducted a range of services including general consultations, nutrition services, maternal and child healthcare, medicine distribution, hygiene promotion, pit latrine construction, and water distribution.

In the “Enhancement of COVID-19 coverage in District Peshawar-Khyber Pakhtunkhwa, Pakistan” project, IMC aimed to improve COVID-19 vaccine coverage by offering vaccination services to vulnerable populations. The project focused on enhancing accessibility through mobile teams and providing accurate information to enhance knowledge and attitudes towards the COVID-19 vaccination.

| INTERNATIONAL RESCUE COMMITTEE

The IRC, along with its implementing partners executed six projects in the following districts: Lasbela, Nushki, Jhal Magsi, Sohbatpur, Jaffarabad and Naseerabad in Balochistan province; District Dadu, Badin, Khairpur, Sanghar, and Mirpur-Khas districts in Sindh; Rajanpur district in Punjab and DI Khan and Charsadda Districts in Khyber Pakhtunkhwa province. Through various projects, 142,249 clients received sessions pertaining to Mental Health & Psychosocial Support (MHPSS), protection, life skills, health & hygiene, and recreational activities to reduce trauma and anxiety in women, adolescent girls, and children.

IRC provided essential medicines, supplies, and equipment for health camps in flood-affected areas. The medical camps were equipped with ambulances and offered services for dengue and malaria testing. Additionally, they conducted nutrition screening of pregnant & lactating women. A referral pathway was also put in place to facilitate skilled birth deliveries, provide long-acting contraceptives, and manage and treat STIs (sexually transmitted infections), along with other reproductive health care. Under these projects, IRC established 201 medical camps and rehabilitated 29 Health facilities in targeted districts.

| JHPIEGO

PAKISTAN

 **EMERGENCY
FLOOD RESPONSE**

HYO-C

Qadir Government Hospital saw a substantial surge in patients seeking both outpatient and inpatient services, as people from surrounding areas sought shelter and relief. Jhpiego Pakistan and the district administration devised a relief plan, distributing mosquito nets, conducting anti-malaria and dengue space spraying drives, and organizing a medical health camp. Pregnant women and residents in submerged areas were identified as primary beneficiaries. Lady Health Workers were mobilized to maximize outreach. This humanitarian response restored hope and trust, reassuring the flood-affected people of a better future.

Jhpiego collaborated with the Expanded Program on Immunization (EPI) to enhance immunization

coverage and service quality in under-immunized communities. A human-centered design approach was employed to reduce dropouts, improve follow-up vaccination, and seize opportunities for catch-up vaccination. Trust-building with communities was deemed crucial, which was achieved through capacity-building, providing quality services, aligning delivery arrangements, and fostering positive engagement between providers and clients.

Mercy Corps Pakistan, with its partner organizations, responded in flood disaster in Baluchistan (Sohbatpur, Jaffarabad, Quetta) and Sindh (Jacobabad, Shikarpur, and Qambarshadatkot) through the Flood Emergency Response 2022 project. With a focus on the most affected communities, Mercy Corps provided integrated humanitarian assistance in line with the UN Flood Response Plan. Mobile health camps and antenatal/postnatal centers were established to ensure access to primary healthcare services along with dewatering activities held in district Sohbatpur. The district administration honored Mercy Corps with an appreciation letter.

| MUSLIM HANDS

Through its project, MH organized 50 medical camps, 160 H&H sessions, 160 IYCF / Nutrition sessions with PLWs (Pregnant & Lactating Women) and identified and referred more than 1000 MAM/SAM cases. 10 BHUs were provided with three

months stock of medicines. 12 EPI centers were rehabilitated through the provision of furniture, essential medical equipment, and infrastructure rehabilitation. 60 awareness sessions on nutrition and hygiene were conducted specifically targeting health workers. More than 5000 people were engaged through community meetings.

Through the contributions of Qarshi Foundation, MH distributed herbal medicines and clean drinking water among 2500 families in South Punjab. In partnership with TIKA (Turkish Cooperating Agency in Islamabad), MH managed a mobile health unit which was refurbished and designed keeping in view cultural aspects to manage males & females separately. The unit, specifically donated by TIKA, was intended for flood affected areas to serve the communities having no access to nearby health facilities.

| MDM

The HIP 2022 initiative was launched in June 2022 with the aim to continue to provide essential and lifesaving care and services to Afghan Refugees.

Five medical teams were assigned to 13 BHUs in six districts and provided curative and preventive services on a weekly rotational basis. During the project period 26664 consultations were provided to Afghan Refugees in 6 districts. 4394 women received antenatal care (ANC) consultations. Postnatal care consultations were provided to 1500 women. Counseling on family planning and healthy spacing was provided to 3420 women. 746 women opted for FP methods after the counseling. MDM provided emergency assistance in the Districts of Nowshera and Charsadda by establishing four (4) clinics for the flood affected population. The aim of this intervention was to ensure that vulnerable people, regardless of their status, had access to primary healthcare services.

A total of 18489 OPD services were provided while 1637 women received Antenatal Care (ANC) consultations. Counseling on healthy spacing was provided to 1984 women out of which 402 women adopted different methods for health birth spacing. 7766 Nutrition screenings were conducted for children aged 6 to 59 months.

Save the Children | SAVE THE CHILDREN

Save the Children implemented the Afghan Refugee Crisis 2022 project which focused on addressing the specific needs of adolescent girls, both within and outside the camp, in Balochistan, as well as in host communities. Through safety audits and assessments using the SCI Tool, risks to girls and women were identified and mitigated, particularly concerning gender-based violence, sexual exploitation and abuse, and other forms of harm.

Based on the identified gaps and needs, the project included activities such as training government service providers, conducting awareness sessions, facilitating consultative sessions with adolescent girls, providing orientation to service providers, linking mothers and adolescent girls with SRH service providers, organizing nutrition awareness sessions, and conducting community-level sessions on existing services, including GBV and women and girls' protection units.

2 ZERO HUNGER

Humanitarian Interventions

Nutrition

CONCERN worldwide | CONCERN WORLDWIDE

CONCERN Worldwide implemented the project “Piloting CMAM Surge Approach - A Step Towards Building Health System Preparedness” in the field of nutrition. Building on the success of the pilot project, CONCERN Worldwide continued to implement the successful CMAM Surge Approach in Districts Umerkot and Tharparkar through their own funding and with the support of ECHO. This program included setting up CMAM Surge facilities in health facilities, training health - care providers and nutrition staff, and conducting orientation sessions on the approach. ECHO also funded a consortium program led by WFP with Concern as an implementing partner through local partner PPHI in District Tharparkar.

gain | GAIN

The “Sub-National Food Systems Dashboard” project, implemented by GAIN in partnership with the Government of Pakistan, aimed to collect subnational data on key food systems indicators. The project facilitated the use of the dashboard by national, provincial, and city-level government authorities to support improved policies and actions in food systems. The dashboard served as a tool for tracking progress, ensuring accountability,

© Concern Worldwide

and guiding efforts to transform food systems, improve diets, and address environmental impact. This initiative aimed to benefit individuals at risk of hunger, malnutrition and job losses in the food system, as well as the impacts of climate change and environmental degradation.

HOPE 187 | HOPE'87

HHRD's “Dadu (Mehar) Fire Incident 2022” project aimed to provide immediate assistance to the affected community in village Faiz Muhammad Chandio. The tragic incident resulted

in the loss of 09 lives, destruction of around 10 homes, and the death of more than 160 livestock. The project focused on providing dry ration support to the 300 most affected families, addressing their immediate food needs. This initiative aimed to alleviate the hardships faced by the community heavily dependent on agriculture and livestock and whose sources of survival were severely impacted by the devastating fire.

| HUMAN APPEAL

Human Appeal conducted various projects to support the most vulnerable with nutritious food during the month of Ramadan, Eid ul Adha, and particularly soon after the devastating floods.

'Distribution of Eid Meals' project supported vulnerable families by distributing Eid meals (oil and rice) on Eid ul Adha. It also focused on supporting the poor and vulnerable by distributing fresh Qurbani meat (sacrificial meat), benefiting 6,297 families, to meet their dietary needs during the festive season.

Human Appeal undertook multiple projects to distribute food packs and nutritious cooked food among the flood affected. The 'Humanitarian Assistance to most flood-affected communities in Sindh – Pakistan' project, for instance, provided a vital support to 10,240 most affected individuals. Human Appeal also partnered with the WFP to provide food ration packs to the flood affected

© Human Appeal

communities in the Districts of Dadu ,Kambar and Shahdaktot in Sindh. In total, Human Appeal reached 437,498 people under this program in 2022.

| ISLAMIC RELIEF

We believe health is the foundation for long-term development. Without access to health services and nutrition, it is impossible for

people to move beyond the urgency of meeting their most basic needs. IRW implemented the Aqiqah and Adak Project, which combines two forms of animal slaughter within Islamic tradition with the aim to provide fresh Aqiqah and Adak meat packets as an essential source of supplementary protein on an ad hoc basis among 800 children to sustain their nutrition intake for their better health during the floods 2022.

Others

CARE International, Islamic Relief, NCA and WHH executed projects with a focus on promoting local capacity building, dialogue among communities, social cohesion, and conflict prevention. Their initiatives covered various areas, including humanitarian response, land and water productivity, interfaith harmony, gender equality, and food security. Through these projects, these organizations worked towards empowering communities, fostering cooperation, and addressing key challenges in different sectors.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Islamabad

Humanitarian Interventions

Others

 | CARE INTERNATIONAL

The partnership between CARE International Pakistan, the Better Cotton Initiative (BCI), and CARE International UK had a significant impact on women's empowerment in the cotton sector. Despite funding reductions in the WOW program, the project successfully achieved its objectives. Through targeted training programs, the project enhanced the capacity of Implementing Partners (IPs) and engaged workers in the cotton sector, leading to greater awareness and sensitivity towards gender-related issues. This resulted in a more inclusive and supportive environment for women, promoting their recognition and contributions within the industry. Gender mainstreaming efforts in cotton production empowered women by providing training and promoting their active participation at all levels. This led to improved access to resources, increased decision-making power, and greater leadership opportunities for women. Furthermore, the project addressed women's health and hygiene needs through the distribution of hygiene kits, ensuring improved hygiene practices and better overall well-being for women working in the sector.

| ISLAMIC RELIEF

Community Resilience programming is designed to support community level

development and conflict prevention activities to support the community. IRP implemented projects aimed at promoting community resilience, social cohesion, and conflict prevention in the tribal districts of Khyber Pakhtunkhwa. The project included training sessions on social cohesion, civic education, and conflict resolution for farmers, peace committee members, journalists, and youth. Farmers also participated in identifying and implementing social action projects, while CSOs and NGOs engaged in consensus meetings on Khyber Pakhtunkhwa government reforms. The project conducted a pre- and post-KAP survey for Khyber District to measure its impact.

| NORWEGIAN CHURCH AID

Norwegian Church Aid (NCA) implemented the "Faith in Action for Equal Opportunities" initiative, which promoted interfaith harmony, cohesiveness, and peace building among diverse communities in Chitral and Peshawar Districts of Khyber Pakhtunkhwa. The initiative successfully fostered peaceful and harmonious coexistence, empowered women, and facilitated dialogues among faith communities. Key activities included training sessions for youth on positive gender behavior, vocational skills development for marginalized youth, and awareness campaigns on gender and climate change led by faith leaders and youth.

| WELTHUNGERHILFE

Welthungerhilfe strongly promotes localized response and coordination mechanisms, involving the civil society and government authorities.

'ToGETHER', a global Localization Program funded by the German Foreign Federal Office (GFFO) was implemented by Welthungerhilfe and local partners in Pakistan. Local partners assume leading roles in strategic decision-making, timely and effective coordination, and implementation of humanitarian action. Through the project's Humanitarian Operation & Innovation Facility, the partners supported 29,950 individuals to cope with returns, heatwaves, and floods.

In cooperation with local authorities, Welthungerhilfe and partners provided relief during heatwaves to 21,327 direct beneficiaries, utilizing their own funding resources.

Welthungerhilfe's project 'Localized Multi-hazard Anticipatory Action Facility,' funded by the GFFO, is establishing a localized coordination and operation mechanism to foster anticipatory actions, and thus prevent and mitigate loss and damages. In response to the mega-floods in 2022, WHH and partners were able to provide 68,804 individuals with cash assistance, NFIs, WASH and livelihood support.

Humanitarian Interventions

Protection

 | CARE INTERNATIONAL

CARE International Pakistan implemented the DEC Pakistan Floods Response 2022 to support vulnerable households affected by the floods. The response included the provision of emergency shelter, Non-Food Items (NFIs), hygiene kits/MHM

items, food baskets, and protection services. CARE International worked with a local implementing partner, Tardeep Rural Development Programme (TRDP), as part of the localization agenda to strengthen the capacities of local partners for future disaster preparedness and response. This intervention fell within CARE's Pakistan Emergency Preparedness Plan (EPP) and focused on lifesaving, early recovery, and rehabilitation phases. The main outcomes of the project were increased availability of essential resources such as food, shelter, water, sanitation, NFIs, and hygiene support for flood-affected people in Sindh. Additionally, specialized services including psychosocial support, health services, and gender-based violence (GBV) support were provided to flood-affected children and women. The project benefitted 46577 individuals through food, health, protection, tents, hygiene kit and NFI items.

International

| HELPAGE INTERNATIONAL

HelpAge International with the collaboration of Disaster Emergency Committee (DEC) in Pakistan implemented a project "Responding urgent needs of Flood affected vulnerable people including the older people's families and the families of differently abled persons in District Jhal Magsi, Balochistan, Pakistan," HelpAge International focused on

addressing the specific needs of the older people and the families of differently abled persons. They provided non-food items, cash grants, hygiene kits, and conducted awareness sessions on key hygiene practices. Additionally, they distributed assistive devices to enhance mobility and reduce dependency, enabling them to perform their daily activities.

After floods 2022 an RNA was conducted and 46% of differently abled persons reported that they still needed mobility aid and assistive devices. The provision of age and disability assistive products also supported the older people and the differently abled persons to access humanitarian assistance which reduced their protection related issues. HAI has provided appropriate assistive products such as wheelchairs, crutches, walking sticks, walking frames, elbow crutches/chairs, commode chairs, urine flacks etc to the older people and the differently abled persons and thus increased their independence and ensured their inclusion in emergency response efforts.

 International Medical Corps | IMC

The IMC's project Expanding MHPSS and Strengthening GBV Prevention and Response for Afghan Refugees in Khyber Pakhtunkhwa Province focused on increasing the utilization

of Gender-Based Violence (GBV) prevention and response services integrated with mental health and psychosocial support (MHPSS) among Afghan refugees in selected Refugee Villages. It aimed to achieve this through economic empowerment, fostering a supportive attitude within the community, and integrating MHPSS into primary healthcare and community-based mechanisms. IMC's "Capacity Building on Psychosocial Support and Youth Empowerment" initiative in Peshawar addressed the psychosocial needs of Afghan refugees and host communities by providing trainings, raising awareness through community mobilizers, and implementing small community-based projects. Additionally, IMC's project "Expanding MHPSS and Strengthening GBV Prevention and Response for Afghan Refugees in Khyber Pakhtunkhwa

Province" aimed to strengthen community-based mechanisms for GBV prevention, provide integrated MHPSS services at the primary healthcare level, and promote a supportive attitude among all community members for the protection of women and girls.

INTERNATIONAL RESCUE COMMITTEE

IRC implemented 9 projects in response to diverse humanitarian needs to reach 965,769 clients. The IRC with its partners implemented projects which aimed to prevent and address violence, abuse, exploitation, neglect, and harmful practices affecting at-risk children and caregivers. The project involved providing recreational and psycho-social kits, identifying, and referring individuals to child protection services, training local organizations,

© Relief International

and establishing safe spaces for women and girls. Moreover, IRC actively engaged with men and boys to ensure their safe and meaningful access to similar services. 172 safe spaces for women and children were established under these projects.

ISLAMIC RELIEF

IR provided gender-responsive assistance to flood-affected 34,221 community members in D.I. Khan and Tank, Khyber Pakhtunkhwa, by distributing dignity / MHM kits, establishing safe spaces, provision of psycho-social support, awareness raising activities, and conducting research on the climate impact.

© Right to Play

Islamic Relief targeted vulnerable households in D.I. Khan and Tank with WASH, food, livelihood support, and protection assistance, including water schemes, latrine systems, NFI kits, livestock, cash grants, safe spaces, psychosocial support, and GBV referral services.

Right to Play implemented the 'Children Emergency Fund - 2022 Flood Response' project. In response to the catastrophic floods in Pakistan, Right to Play intervened by mobilizing funds and launching an emergency response in the Districts of Sujawal and Kashmore. The focus of their relief efforts was on children, who were the most vulnerable in the flood-affected areas. The project aimed to provide protection and psychosocial support to the children who had been forced to leave their homes and seek shelter in relief camps. Along with that, hygiene kits were distributed to address the basic needs of the affected population, particularly women and girls.

Solidar's Child Protection & Education project aims to improve teachers' capacities, children's protection from abuse and violence, and communal support for children's well-being through access to quality education and effective protection mechanisms. The key project components include child well-being, learning and Child Protection. The project complements the efforts of the existing

© Solidar Suisse

Non-Formal Education (NFE) institutions being run by local organizations in the project locations. More than 3000 children in 19 schools/ALP centers are getting basic education. Over 100 teachers have been trained in teaching methodologies including multi-grade teaching, assessment methods and preparing low-cost materials for non-formal education centers. More than 1500 students & 35 teachers in 9 schools/ALP center have received Child Protection and Life Skills orientation. In all the project schools, and parent teachers' committees have been formed which are also working as a Communal Child Protection System. SOLIDAR works closely with relevant government departments and other civil society networks to ensure the smooth implementation of the project. SOLIDAR thanks Swiss Solidarity and Swiss Foundations for their donations.

© Terre Des Hommes'

I TERRE DES HOMMES'

Terre des Hommes' project Integrated Health, WASH and Child Protection to address the basic health, WASH, and child protection needs of 52,500 flood-affected individuals in Dera Ismail Khan, Khyber Pakhtunkhwa. Through the provision of integrated services, the project aims to support the recovery and resilience of the affected communities in the region. The project is based on identified needs priorities by Pakistan Floods Response Plan and updated needs assessment by SHED and Tdh in November 2022. The targeted villages are Adil Sipera and Bhirki, located in Tehsil Paroa, of District Dera Ismail Khan, Khyber Pakhtunkhwa, along with the surrounding areas.

Refugees and IDPs

ACTION AGAINST HUNGER

Integrated Humanitarian Support to Afghan Refugees and Host population in Pakistan, Quetta, Pishin & Qilla Saifullah (STA),” focused on the rehabilitation of healthcare facilities, WASH infrastructure, and energy supply. It also involved capacity building for project and government staff, assessment of healthcare facilities, repair and rehabilitation works, provision of medical supplies and equipment, and the development of BoQs and tender dockets for construction and rehabilitation.

CARE INTERNATIONAL

The goal of our three-year project is to improve the well-being of the most vulnerable Afghan refugees and host community children - especially girls and those with disabilities - through the provision of inclusive, equitable and sustainable quality education in a safe and accessible learning environment.

Marginalized Afghan refugees and host community children and adolescents are empowered through increased access to inclusive, equitable and quality education in Baluchistan and Khyber Pakhtunkhwa provinces.

CONCERN WORLDWIDE

Concern Worldwide implemented the project “Responding to Pakistan’s Internally Displaced (RAPID) III” with funding support from BHA. The project aimed to respond to medium and large-scale disasters in Pakistan while also focusing on capacity building of Disaster Management Authorities (DMAs) and NGOs in disaster preparedness, planning, and response. The integrated 2022 flood response was implemented in 16 districts of Sindh and Balochistan, with additional country-wide protection sub-grants specifically addressing the needs of the transgender community benefiting a total of 520,424 individuals with 27% female, 44% children and 2% transgender. The flood response prioritized life-saving humanitarian assistance in the sectors of shelter and settlement, water, sanitation, and hygiene (WASH), Multi-Purpose Cash Assistance (MPCA), and protection. Additionally, the project emphasized the capacity building of DMAs and local NGOs to enhance disaster preparedness, planning, and effective humanitarian response.

HELVETAS

HELVETAS implemented the project “Humanitarian Response to Address the Immediate Life Needs of Vulnerable Afghan Communities in Khyber

Pakhtunkhwa Khyber Pakhtunkhwa - Pakistan.” The project provided health, education, and protection services to Afghan refugees in six districts of Khyber Pakhtunkhwa, enhancing their resilience and addressing their immediate and chronic needs. Through a unique identification process and referral approach, vulnerable individuals were reached and provided with specialized services, assistive devices, and rehabilitation. The project also focused on strengthening public health facilities and enrolling Afghan children in non-formal and formal education programs. The outcomes included targeted enrollment, provision of learning materials, counseling, catch-up classes, teachers training, and the provision of necessary materials and equipment for education. It has an integrated approach in identifying non-school going children in all 3 components i.e., education, health, & protection.

HOPE'87

The project “Fighting the Impact of COVID-19 Pandemic in Pakistan (FICP)” implemented by HOPE'87 aimed to enhance the skills and competencies of young women and men, with a focus on Afghan refugees, to mitigate the negative effects of the pandemic. It was co-funded by the Federal

Ministry of Social Affairs, Health, Care and Consumer Protection, Austria. The project offered courses in various areas including digital technology, art, and crafts, tailoring and embroidery, 21st Century skills education, construction and renovation, marble mosaic, and biotechnology for medical labs. Key activities included mapping deserving participants, providing specialized skills training, conducting general training on Mental Health and Psychosocial Support, organizing team building and strategic time management techniques, offering incubation support along with the provision of shared space with fully equipped tools and establishing linkages with small and medium enterprises.

HOPE'87 also implemented the project "Access for Out of School Children to Education and Safe Schools in Pakistan (ACCESS)" The project aimed to expand access to education for over 188,610 children, including Afghan children, who were out of school or at risk of dropping out. It focused on improving learning outcomes, providing psychosocial support to teachers, strengthening school management committees, and enhancing capacity in public health emergency and disaster management. The project also had wider transformative impacts, such as raising community awareness on COVID-19 prevention, improving social and economic status, promoting female participation in governance, and preparing future female education leaders. The interventions included establishing community schools, teachers' training for quality education, provision of educational materials and infrastructure, social-emotional learning activities,

enrollment campaigns, and support for Afghan students through an education voucher scheme. The project aimed to improve primary school access, enrollment, retention, and the quality of primary education.

International Medical Corps (IMC) project "Building Resilience and Preparedness in Pakistan" was aimed at strengthening the resilience and preparedness of Afghan refugees living in Pakistan's Khyber Pakhtunkhwa province. This equipped them with the necessary resources to respond to disasters. The region frequently experiences floods, during monsoon season and landslides, and earthquakes in its mountainous areas. These disasters often lead to food shortages and disease outbreaks. Given the existing strain on healthcare facilities and weak systems in the country, Afghan refugees have limited resources to function as their own first responders. The project focused on providing the Afghan refugees with the support and tools they needed to enhance their resilience and preparedness in the face of such challenges.

The IMC's project Expanding MHPSS and Strengthening GBV Prevention and Response for Afghan Refugees in Khyber Pakhtunkhwa Province focused on increasing the utilization of Gender-Based Violence (GBV) prevention and response services integrated with mental health and psychosocial support (MHPSS) among Afghan refugees in selected Refugee Villages. It aimed

to achieve this through economic empowerment, fostering a supportive attitude within the community, and integrating MHPSS into primary healthcare and community-based mechanisms. IMC's "Capacity Building on Psychosocial Support and Youth Empowerment" initiative in Peshawar addressed the psychosocial needs of Afghan refugees and host communities by providing trainings, raising awareness through community mobilizers, and implementing small community-based projects. Additionally, IMC's project "Expanding MHPSS and Strengthening GBV Prevention and Response for Afghan Refugees in Khyber Pakhtunkhwa Province" aimed to strengthen community-based mechanisms for GBV prevention, provide integrated MHPSS services at the primary healthcare level, and promote a supportive attitude among all community members for the protection of women and girls.

INTERNATIONAL RESCUE COMMITTEE

The IRC's refugee programming in Pakistan aims to provide comprehensive support and assistance to refugees residing in the country. Its initiatives focus on addressing the immediate and long-term needs of refugees, including protection, shelter, healthcare, education, livelihood opportunities, and social integration. The IRC employs a rights-based approach, prioritizing the empowerment and self-reliance of refugees, while also collaborating with local authorities, partners, and communities to ensure sustainable solutions and strengthen the resilience of both refugees and

© HELVETAS

host communities. Its programs target vulnerable populations, including women, children, persons with disabilities, and marginalized groups, and will work towards fostering a safe, dignified, and inclusive environment for all refugees in Pakistan.

Mercy Corps conducted relief efforts in the Flood Emergency Balochistan (HLR) project. The project aimed to address the extensive damage caused by flash floods in various districts of Balochistan. The floods resulted in the partial and complete destruction of thousands of houses, loss of lives,

damage to infrastructure, and the displacement of people. Mercy Corps distributed food and non-food items to 660 vulnerable households, prioritizing those with the greatest need based on vulnerability criteria. They also conducted sessions on health, hygiene, and safe drinking water. The project was implemented in a safe and participatory manner, ensuring the satisfaction of the affected communities. The assistance provided by Mercy Corps helped address the immediate and critical needs of the affected households, particularly in terms of food security. The vulnerable communities in Pakistan affected by the monsoon rains were in dire need of support, as the winter season was on edge. Mercy Corps Pakistan kept the Afghan

Refugees parallel with the host communities when it came to provision of assistance. The organization provided 119 Winterization kits and solar kits to the Afghan Refugees in Quetta to save them from the harsh winter season. Under this project, Mercy Corps did dewatering in District Jacobabad, Sindh province.

| MDM

The HIP 2022 initiative was launched in June 2022 with the aim to continue to provide essential and lifesaving care and services to Afghan Refugees.

Five medical teams were assigned to 13 BHUs in six districts and provided curative and preventive services on a weekly rotational basis. During the project period 26664 consultations were provided to Afghan Refugees in 6 districts. 4394 women received antenatal care (ANC) consultations. Postnatal care consultations were provided to 1500 women. Counseling on family planning and healthy spacing was provided to 3420 women. 746 women opted for FP methods after the counseling. MDM provided emergency assistance in the Districts of Nowshera and Charsadda by establishing four (4) clinics for the flood affected population. The aim of this intervention was to ensure that vulnerable people, regardless of their status, had access to primary healthcare services.

A total of 18,489 OPD services were provided while 1,637 women received antenatal care (ANC) consultations. Counseling on healthy spacing was

host communities to recover from the impacts of flooding, restore their livelihoods, and reduce the adverse impacts of harmful coping mechanisms among households.

SOLIDAR supported over 11000 vulnerable refugees in the urban refugees' settlement of Peshawar through the provision of food and Non-food Items. The relief package was designed in accordance with the specific needs and requirements of the Afghan refugees and implemented with strict adherence to humanitarian principles including impartiality, transparency, accountability, neutrality, and non-discrimination.

To address the educational challenge of refugee children, 08 Non-Formal Education centers have been established within refugee communities in urban settlements in Peshawar. More than 360 children are enrolled in these NFE centers thereby receiving basic education. A significant portion of the enrolled children were working as rag pickers, fruit sellers, and polythene sellers. The project empowered eight women support groups by supporting them in implementing health and hygiene, GBV and child protection awareness raising sessions as well as linkage/referral activities within the respective communities. SOLIDAR works closely in cooperation with government authorities to implement the project. SOLIDAR commends Swiss Solidarity, AWO, and Volkshilfe/NiN for their

provided to 1,984 women out of which 402 women adopted different methods for health birth spacing. 7766 Nutrition screenings were conducted for children aged 6 to 59 months.

Relief International implemented two projects to prevent the primary and secondary impacts of the COVID-19 pandemic on off-camp Afghan refugees in Khyber Pakhtunkhwa, Pakistan. The projects aimed to address the immediate and secondary needs of Afghan refugees and host communities in the target

districts. The projects were aligned with RI's country COVID-19 response plan, Pakistan Humanitarian Response Plan (HRP), and UNHCR's country strategic plan. The projects had three objectives: protecting target communities from COVID-19, responding to the immediate impacts of COVID-19, and preparing youth for employment to respond to the long term economic impacts of COVID-19.

Relief International supports flood-affected communities in selected districts of Khyber Pakhtunkhwa, Pakistan. Its project aims to reach out to more than 40,000 Afghan refugees and

generous financial support. Moreover, another project improved basic education access for 1175 disadvantaged children, reducing their risk of child labour, abuse, and violence. The project also provided on-the-spot-support to teachers in improving teaching and learning methodologies. Moreover, it also sensitized members of disadvantaged communities – mostly parents – about child rights, particularly focusing on organizing communities to prevent the worst forms of child labour, violence, and abuse.

Save the Children | SAVE THE CHILDREN

Save the Children implemented the Afghan Refugee Crisis 2022 project which focused on addressing the specific needs of adolescent girls, both within and outside the camp, in Balochistan, as well as in host communities. Through safety audits and assessments using the SCI Tool, risks to girls and women were identified and mitigated, particularly concerning Gender-Based Violence, sexual exploitation and abuse, and other forms of harm. Based on the identified gaps and needs, the project included activities such as training government service providers, conducting awareness sessions, facilitating consultative sessions with adolescent girls, providing orientation to service providers, linking mothers and adolescent girls with SRH service providers, organizing nutrition awareness sessions, and conducting community-level sessions on existing services, including GBV and women and girls' protection units.

● Shelter and Non-Food Items (NFIs)

In the humanitarian sector, shelter, and Non-Food Items (NFIs) are crucial in addressing the immediate needs of individuals and communities affected by disasters, conflicts, or displacement. ACTED, ALIGHT, CARE International, CRS, CESVI, CONCERN Worldwide, Handicap International, Helpage International, HELVETAS, Human Appeal, Islamic Relief, KNK Japan, Malteser International, Mercy Corps, Muslim Aid, Muslim Hands, OXFAM, NCA, Right to Play, SIF, Save the Children and Tearfund provided temporary shelters, housing restoration, and essential items like hygiene kits and blankets to the flood affected communities.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Islamabad, Gilgit Baltistan

Humanitarian Interventions

Shelter & NFIs

 **ACTED** | ACTED

ACTED initiated two projects specifically dedicated to assisting flood-affected communities. The primary project had a dual focus: delivering crucial life-saving and early recovery support to vulnerable communities impacted by the floods throughout Pakistan. The assistance provided included Multi-Purpose Cash Assistance, access to clean water, sanitation facilities, hygiene provisions, shelter, and essential non-food items (NFIs). By swiftly addressing immediate needs and extending early recovery aid, ACTED aimed to stabilize affected households and reduce their dependency on continued humanitarian assistance. The overarching objective of the project was to empower

© ACTED

communities, enabling them to regain stability and initiate the process of rebuilding their lives in the aftermath of the devastating floods.

ALIGHT PAKISTAN

The first phase of Alight Pakistan's Flood Response Project 2022 aimed to provide relief support to flood-affected families in 21 districts across four provinces in Pakistan. The interventions included the establishment of temporary learning centers, rehabilitation of water channels, dewatering activity, provision of food, shelter, and non-food items, primary healthcare, safe mother and safe family project, health and hygiene sessions, and the provision of hygiene and dignity kits. The project focused on short-term response to address the immediate needs of flood-affected families and to restore and rebuild education and other sectors. Phase I of this project was completed on April 30, 2023. The next phase is focusing on health and nutrition in Sindh.

 **CARE INTERNATIONAL**

CARE International Pakistan implemented several projects to respond to various emergencies. One such project was the "Emergency Response for Flood-

Affected Population in Sindh-MOFA Luxembourg." CARE International Pakistan implemented a multi-sectoral intervention, addressing water, sanitation, and hygiene (WASH) needs, as well as providing shelter and non-food items (NFIs). The project provided temporary shelter kits (tarps), Non-Food Item (NFI) kits, and hygiene and menstrual hygiene kits to the 1480 households including 8880 individuals.

With the funds of Coca-Cola Foundation, CARE International Pakistan provided relief support to 1,000 affected families in District Jaffarabad. The support included the provision of tents/shelters, Non-Food Items (NFIs), and hygiene kits to meet the basic needs of the flood-affected people.

Under ERF project, CARE International provided hygiene, NFIs, and shelter kits to 800 flood-affected households.

Under HSF project, CARE International Pakistan provided relief items, including tents/shelters, NFIs, and hygiene kits to 2700 most vulnerable households impacted by the floods.

Catholic Relief Services (CRS) provided support to flood-affected households in Sindh and Baluchistan

provinces through its Emergency Relief and Early Recovery Response for Flood-Affected Households project. A total of 4,138 Multipurpose Cash Assistance (MPCA) beneficiaries were targeted who received PKR 14,500 each through Jazz (Mobile) cash transfer. The organization also provided emergency shelter kits, multipurpose cash assistance, and repair of basic infrastructure in selected villages of Jacobabad District, Sindh,

through its Emergency Shelter project. Another CRS project, 'Provision of Integrated Shelter & WASH Assistance to Vulnerable Population Affected by 2022 Pakistan Floods', provided cash grants for shelter construction to 1,130 households, NFIs for 2,800 households with multi-kits, and WASH assistance to 1,550 households with water and latrine repair/construction. The organization is also implementing Resilient Repair and Reconstruction of Housing for Flood-Affected Households project, in collaboration with SPHF, where 710 flood-affected households use cash assistance with build-back-better approach to repair and rebuild their homes. The project also captures and disseminates lessons learnt, best practices and approaches for building-back-better and Disaster Risk Reduction (DRR) to influence key actors (scaling entities) and decision-makers.

The Integrated Multi-Sectoral Humanitarian Assistance to Flood Affected Communities in Pakistan project was designed to support families affected by the 2022 floods in Naushero Feroze and Khairpur Mir's Districts in Sindh. This project was implemented by a consortium of four partners including CESVI, Welthungerhilfe, IMC, and HANDS. The project focused on providing multi-purpose cash assistance, emergency and transitional shelter, clean water, sanitation facilities, and hygiene promotion, health vouchers, and training on mental health and psychosocial support.

Concern Worldwide has been at the forefront in providing urgent humanitarian assistance to flood-affected populations in Pakistan by reaching 723,856 individuals with integrated support. Concern has implemented the flood response projects in 17 different districts in Punjab, Sindh, and Baluchistan provinces of Pakistan with the funding support from multiple donors such as Concern CEO funds, FCDO, BHA, DEC, and Irish Aid. The flood response activities included the provision of Multipurpose Cash Assistance (MPCA) in line with MEB, NFIs and hygiene & MHM kits. The beneficiaries were selected based on vulnerability criteria, including female-headed households, orphans, older individuals, people with disabilities, and large families with no income source. Concern's initiative-taking approach ensured that those in urgent need of assistance received it promptly. Concern's strategic approach ensured that the most vulnerable communities were reached, and their needs were addressed. By providing these households with essential support, Concern aims to improve their livelihoods and help them recover from the devastating effects of the floods.

| HANDICAP INTERNATIONAL

HANDICAP International responded to the urgent needs of the flood-affected people in the Nowshera and Charsadda areas through its Flood Relief project. Recognizing the devastating impact of the floods, the organization implemented key

interventions to provide essential support to the affected population. One significant aspect of the project was the provision of food assistance. HANDICAP International ensured that vulnerable individuals and families had access to nutritious meals during this challenging time. By collaborating with local partners and leveraging its expertise in humanitarian aid, the organization distributed food items to help alleviate hunger and ensure the well-being of the flood-affected communities. In addition to food support, HANDICAP International also focused on the distribution of NFIs to address the immediate needs of the affected population. NFIs, such as essential household supplies, hygiene kits, and shelter materials, were provided to individuals and families who had lost their homes or belongings in the floods.

HELPAGE INTERNATIONAL

HelpAge International, in collaboration with Welthungerhilfe Pakistan, implemented a project in District Jhal Magsi, Balochistan Province to provide life-saving support to the most vulnerable households affected by the floods. Through the German Federal Foreign Office (GFFO) funded program “Localized Multi-Hazard Anticipatory Action Facility Pakistan,” the project addressed the immediate needs of the flood-affected communities. The project included cash disbursement among 600 households, ensuring that the most vulnerable families had access to financial resources to meet their urgent needs. Additionally, winterization kits

were distributed among 400 households, providing essential items to help them cope with the harsh weather conditions in the wake of the floods.

Through another initiative, HelpAge International responded to the immediate lifesaving needs of older people and their families in flood-affected areas of Shikarpur and Jacobabad Districts in Sindh, Pakistan. With a focus on the well-being of older individuals, HelpAge International leveraged its established network of 107 older people associations in these districts to provide crucial support.

HELNETAS

FER addressed immediate life-saving humanitarian needs of the most affected populations in

various districts of Balochistan, Sindh, Khyber Pakhtunkhwa, GB, and Punjab. In Food Security and Livelihoods (FSL), activities included the distribution of dry ration/food, wheat seeds, agriculture tools and vaccination to the livestock. In the WASH sector, the activities involved were installation of water filtration units, water trucking, construction of latrines & bathrooms in transitional shelters, and the distribution of WASH NFIs. Shelter/NFI support included provision of NFIs, winterization kits, transitional shelters, & shelter kits for repair whereas health sector activities included the provision of medicines to healthcare facilities and medical camps.

The Early Recovery Support project, is focusing on restoring safety and dignity for flood-affected people through Shelter and NFI interventions. The

project aims to improve the WASH situation to prevent the outbreak of communicable diseases among the affected population in Sindh & Khyber Pakhtunkhwa.

HUMAN APPEAL

In 2022, Human Appeal implemented several projects to provide humanitarian assistance to flood-affected communities, support orphan families, and provide winter support to marginalized

families. Through its project 'Distribution of Food Packs & NFIs (Mosquito Nets + MHM Kits) in flood-affected communities of Pakistan, Human Appeal responded to the devastating impact of the floods in Pakistan, particularly in the Provinces of Baluchistan, Khyber Pakhtunkhwa, and Sindh, and provided essential assistance to the hardest-hit districts. Food packs, female hygiene (MHM) kits, and mosquito nets were distributed to 13,650 flood victims over the course of a month.

Human Appeal Pakistan also provided winter kits, including clothing and warm bedding, as well as

food packs to the poorest families. A total of 1,365 winter kits and food packs were distributed among the poorest families, particularly those with limited resources and orphaned children. In total, 46,526 people were reached under this project in 2022.

ISLAMIC RELIEF

Islamic Relief provided 8,721 Shelter/NFI Kits and permanent shelters to the people who lost their homes in Balochistan, Sindh, and Khyber Pakhtunkhwa. The Shelter/

NFI kits included family tents, solar lights and other essential items that are crucial for meeting immediate needs. As a result, 67,432 people now have access to temporary/permanent shelters and meet the most essential needs of their families.

| KNK JAPAN

The Shelter Assistance and Hygiene Promotion for Flood Victims in Sindh and Balochistan project, implemented by KnK Japan and partner organizations, provided aid to flood victims in Jacobabad, Sindh, and Jaffarabad and Sohbatpur, Balochistan. The project distributed temporary shelters and daily necessities to 370 households, benefiting a total of 2,405 people. Shared latrines were installed, and tool kits and mosquito nets were distributed to the affected communities. The project also conducted training on shelter installation, thus promoting self-sufficiency and community resilience.

Significant outcomes were achieved, including an 81% improvement in living conditions and hygiene environment. The project also successfully reduced public health-related illnesses by 54.2%, such as diarrhea and infections. Furthermore, 83% of the beneficiaries were appreciative that the project had effectively protected the local public health. In the upcoming phase, the project will continue its efforts by constructing 240 shelters, including family tents, transitional shelters, and house repairs, in Jacobabad, Qambar Shahdadkot, Sohbatpur, Jaffarabad, and Usta Muhammad Districts in Sindh

© Malteser International

and Balochistan. Additionally, the project aims to enhance the quality of drinking water for the flood victims.

Malteser International implemented a multisectoral emergency project to provide immediate assistance

to the flood-affected communities in Sanghar and Mirpur Khas districts in Sindh province. To address the urgent needs of the affected population, the following activities were conducted. Firstly, 300 unconditional grants were provided, each amounting to PKR 32,000. Additionally, 200 Hygiene Kits, 400 mosquito nets, 200 Tarpaulin Sheets, and 200 food packages were distributed to the affected households. Furthermore, 300 Jerry

cans were distributed to ensure access to clean water. To address the health needs of the affected communities, 60 medical camps were arranged, reaching a total of 8,439 people. Moreover, health and hygiene sessions were conducted with various groups, including women, men, Persons with Disabilities (PWDs), girls, and boys, to promote awareness and proper practices.

Mercy Corps conducted relief efforts in the Flood

Emergency Balochistan (HLR) project. The project aimed to address the extensive damage caused by flash floods in various districts of Balochistan. The floods resulted in the partial and complete destruction of thousands of houses, loss of lives, damage to infrastructure, and the displacement of people. Mercy Corps distributed food and non-food items to 660 vulnerable households, prioritizing those with the greatest need based on vulnerability criteria. They also conducted sessions on health, hygiene, and safe drinking water. The project was implemented in a safe and participatory

manner, ensuring the satisfaction of the affected communities. The assistance provided by Mercy Corps helped address the immediate and critical needs of the affected households, particularly in terms of food security. The vulnerable communities in Pakistan affected by the monsoon rains were in dire need of support, as the winter season was on edge. Mercy Corps Pakistan kept the Afghan Refugees parallel with the host communities when it came to provision of assistance. The organization provided 119 Winterization kits and solar kits to the Afghan Refugees in Quetta to save them from the harsh winter season. Under this project, Mercy Corps did dewatering in District Jacobabad, Sindh province.

Muslim Aid implemented projects to improve the living conditions of 3,050 families in the flood affected areas of Quetta, Pishin, and Qila Saifullah. The projects focused on providing safe shelter, non-food items, cash transfers, and access to clean drinking water. These interventions aimed to enhance resilience, protect the affected communities, and improve their overall living conditions.

Muslim Aid played a crucial role in responding to multiple emergencies in Pakistan during 2022, implementing projects across the country. In the earthquake-affected areas of Harani, Balochistan, Muslim Aid Pakistan constructed one-room shelters for 100 families. Furthermore, support in the form of shelter and Non-Food Items (NFIs) was provided

© Norwegian Church Aid

to flood-affected families in Gwadar, Balochistan, as well as the communities of Quetta, Pishin, and Killa Saifullah. This support included shelter kits, food, non-food items, and multipurpose cash grants. In total, Muslim Aid's interventions reached and supported 72,425 individuals in Sindh and Balochistan during the 2022 emergencies. Muslim Aid's efforts aimed to alleviate the sufferings of affected communities and provide them with essential support for their recovery and well-being.

| MUSLIM HANDS

Muslim Hands reached 32480 people in 10 UCs of District Sohbatpur through the distribution of emergency shelter kits, bedding kits & H&H/Dignity kits. Along with this, awareness sessions on Health

Hygiene & Nutrition were also conducted with 50% participation of females.

MH overall helped 32382 people through winter emergency response in AJ&K (Bagh, Rawalakot, Leepa), Khyber Pakhtunkhwa- (Swat, Madyan, Kanju & Balakot), and Balochistan (Killa Saifullah, Ziarat, Mastung, Quetta). The organization distributed winter kits and food packs to those in need.

| OXFAM

During the 2022 Floods, Oxfam immediately responded to the urgent needs of flood-affected communities in Dadu, Sanghar, Qamber Shahdadkot, and Mirpur Khas (Sindh), as well as Jafarabad and Naseerabad (Balochistan). Oxfam collaborated with lead partners, Strengthening Participatory

Organization, Tameer-e-Khalaq Foundation, and Laar Humanitarian and Development Programme. In the initial phase (September 2022 to February 2023), Oxfam prioritized providing WASH/hygiene kits, dignity kits, winterization kits, multipurpose cash assistance, and protection mainstreaming. Oxfam reached a total of 375,277 households, distributing 24,400 shelter kits, 12,200 jerry buckets, 12,200 hygiene kits, 12,200 dignity kits, and 24,400 mosquito nets. Additionally, Oxfam established 10 safe spaces and provided PKR 101,200,000 as multipurpose cash assistance. Other items distributed included 5,500 kitchen sets, 720 aqua water kits, and 16,371 winterization kits. The second phase of recovery (February 2023 to December 2023) focuses on Food Economic and Security (FES), WASH, and Social Protection, expanding support to include Khairpur and Sohbatpur.

| NORWEGIAN CHURCH AID

NCA, in collaboration with RDF, implemented projects to provide emergency assistance and early recovery support to flood-affected communities in Sindh and Baluchistan provinces, Pakistan. The first project "Emergency & Early Recovery Assistance in Water, Sanitation and Hygiene (WASH) to Flood Affected people of Dadu Sindh Province, Pakistan" focused on Dadu District in Sindh province, distributing shelter kits, hygiene kits, and jerry cans for six months. Rehabilitation of water supply schemes, pit latrine installation, debris removal campaigns, and MHM awareness sessions were conducted.

The second project, named “Emergency Assistance to 9,800 Flood Affected Individuals of Sindh & Baluchistan Provinces, Pakistan,” targeted Dadu District in Sindh and Lasbela District in Baluchistan. With a duration of three months, the project focused on providing emergency shelter kits, hygiene kits, mosquito nets, and jerry cans to the affected individuals.

The third project, “Emergency WASH Assistance to Flood Affected People of Sindh Province, Pakistan,” targeted Badin and Mirpur Khas Districts in Sindh province. Over a period of six months, NCA and RDF implemented various activities to support the affected communities. These included the provision of semi-permanent shelters, basic emergency shelter and winterization kits, installation of pit latrines, water trucking, distribution of jerry cans, hygiene kits, and kitchen sets.

Right to Play implemented the ‘Children Emergency Fund - 2022 Flood Response’ project. In response to the catastrophic floods in Pakistan, Right to Play intervened by mobilizing funds and launching an emergency response in the Districts of Sujawal and Kashmore. The focus of their relief efforts was on children, who were the most vulnerable in the flood-affected areas. The project aimed to provide protection and psychosocial support to children

who had been forced to leave their homes and seek shelter in relief camps. Along with that, hygiene kits were distributed to address the basic needs of the affected population, particularly women and girls.

SIF also distributed shelter kits and provided training to more than 400 households whose houses had partially been damaged in the 2022 devastating floods. Currently SIF, with the support of its partners and experts, is in the process of improving the design of overall shelter support to make it more resilient to floods and other disasters.

HUM Fund-Pakistan Flood Response 2022 supported flood-affected communities in Sindh, Khyber Pakhtunkhwa Khyber Pakhtunkhwa, and Balochistan. The project addressed various needs, including food, education, shelter and NFIs of the affected communities along with providing basic primary health services /interventions.

Both the projects aimed to provide emergency relief assistance to the flood-affected vulnerable communities in selected districts of Sindh and Khyber Pakhtunkhwa. They were provided with food, non-food assistance (hygiene kits, shelter kits, household kits), and multi-purpose cash

assistance. Temporary Learning Centers (TLC) and Child-Friendly Spaces were established to continue education and provide a child-friendly environment. The projects also provided basic primary health assistance to the affected people through BHU and Mobile Health Units. Safe and clean drinking water was made available to the selected communities. Moreover, efforts were made to strengthen the psychosocial well-being of the community by promoting positive coping mechanisms, resilience to shocks and protection against risks.

Tearfund responded to a devastating fire in Dadu village, Sindh. The Emergency Response and Relief Distribution project provided immediate aid to the affected families, including food packages, kitchenware, blankets, bedding, and materials for pit latrines and fuel efficiency. The Relief and Recovery - Sindh project focused on recovery and rehabilitation. It distributed materials for rebuilding houses, kitchenware, blankets, bedding, pit latrines, and fuel-efficient items to 16 affected communities. This improved their living conditions and well-being, enabling successful home rebuilding. Tearfund also conducted 16 training sessions on disaster risk reduction, community-led sanitation, and fuel-efficient stove usage. These activities empowered communities, by enhancing their disaster response, promoting better sanitation practices, and improving fuel consumption practices.

● WASH

In 2022, as a result of the floods, access to clean water, proper sanitation facilities, and good hygiene practices remained crucial for the survival, health, and dignity of individuals. During emergencies, the heightened risks of waterborne diseases, inadequate sanitation, and poor hygiene posed significant challenges. Organizations such as ACTED, ACF, CARE International, CESVI, CONCERN WorldWide, CRS, IMC, IRC, Islamic Relief, KNK Japan, Mercy Corps, Muslim Aid, NCA, Save the Children, SIF, Tearfund and WaterAid, actively provided WASH services to the flood-affected communities, ensuring their immediate needs were met and promoting better health outcomes.

6 CLEAN WATER AND SANITATION

Humanitarian Interventions

WASH

 **ACTED** | **ACTED**

Following the devastating heavy rains and subsequent flooding in August 2020, a collaborative effort led by the Natural Disasters Consortium, consisting of IOM, ACTED, CONCERN Worldwide, and HANDS, was launched to address the urgent needs of affected vulnerable communities. The Consortium implemented a comprehensive response that encompassed Shelter, Water, Sanitation, and Hygiene (WASH), and Food Security and Livelihoods (FSL) assistance. Clean drinking water was provided, water supply systems were rehabilitated and restored,

hygiene kits were distributed, and stagnant water was de-watered to mitigate health risks. Furthermore, the Consortium offered food assistance, utilizing both in-kind and cash-based modalities, and provided shelter repair kits and roofing materials to support the recovery of damaged dwellings. This concerted effort aimed to alleviate the sufferings of those affected and facilitate their journey towards recovery and resilience.

ACTION AGAINST HUNGER

Action Against Hunger implemented

two projects in Pakistan. The first project, “Emergency assistance to the disaster-affected communities of districts Jaffarabad, Sohbatpur, Killa Saifullah, Balochistan,” aimed to provide support to the flood-affected areas. The project included the construction and rehabilitation of water systems and sanitation facilities, distribution of hygiene kits, provision of health care services, undernutrition prevention and treatment, awareness sessions on sexual and reproductive health, and cash grants.

The second project, “Integrated Humanitarian Support to Afghan Refugees and Host population in Pakistan, Quetta, Pishin & Qilla Saifullah (STA),” focused on the rehabilitation of healthcare facilities, WASH infrastructure, and energy supply. It also involved capacity building for project and government staff, assessment of healthcare facilities, repair and rehabilitation works, provision of medical supplies and equipment, and the development of BoQs and tender docket for construction and rehabilitation.

 **CARE** | **CARE INTERNATIONAL**

CARE International Pakistan implemented the Emergency Response for flood-affected population in Sindh (ERF) project. By implementing the ERF project in Sukkur District, it aimed to make a significant impact on the lives of the flood-affected

population. The project provided essential support to address immediate needs, ensuring that vulnerable individuals received lifesaving assistance. The ERF project included the provision of essential support to 800 affected households. One key component was the provision of food baskets to extremely vulnerable individuals and affected households. Additionally, the project included the distribution of hygiene kits and Menstrual Hygiene Management (MHM) kits to women and girls.

Through the provision of food baskets and hygiene kits, CARE International Pakistan contributed to the well-being and dignity of the affected

households. The project played a crucial role in the emergency response efforts, demonstrating CARE's commitment to supporting communities in times of crisis.

CESVI implemented a comprehensive multi-sectoral project in four districts of Pakistan to provide emergency relief and early recovery support to vulnerable flood-affected communities. The project targeted 24,000 households and focused on Multi-Purpose Cash Assistance, WASH, Shelter, and Livelihoods. The principal objective of the project was to reduce the impact of floods and strengthen the rehabilitation capacities of flood-affected communities in intervention districts in Pakistan. The project achieved four key results at the outcome level. Firstly, target households in selected districts had access to Multi-purpose Cash Assistance for emergency response. Secondly, the flood-affected communities in selected districts had access to immediate life-saving WASH assistance, including clean water, sanitation facilities, and hygiene promotion activities. Thirdly, vulnerable flood-affected households had access to appropriate, basic, safe, and dignified shelter in accordance with local practices. Lastly, the flood-affected communities in selected districts had access to immediate resources to protect and rebuild their livelihood assets. This involved livelihood support and assistance to help communities recover and rebuild their economic activities.

CONCERN Worldwide implemented multiple projects with a focus on the WASH sector in responding to the 2022 flood emergency with the funding support of FCDO, DEC, Irish Aid and BHA, benefiting more than seven hundred thousand people. The activities included the provision of hygiene & MHM kits accompanied by hygiene promotion via community awareness sessions and mass media awareness. Concern has launched a climate resilient WASH project with the support of FCDO to provide clean, safe, and resilient water supply and sanitation services to communities affected by the 2022 floods. The key interventions of the project included the repair, rehabilitation, and reconstruction of hand pumps, boreholes, and gravity-fed sources, solarization of critical water supply infrastructures in schools and health facilities and construction/rehabilitation of climate resilient demonstration latrines in communities and health facilities and schools. The project also included awareness raising through provision of hygiene kits, accompanied by awareness sessions and mass media campaigns.

Catholic Relief Services implemented two projects to provide emergency assistance in Sindh and Baluchistan provinces. The first project aimed to provide lifesaving emergency assistance to 195,000 flood-affected individuals in four districts by providing Multi-Purpose Cash Assistance (MPCA)

and WASH support to vulnerable households. The second project aimed to restore vital community infrastructure such as water supplies, access ways, and irrigation channels in five Union Councils (UCs) of Sharingal and Kalkot Tehsils of Dir Upper.

IMC implemented an integrated multi-sectoral humanitarian assistance project to support flood-affected communities. The project aimed to provide immediate and life-saving assistance to the most vulnerable households through a range of interventions. Multi-purpose cash grants, cash-for-work programs, and transport vouchers were provided to the affected households, enabling them to meet their essential needs and access health services and shelter. This emergency response approach aimed to alleviate the immediate hardships faced by the flood-affected communities. The project also focused on ensuring access to life-saving water, sanitation, and hygiene (WASH) services. Additionally, the project prioritized the

provision of quality care for Gender-Based Violence (GBV) survivors and comprehensive mental health and psychosocial support (MHPSS) services, following the global IASC guidelines for MHPSS in humanitarian emergency settings.

| INTERNATIONAL RESCUE COMMITTEE

IRC implemented three projects in Sohbatpur, Jaffarabad, Naseerabad, Chaman and Killa Abdullah Districts in Balochistan, Badin, Sanghar and Dadu Districts in Sindh, Rajanpur District in Punjab and DI Khan District in Khyber Pakhtunkhwa to provide life-saving assistance to flood-affected communities. Under the WASH component, access to safe and reliable drinking water, basic sanitation, and positive hygiene practices were promoted through the provision of Latrine kits, Hand pumps, dignity kits, and hygiene awareness sessions. These projects aimed to meet immediate needs and ensure the well-being of affected communities and vulnerable populations. These projects benefited 51,180 clients. To date, 58 water supply schemes have been installed/rehabilitated in the targeted districts.

| ISLAMIC RELIEF

Islamic Relief believes in providing water for life, whether it is delivering water through trucking during emergencies or digging boreholes and providing hand pumps in rural areas or introducing alternative energy to power water

systems.

Islamic relief is conducting WASH based sessions with 341,221 flood affected communities and building makeshift latrines for the people to keep their children and families safe in the time when the risk of being infected is huge. Due to no clean drinking water, and food for their daily needs, people are on the verge of another great disaster. The organization provided 48000 liter clean drinking water on daily basis and also extended help to the communities restore their normal lives. IR collaborated closely with the communities to improve sanitation and hygiene / MHM practices, leading to better health and fewer water related illnesses. With these climate friendly approaches, we provided clean drinking water to over a million people at their doorsteps.

| KNK JAPAN

The Khyber Pakhtunkhwa quality education projects successfully constructed toilets in GGSS Havelian, GGSS Shamdara, and GGSS Mera Mada Khel, resulting in an 85% increase in enrollment and a significant reduction in average dropout rates from 36.5% to 2.69%. In the upcoming KPN-III phase, toilets will be constructed in GGSS Thakot, GGSS Oghi, and GGMS Banna Allai. Under the Pakistan Floods 2022 Emergency Response Program, the Shelter Assistance and Hygiene Promotion for Flood Victims in Sindh and Balochistan project installed three ultrafiltration plants in Jacobabad, Jaffarabad,

Farmers Development Organi

() District Dadu-Sindh

and Sohbatpur Districts. The project installed 48 latrines, conducted 51 hygiene awareness sessions, and distributed 370 hygiene kits. Key achievements include an 81% improvement in living environment and hygiene, a 54.2% reduction in households experiencing health issues, and 83% reporting the protection of local public health. Additionally, 98% of the beneficiaries mentioned three ways to prevent WASH-related diseases, and 68% took appropriate preventive measures against infectious diseases. The next project aims to construct 34 latrines and install 11 ultrafiltration plants and 2 reverse osmosis (RO) plants in Jacobabad, Qambar Shahdadkot, Sohbatpur, Utsa Muhammad, and Jaffarabad Districts. Water management committees will be established, and hygiene awareness sessions will continue.

In response to monsoon rainfall and subsequent floods, Mercy Corps initiated a 12-month relief program to support affected and vulnerable communities in the Qambar Shadad Kot and Jacobabad Districts in Sindh. In the first phase of the project, aid was provided to the most vulnerable communities, including clean water, non-food items, food support, and hygiene promotion sessions. The second phase of the project was focused on recovery interventions, specifically targeting the individuals having no access to clean water and the farmers whose irrigation channels had been damaged or destroyed. Mercy Corps ensured clean

drinking water through water trucking in phase 1 and implemented long-term water and irrigation solutions during the recovery intervention. In another project in Baluchistan province, specifically in the Districts of Jaffarabad and Sohbatpur, Mercy Corps Pakistan responded to the WASH-related needs of flood-affected communities. The project included the distribution of non-food item kits, provision of clean water through water trucking, and the conduct of health and hygiene sessions to

prevent outbreak of diseases. Mercy Corps also conducted dewatering activities using heavy-duty pumps in communities and government offices to address the floodwater situation. The interventions aimed to ensure the safety and well-being of the affected communities and provide them with the necessary support to recover from the disaster.

Muslim Aid provided water purification units and hygiene items to 1,070 flood-affected families in Sindh and Balochistan. The organization distributed kits containing essentials like filters, buckets, soaps, and toothbrushes. An orientation session ensured proper usage. The project promoted access to clean water and hygiene practices, thus improving the well-being of the affected families.

The project titled "Emergency Water Sanitation and Hygiene (WASH) and Shelter Assistance to Flood Affected People of District Swat, Khyber-Pakhtunkhwa, Pakistan" was implemented by NCA in partnership with LASOONA in Swat District, Khyber-Pakhtunkhwa Province. The key interventions included the distribution of basic shelter and winterization kits, non-food items such as hygiene kits and jerry cans, rehabilitation of water supply schemes, installation of PIT latrines, debris removal campaigns, and the distribution of MHM (Menstrual Hygiene Management) kits along

with awareness sessions.

In another project, NCA collaborated with local partners, including Pak Mission Society (PMS) in Rajanpur, Research, and Development Foundation (RDF) in District Sanghar and Mirpur Khas, and Peace and Development organization (PADO) in Nowshera and Charsadda Districts. The interventions involved the distribution of basic shelter kits and non-food items such as hygiene kits, jerry cans, and mosquito nets, rehabilitation of water facilities, water trucking, installation of water treatment units and provision of MHM kits along with awareness sessions for women and girls. Vector-borne disease control sprays campaigns, and debris removal campaigns were also conducted as part of the project.

Save the Children | SAVE THE CHILDREN

The Pakistan Unilever FCD0 HBCC 2022 project aimed to strengthen the capacity of children, caregivers, and communities to minimize and prevent COVID-19 transmission and reduce stigmatization. The project enhanced access to personal hygiene materials, strengthened the capacity of local authorities and institutions to deliver effective HWWS programming and supported safe and enabling environments at schools and in communities to reduce COVID-19 risk and build resilience for future outbreaks. Through its mass media and digital social behavior change campaigning on hygiene practices and COVID-19 vaccine uptake, as well as interpersonal

communication and WASH infrastructure, Save the Children successfully promoted COVID-19 prevention practices and improved the hygiene conditions of communities and schools.

SIF | SIF

SIF, with the support of The Crisis and Support Center (CDCS), provided hygiene kits in Balochistan province to ensure appropriate hygiene practices in flood-affected population.

In addition, water sources and water supply schemes were also rehabilitated for more than 4000 households.

Tearfund | TEARFUND

The Community Recovery & Restoration Project undertaken by Tearfund had a specific focus on supporting the most vulnerable groups severely impacted by the floods. This included widows, women-headed households, elderly individuals, and families who had lost their homes. To address their immediate needs, the project provided essential resources such as shelter materials and items related to water, sanitation, and hygiene (WASH), as well as livestock support. In addition to the provision of crucial supplies, the project also conducted workshops and training sessions on disaster risk reduction. These sessions were attended by the project staff, village committee members, and self-help groups, aiming to enhance

their preparedness and resilience in the face of future disasters. The project also prioritized health and medical assistance, including livestock vaccination, to ensure the well-being of both human and animal populations. Tearfund's project successfully addressed the urgent needs of vulnerable communities and helped them recover from the devastating effects of the floods.

WaterAid | WATERAID

In response to the 2022 devastating floods, WaterAid Pakistan (WAP) demonstrated a prompt and efficient response by collaborating with implementing partners to provide immediate assistance.

Recognizing the urgency of the situation, WAP worked closely with its partners to reach the flood-affected regions of Rajanpur (Punjab), Badin, Dadu, Jamshoro (Sindh), and Swat Khyber Pakhtunkhwa. The organization established emergency water and sanitation facilities in flood-affected areas, addressing the urgent needs of communities.

Throughout their efforts, WAP achieved significant milestones. It provided clean drinking water to over 63,058 individuals through water trucking and restoration of 19 water supply schemes. Additionally, 17,322 people gained access to sanitation facilities designed for the specific needs of women and girls. The distribution of 9,240 hygiene kits, including menstrual

hygiene products, brought comfort to numerous households. The hygiene awareness campaigns reached thousands of individuals, equipping them with essential knowledge for maintaining good hygiene practices. Through their comprehensive efforts, WAP and their partners contributed to the long-term well-being of communities, laying the foundation for a brighter future.

Development Interventions

The development sector in Pakistan, supported by PHF member organizations, has made a significant impact through their interventions. With a total financial contribution of over 60 million USD, 104 projects were successfully completed across all provinces and 138 districts of Pakistan. These interventions, including agricultural food security and livelihood, climate change mitigation, disaster risk management, economic development, education, governance, health, nutrition, protection, social cohesion, technical and vocational education and training, WASH, and women empowerment, have transformed lives, enhanced community well-being, and driven sustainable development in Balochistan, Punjab, Khyber Pakhtunkhwa, Sindh, Islamabad, AJ&K and Gilgit Baltistan. These initiatives have uplifted individuals and communities, paving the way for a brighter and more prosperous future for Pakistan.

● Agriculture, Food Security & Livelihood

During 2022, INGOs such as CARE International, Human Appeal, Islamic Relief, Muslim Aid, Muslim Hands, SIF, and WHH actively supported Pakistan's AFSL sector. Through collaboration, they delivered technical expertise, capacity building, and financial aid to implement effective programs. These initiatives focused on promoting sustainable agriculture, ensuring food security, and creating inclusive livelihood opportunities, ultimately enhancing community well-being and resilience.

GEOGRAPHICAL OUTREACH: Khyber Pakhtunkhwa, AJ&K, Balochistan, Sindh, Punjab

Development Interventions

Agriculture, Food Security & Livelihood

CARE International Pakistan's WAQAR project is a 2.5-year initiative (April 2022 - Oct 2024). The project aims to empower displaced populations in Afghanistan and Pakistan by providing them with livelihood opportunities and integrated basic services. The project targets urban Kabul, rural Khost province (Afghanistan), and rural Khyber Pakhtunkhwa and Balochistan provinces (Pakistan). With a focus on addressing the challenges faced by

refugees and Internally Displaced Persons (IDPs) due to insecurity, insurgency, and natural disasters, the project aims to enhance their resilience and socio-economic development. It employs various key interventions including livestock support, provision of animal fodder, promotion of kitchen gardening, initiatives related to WASH and sanitation, and improved access to healthcare services. By addressing issues such as food insecurity, poverty, and limited access to basic facilities, the project seeks to improve the well-being and opportunities

© CARE International

© Human Appeal

of displaced populations, with special attention given to the vulnerabilities of females.

HUMAN APPEAL

Under its 'Integrated Water, Health, Food Security & Livelihood Project for Tharparkar,' Human Appeal not only provided access to clean water and sanitation facilities, but also extended technical support and resources for climate-smart agriculture. This included distributing seeds, agricultural tools, and conducting on-farm trainings to promote sustainable farming practices. Livestock farmers received support through deworming, vaccinations, and advanced livestock farming techniques, protecting their livestock from diseases, and improving productivity.

To uplift the most vulnerable households, such

as widows, orphans, differently abled persons, and elderly-headed households, Human Appeal distributed pairs of milking goats. Additionally, solar streetlights were installed to enhance visibility at night, thus contributing to the safety and security of the villagers.

In its special request project, Human Appeal provided chicken farms, apiculture training and sewing machines to the most vulnerable individuals in various areas across Pakistan. In total, 11,836 people were reached through agriculture, food security and livelihood projects in 2022.

| ISLAMIC RELIEF

Islamic Relief (IR) believes in promoting integrated development and environmental custodianship with a focus on fostering sustainable livelihoods. 231,223 communities have successfully diversified their livelihood assets, leading to enhanced household food security and increased income in Khyber Pakhtunkhwa, Sindh, Balochistan and AJ&K. In addition to financial support, we also provide start-up grants and vocational and enterprise development training. Livestock services and women's empowerment in poultry management were promoted. Our aim is to empower women

economically and support self-employment opportunities for youth. In Punjab, Islamic Relief has provided microfinance services to almost 12,310 people, many of whom would otherwise be unable to access life-changing finance. We offer interest free loans called Qarz-e-Hassana as well as business investments called Modaraba to support the small entrepreneurs.

| MUSLIM AID

Muslim Aid Pakistan provided support to 40 Village Organizations by facilitating the formation of committees. In the integrated LVH project, 80 women were identified and trained in kitchen gardening. Additionally, under a package, two goats were provided to each of the 100 households. In Killa Saifullah, Balochistan, 40 health and hygiene sessions were conducted across 40 villages. The project also included kitchen gardening training and the distribution of Food Security and Livelihood (FSL) tool kits. These initiatives aimed to enhance community empowerment, improve food security, and promote sustainable livelihoods in the target areas. Muslim Aid Pakistan's interventions played a crucial role in supporting the local communities and enhancing their capacity for self-sufficiency.

| MUSLIM HANDS

MH supported 76913 people across the country in 2022. Through Technical and Vocational Training centers located in 05 districts,

MH provided technical & vocational training to over 2,383 underprivileged youth across Pakistan and AJ&K in 2022. This project specifically benefitted widow mothers of our students studying at the Muslim Hands Educational Complex, Wazirabad, leading to a multi-dimensional development. To empower and enhance the capacity of women, 140 sewing machines & kits were also distributed among needy, widows and underprivileged women. MH provided 74 bicycles to underprivileged students across Pakistan who face difficulty in daily transportation due to high fuel prices.

Muslim Hands, in its esteemed collaboration with Schneider Electric France, has embarked upon the transformative “Access to Energy” project. This visionary undertaking sets out to ameliorate the availability of life skill opportunities for underprivileged youth with a special focus on

girls in the Provinces of Sindh and Baluchistan in Pakistan. To effectively execute the project, Muslim Hands has successfully formalized a partnership with Technical Education and Vocational Training Authority (TEVTA) both in Sindh and Baluchistan. This collaboration has paved the way for the upgradation of 40 labs, with 25 located in Sindh and 15 in Balochistan.

Under the “Livelihood 2022” project, Secours Islamique France focused on improving living conditions and resilience in Peshawar, Charsada, and Tharparkar Districts. This project provided sustainable livelihood opportunities to vulnerable households through enterprise development, livestock and agriculture support, and capacity-building initiatives.

Using its own funds, SIF implemented the “Livelihood Economic Activities & Development (LEAD)” project in Orakzai, Khyber Pakhtunkhwa. This project aimed at enhancing living conditions and resilience for returnees by offering sustainable livelihood options, access to basic infrastructure, and improved sanitation facilities through enterprise development and agriculture restoration.

Welthungerhilfe contributes to building community resilience and improved Food and Nutrition Security,

especially for Pregnant and Lactating Women and children. In 2022, projects funded by the German Ministry for Economic Cooperation and Development (DMZ) covered a total of 15,500 households in Districts Muzaffargarh, Shangla, Kohistan and Hyderabad. Based on multi-stakeholder, multi-sector, and food system approaches, key interventions included diversification of on-farm and domestic food production, income generation and skill development, improved health, hygiene and nutrition practices, access to safe water and sanitation, natural resource management, coordinated implementation of provincial Multi-sector Nutrition Strategies and the generation of demand for improved service delivery. In 2022, WHH and partners reached 46,577 individuals directly and closely collaborated with PDMA, DDMA, health, education, agriculture, livestock, and WASH service providers.

● Climate Change

Climate change has widespread impacts on the environment, economies, and societies globally. It disrupts ecosystems, intensifies extreme weather events, and contributes to water scarcity and food insecurity. Organizations such as CARE International, Islamic Relief, Muslim Hands, NCA, Tearfund, and WHH are actively involved in development interventions to address climate change in Pakistan. They empower communities, promote sustainability, and mitigate climate-related disasters through capacity building and collaboration, fostering a climate-resilient future.

GEOGRAPHICAL OUTREACH: Sindh, Punjab, AJ&K, Balochistan, Khyber Pakhtunkhwa, Islamabad, Gilgit Baltistan

Development Interventions

Climate Change

CARE INTERNATIONAL

Care International implemented the project titled “Providing Climate Conscious Entrepreneurship Training to University-Based Female Students in Pakistan-CFLI.” This project was of immense importance as it aimed to empower 120 female university students in Islamabad, Lahore, Karachi, Quetta, and Peshawar through green entrepreneurship training. The project focused on equipping the students with essential skills in environmental management and business model

development. Care International’s dedication and efforts resulted in notable achievements. The project successfully trained 123 female students, enabling them to acquire knowledge and expertise in green entrepreneurship. To further support their entrepreneurial endeavors, the project also identified and selected five promising green start-ups out of twenty-two ventures developed by the trained students. In addition to the direct impact on students, the project made significant contributions at the policy level. By sharing a draft green jobs

roadmap with the Ministry of Climate Change, the project actively contributed to the development of green jobs in Pakistan.

ISLAMIC RELIEF PAKISTAN

IR addressed the challenges posed by climate change through a focused effort on building community resilience in the face of droughts and water scarcity. It implemented interventions such as vocational training, value

chain development, and the improvement of water management practices. The TACVA Project took a comprehensive approach, with activities related to water management, agriculture, livestock, and policy advocacy. The project aimed to enhance the resilience of communities and reduce the socio-economic impacts. Islamic Relief Pakistan's VOCAL campaign has successfully reached millions with its climate action message. The campaign aims to expand outreach to local communities and youth, focusing on vulnerable groups. Stakeholders such as community elders, teachers, and government departments are engaged to empower youth leaders in planning and budgeting.

| MUSLIM HANDS

MH Climate Action Program is a

comprehensive initiative that aims to tackle climate change and encourage sustainable practices in affected communities. As part of the program, tree planting campaigns were organized across Pakistan and informative sessions conducted to raise awareness among young people about climate change and the organization's initiatives. Through this activity, around 30,000 students and five thousand youth volunteers were engaged.

In the year 2022, Muslim Hands successfully secured a pair of projects from the British Council, centering on the pivotal topics of youth and climate change. The initial venture, known as the Challenge Fund 2022, meticulously scrutinized and ultimately handpicked 11 distinct initiatives that addressed the crucial matters of climate change and girls' education within the borders of Pakistan.

In the second endeavor, aptly named Youth-Led Climate Action, the organization directed its attention towards nurturing climate-resilient actions among communities burdened by multi-disasters. Spearheaded by a cadre of diligent and knowledgeable young leaders, this project focused on imparting vital knowledge to small-scale farmers regarding prudent agricultural practices and kitchen gardening techniques. Furthermore, it provided them with agriculture toolkits and essential seasonal seeds, further fortifying their ability to navigate challenges presented by their environment.

| NORWEGIAN CHURCH AID

NCA is actively engaged in empowering vulnerable communities and building resilience to the impacts of disasters and climate change in Pakistan. The Community-Based Disaster Risk Management (CBDRM) project focuses on strengthening disaster preparedness and response in three districts of Sindh province through the establishment and strengthening of Community-Based Disaster Risk Management Committees (CBDRMCs), capacity building of relevant stakeholders, and awareness-raising among community members. The project aims to benefit 60,000 people, with a focus on women, children, and other vulnerable groups.

In addition, NCA's 'Power to the Youth' initiative addresses governance and development challenges in five districts of Pakistan by engaging 6,200

youth, 25 Civil Society Organizations (CSOs), and 300 duty-bearers in collaborative efforts to tackle environmental issues. This initiative aims to enhance the capacity of young people by equipping them with leadership skills and establishing strong linkages between young people and the authorities concerned. The initiative also includes the establishment of Rozgar Centers for vocational skills training and the capacity building of CSOs and universities for implementation of climate-resilient development projects.

Tearfund | TEARFUND

Tearfund's "Saaf Mahol" project aims to establish a sustainable solid waste management model and promote behavioural changes within the slum settlements of Islamabad. The project focuses on environmental cleanliness, employment opportunities and improving community health. The initiative involves forming green committees, providing door-to-door waste collection services, developing organic compost by green waste, planting trees to cope with climate change, and conducting awareness sessions on waste management.

The second project aims to improve the environment, health and livelihoods of the poor people in Karachi, Sindh through established Haryali Hubs (Two waste processing and recycling facilities). Haryali hubs were established to focus on sustainability and cost-effectiveness. The project engaged local stakeholders, partnered with the government, mobilized communities, strengthened the capacities

of Haryali hubs staff, raised awareness, and promoted behavioural changes at the household and community levels.

WELT HUNGER HILFE | WELTHUNGERHILFE

Welthungerhilfe is working on Climate Change Adaptation, through specific interventions on climate-smart agriculture. The project "Strengthening Food Security Resilience of Small Holder Farmers by Adapting Climate Change through Multi-level Approaches (2019-2022)", targeted 5,084 vulnerable households, including farmers and cattle farmers,

in 20 villages in the UCs Kaplore and Faqir Abdullah of Umerkot District. Funded by the German Ministry for Economic Cooperation and Development (BMZ) and in cooperation with partners, research institutes, authorities, and local governments, the project yielded valuable outcomes in the form of best practices showcasing climate-smart agriculture techniques, planning tools and increased awareness of Climate Change Adaptation. Mobilization and capacity building initiatives established effective links between communities and authorities, fostering the implementation of adaptation mechanisms.

● Disaster Risk Reduction (DRR)

Pakistan is prone to earthquakes, floods, droughts, landslides, and other natural disasters that can cause significant loss of life, displacement, and damage to infrastructure and livelihoods. By implementing multiple projects, CBM, CONCERN Worldwide, CRS, HHRD, Islamic Relief, Muslim Aid, and SIF contribute to building a more resilient Pakistan where communities are better equipped to withstand and recover from the devastating effects of disasters.

GEOGRAPHICAL OUTREACH: Sindh, Khyber Pakhtunkhwa, Punjab, AJ&K, Balochistan

Development Interventions

Disaster Risk Reduction

CBM supported one project focusing on Disability Inclusive Disaster Risk Reduction (DiDRR) under community based inclusive development initiative. The project titled “Improving Disaster Resilience of Communities in Southern Punjab” aimed to enhance the disaster resilience of flood-prone communities in Multan and Muzaffargarh through capacity building and inclusive emergency response. To achieve this, the project conducted training sessions for national NGOs on inclusive emergency response and capacity building of CBM partners in Pakistan in Disaster Risk Reduction (DiDRR). The project sought to improve the resilience of communities by building their capacity to respond to emergencies and promoting Christian Blind Mission inclusion in policies. The capacity building activities aimed to enable communities to develop and implement effective emergency response plans, and to strengthen their collaboration with local authorities and other stakeholders. The focus on promoting inclusion in policies aimed to ensure that vulnerable groups, such as persons with disabilities, were adequately represented in disaster management policies and practices. The project’s outcomes were evident in the enhanced preparedness of communities, specifically in

dealing with recurrent floods, a prevalent hazard in the region. By promoting inclusion in policies, the project ensured that the needs of vulnerable groups were effectively addressed in disaster management.

CONCERN Worldwide has implemented two programs with the funding support of the U.S. Agency for International Development’s Bureau for Humanitarian Assistance (BHA). The programs focused on building the resilience of highly vulnerable communities and strengthening the institutional capacities of national NGOs and government institutions (PDMA and DDMA) in preparing for and responding to humanitarian crises. The programs provided institutional support to District Management Authorities (DMAs) and local NGOs on effective humanitarian response. DMAs and NGO officials were equipped with various skills such as MIRA, SIMEX, M&E, HR, finance, and proposal development. Moreover, community trainings/orientations were conducted on various topics such as disaster risk reduction (DRR), hygiene, livestock management, and climate-smart agriculture techniques. Our programs also established Disaster Management Structures at the village, UC, and Sub-divisional levels, conducted

risk analysis, developed Disaster Management Plans (DMPs), and established Early Warning and Early Action (EWEA) system.

The Community Lead Approaches for Disaster Resilience in Pakistan (CLADER) project by Catholic Relief Services aims to strengthen the capacity of communities and local disaster management authorities to understand, anticipate, mitigate, and prepare for natural hazards, particularly flooding in Pakistan. It is designed as a pilot project to work with target communities and gather evidence for scalable approaches and solutions in the future.

The CLADER process of Community Led Disaster Risk Management (CLDRM) enables communities to identify solutions to disaster-related challenges that can be applied at both household and community levels. The project supports wider local efforts through linkages with local authorities and institutionalization of action plans at the district level, which are coordinated under national priorities and plans by the PDMA. The expected outcomes include the enhanced capacity of local authorities to involve vulnerable groups in the formulation and support of action plans, capacitation and functioning of Village Disaster Management Committees (VDMC) for developing plans to address flooding, and implementation of action plans by communities to reduce the impact of floods.

The Preparedness Project by HHRD aimed to

address the challenges of disaster risk management in Pakistan, which is prone to multiple hazards such as earthquakes, floods, droughts, landslides, snow avalanches, diseases, and deforestation, as well as man-made disasters. The project focused on building the capacity of human resources for disaster management at different levels, from grassroots to the provincial level. The project team engaged with local communities and field staff in targeted areas to provide training in various thematic areas related to disaster risk management and community-based disaster risk management. The project successfully organized eight trainings in 2022 across eight districts in Pakistan, including AJ&K, and the training results were impressive. Participants gained full knowledge of the basic concepts of the inclusive DRM process and learned how to plan, design, and impart effective disaster risk reduction and preparedness.

ISLAMIC RELIEF

In areas where communities face repeated disasters, our efforts are directed towards reducing the potential risks associated with such disasters. Collaborating closely with local communities, we have developed early warning systems and provided essential training and equipment. This ensures that the communities are better prepared and equipped to cope with future emergencies. The RAPID project aimed to improve the resilience and adaptation of more than 50,000 vulnerable communities in disaster-prone areas of

Quetta and Chagai. It involved various activities such as the construction of flood protection structures and water reservoirs, retrofitting of public buildings to make them resistant to hazards, and the establishment and reinforcement of disaster risk management organizations at the community level. The project successfully rehabilitated thirteen flood protection structures and water reservoirs, thereby reducing the risk of flooding, and improving access to water for the targeted communities. The vulnerable communities in Quetta and Chagai were specifically targeted, and the outcomes of the project significantly benefited these communities. The project conducted CBDRM training and developed DRM plans at the community level, increasing the capacity of local communities to prepare for and

respond to disasters. Emergency response toolkits and first aid kits were also distributed in schools to ensure the safety of students and teachers.

In 2022, Muslim Aid took significant steps to improve flood protection in Balochistan province. For this purpose, twenty flood protection walls were constructed across two districts, serving as vital barriers against flooding, and protecting local communities from the devastating impact of overflowing rivers and heavy rainfall. Additionally, ten water reservoirs were built in Chagai and Killa Saifullah, ensuring a stable water supply

and reducing the risk of water scarcity during dry periods. To strengthen community-based disaster risk management, emergency response kits were distributed among 96 Village and Union Council committees in Chagai and Killa Saifullah, empowering them to respond effectively to emergencies and minimize disaster impact. Moreover, 50 awareness sessions were conducted, educating 35 communities and 15 schools in Chagai and Killa Saifullah on disaster risk reduction strategies. These efforts aimed to build a resilient society capable of mitigating disasters and

safeguarding lives and livelihoods in Balochistan. 49,151 people directly and indirectly benefited from Muslim Aid Interventions in Killa Saifullah and Chagai, Balochistan.

SIF with the support of WFP implemented projects in Khyber Pakhtunkhwa and Sindh to protect the communities from the kind of disasters they faced in 2022. The interventions included conditional cash transfers, non NFI schemes and construction of flood protection walls.

● Economic Development & Poverty Reduction

The economic development sector holds great significance in driving progress, reducing poverty, and enhancing livelihoods. Several organizations, including CBM, Helvetas, Islamic Relief, Muslim Aid, Muslim Hands, Qatar Charity, and Tearfund actively contribute to Pakistan's economic development. Their initiatives empower communities, promote sustainable agriculture, provide vocational training, and support income-generating activities. These efforts create economic opportunities, foster entrepreneurship, and uplift marginalized populations, leading to improved well-being and sustainable development.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Islamabad

Development Interventions

Economic Development & Poverty Reduction

| CBM

The project “Improved Socio-Economic Status of Persons with Disabilities in Selected Low-Income Areas of Karachi” was supported by CBM under a community based inclusive development initiative. The project aimed to provide access to income by offering vocational skills training, micro-enterprise support, and tools, while also facilitating the process of obtaining national identity cards for people with disabilities. Additionally, the project focused on organizing self-help groups and capacity building of disabled persons’ organizations as a part of the social mobilization strategy. Mental health support and counselling services, along with referral mechanisms, were also provided. As a result, the project successfully facilitated vocational training and informal enterprise for four hundred most economically vulnerable persons with disabilities, with 50 percent of them being women. Additionally, organized, and effective self-help groups and disabled persons’ organizations were established to empower members to exercise and advocate for their rights. The project also contributed to improving the mental health conditions of people with disabilities or their family members/caregivers in the targeted areas through lay counselling and referral to specialized mental health services.

| HELNETAS

HELNETAS implemented Market & Employment Project in collaboration with the government line agencies and the strategic guidance of the Planning and Development Department of the Government of Khyber Pakhtunkhwa. Funded by the Dutch Ministry of Foreign Affairs, the project aimed to create sustainable income-generating and livelihood opportunities in a conflict-sensitive manner. Its objective was to promote job creation, increase income levels, and foster the development of more resilient communities. It focused on 3 outcomes: 1) strengthening Technical and Vocational Education and Training (TVET) institutions and other service providers to deliver skills training based on market oriented curricula, ii) facilitating job placements in wage and self-employment, and iii) enhancing the performance of SMEs and commodity value chains. The project also aimed to create a conducive environment for business growth in post-conflict areas. MEP’s main approaches included Inclusive Market System Development (IMSD), which fostered systemic thinking to improve access to employment and business opportunities.

| ISLAMIC RELIEF

Bringing economic stability to the poverty-

stricken communities has been one of our top priorities in Pakistan. Harnessing the power of the microfinance model has brought substantial and positive impacts to the lives of thousands of people. We have developed an economic productive base of 21,843 vulnerable communities, particularly

women, girls, children, older people, and persons with disabilities. This initiative has significantly contributed to improve income and food security. The communities are using resilient agriculture models and utilize their time productively. The communities follow water-efficient agricultural practices such as green tunnel farming and established demand-based water supply schemes. Additionally, efforts were made to rehabilitate irrigation systems, provide dipping facilities for livestock, construct animal shades, and rehabilitate and extend drinking water sources. Our project also focused on the

development of small water supply schemes and the provision of need-based water supply systems in public places or schools. Furthermore water ponds and channels were constructed, and reverse osmosis plants were installed to address water needs. The project contributed to improving the income and food security of vulnerable communities in Kharan and Washuk Districts. It also prioritized climate-sensitive management of water resources to meet irrigation requirements and ensure access to safe drinking water.

Muslim Aid implemented the “Microfinance-Murahabah Rawalpindi/Chakwal” project, which aimed to provide microfinance loans in kind to communities in Rawalpindi and Chakwal. The project identified and selected communities in need, and credit officers approved loans for disbursement. This initiative had a significant impact, offering community members access to credit services and empowering them to enhance their economic situation through small businesses and income-generating activities. Furthermore, the project promoted financial inclusion, equipping individuals with valuable financial skills and knowledge. Overall, the project successfully achieved its objectives, positively transforming the lives of community members in Rawalpindi and Chakwal. This project directly benefited 500 families in both the districts.

MUSLIM HANDS

A total of 6408 people benefitted from different projects executed by the MH.

The primary goal of our Orphan Sponsorship Program is to provide financial aid to underprivileged children who have lost one or both parents and are living in impoverished socioeconomic conditions. Through this program, MH supported 6008 orphans across Pakistan & AJ&K in 2022.

The objective of the Elderly Support Project was

to assist elderly individuals living in poverty by providing them with financial aid to meet their basic needs. As part of this project, a total of 270 senior citizens, comprising 123 males and 147 females, were given financial support.

Muslim Hands is offering financial aid to Al-Mudassar Special Education Complex, which caters to the special education and housing needs of children with disabilities. The project's objective is to enhance the overall welfare of 450 students who have mental and/or physical disabilities.

Rural livelihoods are improved through active participation of rural communities in pursuing

their own economic and social goals. Qatar Charity facilitates this process by harnessing the intrinsic potential of the rural poor, particularly women and youth through economic development interventions. Poverty in the hardest-hit regions will likely worsen in the context of the recent flooding. Hence, Qatar Charity through this program contributed to SDGs as it offered support to the rural poor households through a one-time cash grant and technical training so they become capable of starting self-identified income generating activities to increase their household incomes and to help them start income-generating ventures. The program was designed to increase household incomes, and it successfully supported families by providing them with 266 income-generating grants in technical trades such as welding, carpentry, tailoring,

bakery, sewing machines, grocery shops, and rickshaws. Additionally, lasting sources of income were established by providing families with goats, poultry and cows to help them establish their own businesses and ensure sustainable livelihoods.

Tearfund TEARFUND

Tearfund successfully implemented three projects with a shared goal of promoting economic development, environmental sustainability, and improving the socio-economic conditions of the targeted population. The first project focused on integrated socio-economic development in 20 villages. Tearfund established self-help groups, provided capacity building to agricultural and livestock farmers, empowered women economically, and imparted essential knowledge of agricultural management. The project also emphasized the use of eco-friendly products by teaching communities how to construct fuel-efficient stoves and produce organic Naeem compost.

The second project, "Entre` Sol Labs," provided support and resources to entrepreneurs, enabling them to develop climate-conscious businesses through mentorship and funding opportunities. The third project aimed to strengthen communities and empower them for collective community development, with a focus on climate-smart agriculture, women's empowerment, and solar energy solutions. Additionally, it provided 150 disadvantaged women with toolkits for kitchen gardening and fruit tree nurseries.

● Education

To improve access to quality education and enhance the educational environment, PHF Member organizations such as AAR Japan, Alight, HOPE'87, Human Appeal, Islamic Relief, JEN, Muslim Aid, Muslim Hands, Qatar Charity, Relief International, Right to Play, Save the Children and SIF have implemented multiple projects. Their work is highly significant as they address educational challenges, ensure access to education for marginalized communities, improve infrastructure, provide teacher training, promote inclusive education, engage communities, and contribute to long-term development. Their efforts foster equitable access, uplift communities, and empower children for a brighter future.

GEOGRAPHICAL OUTREACH: Balochistan, Khyber Pakhtunkhwa, Punjab, Sindh, Islamabad

Development Interventions

Education

AAR Japan developed a project aimed at increasing the education opportunities for Children with Disabilities (CWDs) in Haripur District, Khyber Pakhtunkhwa Province. The project introduced the concept and practice of inclusive education (IE) to enable CWDs to study together with other children while considering reasonable accommodation for them. In the third year of the project, the goal is to implement IE in two schools (KTS boys' school and PATHAN girls' school).

Alight has implemented 68 projects since its establishment in 2002. Alight has years of experience in supporting refugees and displaced communities who are the ones most in need of protection. Through different projects, we supported displaced people through primary healthcare and nutrition campaigns, gender-based violence prevention and support for the survivors, livelihood, quality education and youth empowerment programs. Currently, we are assisting Afghan asylum seekers in Pakistan by giving them safe housing, means of livelihood and psychosocial support while they await safe passage to other countries. Education

is one of the core programs of Alight. Between 2018-2021, Alight Pakistan implemented the nation's largest project for out-of-school children, enrolling 1.1 million children across the country. The success of this project was possible through the extensive partnership network, which included the Government of Pakistan. In addition, innovative

solutions were implemented to overcome the barrier of limited access to traditional schools.

HOPE'87 is proud to implement the Smart and Intelligent Learning in Education (SmILE) project in collaboration with Knowledge Platform. The project aims to provide quality education for secondary school students in Khyber Pakhtunkhwa, Pakistan. It aligns with the Education Sector Plan and the Sustainable Development Strategy 2019 of the Ministry of Education, which prioritize the provision of conducive learning environments supported progressively by technology to enhance effective and blended teaching and learning practices. The project, co-funded by the Austrian Development

Cooperation and the Ministry of Elementary and Secondary Education Khyber Pakhtunkhwa, aims to contribute to inclusive and equal education and lifelong learning opportunities in Pakistan (SDG 4, 5, 9, 10, GAP 13). The key project activities include the installation of learning software and digital content in seven project schools, training of teachers to use the Learn Smart Classroom (LSC), strengthen the LSC blended learning solution, training of students to implement and strengthen the learn smart classrooms, IT champions training, etc.

HUMAN APPEAL

The Orphan Child & Welfare Program by Human Appeal is dedicated to improving the overall well-being of orphan children through sustained financial support. The program has been successfully implemented in various regions across Pakistan, extending one-to-one sponsorship to address the diverse needs of orphaned children, including their welfare, healthcare and most importantly their education. The program places great importance on child safeguarding and follows a meticulous process involving careful identification, thorough eligibility verification, and efficient data processing. Regular interactions with widowed mothers foster transparency and facilitate seamless collection of funds. In addition to the vital financial assistance provided, the program focuses on the assessment of new orphans, timely transfer of funds, collection of detailed visit reports, and guarantee of access to education for all sponsored orphan children.

In 2022, Human Appeal continued its unwavering support, benefiting 4,570 orphan children and their families, and helping to provide them with a brighter future.

ISLAMIC RELIEF

Islamic Relief is working to give each child a brighter and happier future by supporting 67131 families and empowering women.

Rehabilitation of schools and provision of missing facilities, including the establishment of Menstrual Hygiene Management (MHM) resource units in three targeted schools, have significantly enhanced the learning environment, making it more conducive for students and teachers to deliver quality education. Formation and capacity building of Parent-Teacher Councils (PTCs) have ensured the sustainability of the project outcomes. As a result of the PEN project, vulnerable children in Khyber Pakhtunkhwa have better access to quality education, leading to improved learning outcomes and prospects. The project has made significant contribution to promoting education and improving the lives of vulnerable children in North Waziristan, in line with the Sustainable Development Goals (SDGs) and the Education Sector Plan of Pakistan.

JEN implemented the “Educational Environment Improvement Project for Children in Tribal District Kurram, Khyber Pakhtunkhwa

province, Pakistan” with funding from the Ministry of Foreign Affairs Japan. The project aimed to enhance the educational environment in targeted schools. JEN successfully built 15 new classrooms in 8 schools, provided furniture and hygiene kits to 3,102 students, and distributed school hygiene kits. We also trained 56 PTC members on facility management, hygiene education, and psychosocial support. The project had a positive impact, increasing school enrolment and satisfaction among parents and teachers. Teachers reported improved personal hygiene in students who used the hygiene kits at home. Overall, the project created a safer and more comfortable educational environment, benefiting key stakeholders such as the students, parents, and teachers.

© Muslim Aid

© Muslim Hand

| MUSLIM AID

Muslim Aid Pakistan has made significant contributions to education in District Jhang. Through enrolment campaigns, 372 new students (176 boys and 196 girls) were enrolled in ten selected schools during 2022. Additionally, 10 Parent-Teacher Associations (PTAs) were revived and empowered through training sessions focussed

on equipping them with the necessary skills and knowledge to fulfill their roles and responsibilities effectively. Education materials, including supplies for students and teachers, were distributed to the ten schools, benefiting five hundred individuals. The improvement of hygiene facilities was prioritized, with thirty-one handwashing facilities constructed, rehabilitated, or upgraded in schools. Hygiene kits

and soaps were periodically provided to the schools, benefiting 1,537 students. Moreover, three schools received specially constructed washrooms for persons with disabilities. Psychological support was extended to three hundred students, and hearing and spectacle devices were provided to seven children with disabilities. Training workshops and development plans were also conducted, engaging stakeholders, and promoting effective teaching methodologies. As a result of these efforts, 197 new enrolments were achieved, with eighty-eight boys and 109 girls in District Jhang, Punjab.

| MUSLIM HANDS

Overall MH benefitted 40749 children by providing them with formal education. These included 21440 boys, 18646 girls, 620 refugees and 43 differently abled children. Through core funds, MH has been managing 47 schools across the country including 02 colleges. In 2022, a total of 14296 students were enrolled including 7910 boys & 6386 girls. Muslim Hands has undertaken the management of 35 Community Schools in Balochistan and Southern Punjab. In the year 2022, a total of 1427 students were enrolled in these Community Schools, which included 911 boys and 516 girls.

Muslim Hands has been managing 152 public sector schools in 06 districts of Punjab in collaboration with Punjab Education Foundation. These schools have an enrollment of 19948 students with a gender ratio of 50% girls and 50% boys.

In Districts Badin and Tando Muhammad Khan (TMK), the organization has been running 12 public sector schools in partnership with Sindh Education Foundation with an enrollment of 2584 students.

In 2022 MH, reached 600 girls of public sector schools & specifically targeted the flood affected areas of Charsadda, Nowshera and Swat.

EDGE-English & Digital Girls education project, being executed in collaboration with British Council, has so far trained more than 2500 girls and it is aiming to reach around 5000 girls in 2023 across the country.

Qatar Charity works diligently to improve the physical infrastructure in vulnerable communities by using an integrated model of projects that promote

safety, sustainability and resilience. Education is a key focus area and throughout the year, Qatar Charity supported vulnerable communities in building climate resilient infrastructures. The goal is to create child-friendly and inclusive spaces to provide an enabling learning environment in order to attract students, improve attendance and retention and completion rates, as well as overall learning achievements.

Qatar Charity also aims to cultivate harmony between schools and the community. In addition to constructing schools, Qatar Charity undertakes projects to build orphanages (hostels), school rooms, and provides school kits. These projects aim to create safe and comfortable environment for vulnerable children to learn and grow. These

efforts contribute to Qatar Charity's mission to improve educational opportunities for vulnerable communities and promote overall well-being of individuals in communities.

Relief International (RI) is committed to improving quality education access for Afghan and host community children through two projects. The first project, Promoting Afghan Children's Education (PACE), is a three-year program that addresses demand and supply-side barriers to education by using formal and non-formal approaches to mainstream all age groups into the education cycle. It includes a signature

school readiness program for children aged 5-9 years and an accelerated learning program for left-behind children aged 10-14. The project targets 70 government primary schools in KP's Peshawar, Nowshera and Swabi Districts. RI engages community members through mobilization and advocacy meetings, Afghan Community Forum (ACF) and Parent-Teacher Council (PTC). RI supports schools and learning spaces through repair and maintenance components. RI's projects include training for government teachers, District Education Officers and mentors.

Right to Play's Roshan Rastay program aims to improve access to education for in and out-of-school children and enhance the quality of learning through child-centred, play-based pedagogies as well as by improving the capacity of the relevant stakeholders. Teachers from partner (formal) schools have received trainings to establish a positive and safe learning environment for children. Communities of Practice (CoP) are also formed for them to further strengthen the education system.

The program is also providing basic education to out-of-school children through non-formal education (NFE) centres in targeted districts where teachers have been trained in play-based learning methodology and an Accelerated Learning Program (ALP) is implemented for the learners. Under this project, a few orphanages have also received basic

school equipment, and play spaces rehabilitated or created as needed. Lastly, 300 teachers from TCF schools received training for the effective implementation of play-based learning activities

PAK Voices and Choices through the Resilient and Integrated Education Program is contributing towards achieving the objective of empowering adolescent girls and boys (14-18) by transitioning them to the formal education system with the provision of improved access, through accelerated learning programs by establishing 70 ALCs and imparting them technical and vocational skills. The project is also contributing towards the use of knowledge and learning for advocacy on safe education and prevention of child marriages in District Thatta, Sindh..

SIF's Orphan Sponsorship Program supports vulnerable orphan families in Islamabad, Rawalpindi, and Tharparkar through financial stipends for education. The program benefitted 683 orphaned children including boys, and girls. Scholarships and psycho-social support was also provided to the beneficiaries. It also aimed to improve the livelihoods of 181 sponsored families through vocational training, apprenticeships, enterprise development, and livestock assistance. Recreational activities are included for the children.

In Tharparkar, Sindh, SIF implemented the "Increase Equal Access to Quality Education through Effective Education Program (ILEM)." The project enrolled 535 boys and girls in formal schools, creating safe and inclusive learning environments. Teacher capacity- building sessions equipped 36 teachers with innovative teaching methodologies. The project improved sanitation facilities and increased enrolment, enhancing teachers' capacity and providing better educational infrastructure. SIF's initiatives in Tharparkar aimed to ensure inclusive and equitable access to quality education for all students.

● Governance

Governance is a crucial pillar in the development sector, providing the necessary foundation for effective policies, transparency, and accountability. It ensures the rule of law, upholds human rights, promotes inclusive participation, and strengthens institutions. By fostering collaborations and partnerships, governance facilitates coordinated efforts for sustainable development. CONCERN Worldwide, HELVETAS, and WHH actively contribute to these endeavours, promoting good governance practices and driving positive change.

Governance

Concern Worldwide is implementing European Union (EU) funded CSO's-BRIDGE Program in District Bahawalpur. It focuses on building the capacity of Civil Society Organizations (CSOs) to mitigate the socio-economic impacts of COVID-19. Strengthened CSOs are vital in bridging the gap between the Local Authority (LA) and target groups, including youth, People with Disabilities (PWDs), women, and transgender individuals. The program equips CSOs with tailored capacity building assistance to mobilize communities and address the social and economic effects of the pandemic. The project aligns with EU priorities of localization and includes technical training for CSOs in youth empowerment and local governance. It also creates economic opportunities for youth through skills development, job placement, and linkages with Local Authorities and the private sector. Additionally, government officials from various departments receive capacity building support to address socio-economic issues faced by informal sector communities. The project benefited 373,862 individuals including 35% women and 45% children.

Land and Water Diplomacy (LWD) Project, funded by the European Union, was implemented in the

newly merged Districts of Bajaur, Mohmand, Khyber, and Kurram in the Khyber Pakhtunkhwa province of Pakistan. The overall goal of the project was to contribute to the constructive engagement of civil society actors in Pakistan's peacebuilding and preparedness efforts, aligning with the EU-Pakistan Strategic Engagement Plan (SEP). The objective was to strengthen social cohesion for peace and stability in tribal communities of NMDs (Ex-FATA). This was achieved through engaging the local authorities and the CSOs in confidence-building measures and facilitating dialogue pertaining to water and land issues. It promoted dialogue among communities for workable solutions related to land and water productivity. The project implemented various activities including the resolution of disputes, small-scale infrastructure development, organizing youth activities, providing training on mediation skills and facilitating exposure visits for students. These efforts helped foster productive dialogue and create sustainable solutions for communities.

Welthungerhilfe aims to contribute to a progressive, democratic, inclusive, and empowered society, whereby all development actors – communities, particularly youth, civil society, local government representatives and local authorities – carry forward

© Welthungerhilfe

the local development agenda in a synergized and coordinated manner. The EU-funded project in Khyber Pakhtunkhwa worked with 33 CSOs, 2 Inclusive Civil Society Platforms, local authorities, and local government representatives to realize community demands, integrate them in development planning and established Local Development Units as participatory governance mechanisms, inclusive of all stakeholders. The CSO-BRIDGE Programme (EU-funded) in Multan, Bahawalpur and Hyderabad capacitated 60 CSOs, 6 Tehsil Action Groups and a District Civil Society Network to interact with local authorities, bring community demands forward and support youth with skill development and income generation. Welthungerhilfe and partners are cooperating closely with authorities and contributing to capacity strengthening, which includes facilitating a more accessible NGO registration system.

● Health

The healthcare sector holds immense importance for promoting the well-being and quality of life of individuals and communities. It encompasses various aspects such as access to healthcare services, disease prevention, treatment, and health promotion. CBM, Human Appeal, International Rescue Committee, Mercy Corps, Muslim Hands, and Qatar Charity have made significant contributions to strengthening the healthcare system in Pakistan. Their initiatives focused on enhancing access to healthcare, improving the quality of services, and ultimately improving health outcomes. As a result, individuals, families and communities are experiencing positive impacts, leading to a healthier and more prosperous Pakistan.

GEOGRAPHICAL OUTREACH: Punjab, Khyber Pakhtunkhwa, Sindh, Balochistan, Islamabad, AJ&K, Gilgit Baltistan

Development Interventions

Health

CBM supported projects under the inclusive eye health initiative, focusing on strengthening systems at national and local levels. Efforts included providing equipment, training, innovative practices, high-quality spectacles, community mobilization, and advocating for sustainability and accessibility for people with disabilities.

CBM's inclusive eye health projects have shown great impact on the lives of communities in general and specifically of persons with disabilities. The support provided in the projects has continuously resulted in a greater uptake of services at public sector facilities. This is attributed to the availability of quality services at the local level, conveniently accessible to the communities at their doorsteps and increased awareness amongst the population.

Further, as part of the inclusive eye health initiative plan, CBM actively engages and supports national, provincial and district level eye health forums/committees formed by the Government. The active role in these forums has helped to align CBM's programming aspirations with those of national eye health plans to create relevancy and higher impact.

Another noteworthy initiative by Human Appeal is the 'Primary Health Care E-Clinic for Basti Eman' located in a remote village of District Rahim Yar Khan, Punjab. This project focuses on providing primary healthcare services to the local community, including children, adults, the differently abled persons, and the elderly in an area with no access to basic health services.

Through virtual clinical services, patients relate to specialized male and female doctors in Lahore. The E-Clinic also utilizes a screen to deliver disease awareness videos and conducts interactive live lectures with separate question-and-answer sessions for men and women. Furthermore, the project includes ambulance services to ensure timely access to tehsil and district hospitals during emergencies. This comprehensive approach positively impacted the lives of 2,652 individuals in 2022.

In addition to this, Human Appeal also provided financial support to eleven individuals with special medical cases to meet their medical expenses and to regain health.

INTERNATIONAL RESCUE COMMITTEE

The International Rescue Committee has implemented several innovative projects aimed at increasing access to quality family planning services in various districts of Pakistan. In Tehsil Khanpur, Rahim Yar Khan District, the project focused on 10,000-12,000 BISP beneficiaries (MWRAs) in 15 Union Councils, aiming to increase the technical capacity of healthcare providers, scale up facility-based service delivery, and community-based service mobilization and demand creation. In Faisalabad district and Lahore district Unit 4, the projects aimed to reduce unintended pregnancies and address unmet needs of married women of reproductive age living in underserved areas, by scaling up FP services through doorstep delivery models, improving availability and accessibility of quality family planning services through private sector engagement, and implementing community-based service mobilization and demand creation strategies. In Lahore district Unit 5, the project focuses on increasing the CPR through scaling up FP

services, improving the availability and accessibility of quality family planning services, and community-based service mobilization and demand creation. These interventions aim to ensure equitable access to quality family planning services provided by International Rescue Committee, strengthen women's reproductive health decision-making, promote communication that can change practices of accessing FP services, and promote women's role in providing and managing quality healthcare services.

| MERCY CORPS

Mercy Corps implemented three significant projects in Pakistan aimed at addressing public health issues. The first project, as the private sector Principal Recipient of the Global Fund, aimed to reduce the burden of TB and MDR-TB by engaging private healthcare providers to provide free TB diagnosis and treatment services in 111 districts across the country. The program was successful in reducing the number of TB-related deaths in Pakistan, increasing access to free TB diagnosis and treatment services, and ultimately mitigating the public health issue of TB. In response to the COVID-19 pandemic, Mercy Corps implemented the second project which involved providing essential medical support and assistance to the community through the provision of equipment such as hearing devices and wheelchairs. These resources aimed to enhance the mobility and overall health of individuals in need within the community. The project also provided medical assistance for chronic

diseases, including diabetes and hypertension, to improve the health outcomes of patients with long-term health conditions. Mercy Corps also implemented a project that utilized digital systems to engage private healthcare providers in the fight against TB. The project aimed to develop and deploy a case-based digital TB notification system, along with other functions to support private provider engagement in selected districts.

| MUSLIM HANDS

MH's health program extended assistance to a total of 76961 people including 37774 women, 14647 children, 15294 men, 6512 differently abled persons and 273 individuals from other groups including refugees, displaced etc. This program included establishment of static health units and Rehabilitation Centres for Physically Disabled (RCPDs) in 05 districts. These facilities offer free

health facilities including free lifesaving medicines and mobile health services to the deserving and needy communities in far flung areas across the country.

Furthermore, MH has been managing free eye cataract camps, cleft lip and palate treatment services and general mobile health camps.

قطر الخيرية | QATAR CHARITY | QATAR CHARITY

Qatar Charity prioritized the improvement of medical facilities by focusing on infrastructure development and providing basic equipment. With the primary objective of providing affordable and quality healthcare to the masses and to uplift the community's health standards, the project aimed to improve the quantity and quality of hospital services by enhancing the availability and utilization of medical equipment. The health facilities were laced with modern equipment including devices for medical examination, diagnostics, and assistive devices such as hearing devices, , and wheelchairs, to provide additional medical support and assistance for the community's mobility and improved health. The project also provided medical assistance for chronic diseases, including cancer, diabetes, and hypertension, to improve the health outcomes of patients with long-term health conditions. Overall, the project successfully enhanced the accessibility and quality of healthcare services in the community, providing relief and support for those in need.

Nutrition

The nutrition sector plays a critical role in addressing malnutrition and promoting healthy lifestyles. CONCERN Worldwide, GAIN, HELVETAS, Muslim Aid, Muslim Hands, and WHH are actively involved in addressing malnutrition in Pakistan through various initiatives including nutrition programs, access to nutritious food and awareness campaigns. Their collaborative efforts with communities and stakeholders have reduced malnutrition rates, improved food security, and empowered individuals to make informed nutrition choices. The initiatives of these organizations have had a positive impact on the health and overall development of individuals and communities.

GEOGRAPHICAL OUTREACH: Sindh, Punjab, Islamabad, Khyber Pakhtunkhwa

Development Interventions

Nutrition

CONCERN
 worldwide | **CONCERN WORLDWIDE**

CONCERN Worldwide's EU-funded PINS program in Sindh successfully contributed to sustainable improvements in the nutritional status of children under five years of age and pregnant and lactating women (PLW) in three districts of the province. The program was implemented over a period of 3.5 years with the help of three local NGO partners. Through its activities such as screening, referral, and orientation sessions, the program enhanced the capacities of the government to effectively implement multi-sectoral strategies and contributed to the sustainable reduction of undernutrition in the province. Additionally, the formation of support groups and cooking demonstration sessions at the field level helped to promote positive health-seeking behaviours and improved nutrition practices among the community members. The project benefited 373,862 individuals including 35% women and 45% children.

gain | **GAIN**
 Global Alliance for
 Improved Nutrition

GAIN has implemented four impactful projects in Pakistan to improve nutrition outcomes and increase access to nutritious food. The first project, SUN Business Network Pakistan, focuses

on convening businesses and advocating for their active engagement in addressing nutrition challenges, with a particular emphasis on women and youth. This initiative has successfully brought together businesses and raised awareness about their crucial role in nutrition improvement. The second project, Commercialization of Biofortified Crops (Zinc Wheat), aims to boost the consumption of biofortified Zinc Wheat in the country. By improving the accessibility of Zinc Wheat seeds and integrating biofortification into policies, this project has effectively increased the availability and reach of biofortified crops and products to consumers.

The Access to Better Dairy - Greening and Scaling project concentrates on enhancing the availability and acceptability of safe and nutritious milk-based products, targeting children and women. This initiative supports the market development of the dairy value chain, benefiting local processors and fostering a consistent milk supply for low-

income consumers. Lastly, the Large-Scale Food Fortification Technical Assistance to Pakistan project aims to scale up the availability of biofortified Zinc Wheat, with a particular focus on reaching the poorest and most vulnerable populations in both urban and rural areas.

HELVETAS | **HELVETAS**
 PAKISTAN

NMA project implemented by HELVETAS in Pakistan successfully enhanced nutritional and environmental value of agriculture for farming families in Khyber Pakhtunkhwa and Gilgit Baltistan. By introducing sustainable farming practices, the project improved the quality and diversity of food production in targeted regions.

© Muslim Hands

Furthermore, the project focused on promoting healthier cooking habits within households, leading to better nutritional outcomes for family members. Participating families reported increased access to nutritious food, improved health, and a heightened awareness of sustainable agricultural practices. Overall, the project significantly contributed to the well-being of farming families in mountainous areas by advocating for sustainable agriculture and fostering healthy nutrition practices. It focused on supporting and stimulating national policies and action plans through diversified production and consumption. Policy makers, local businesses and consumers were sensitized on nutrition aspects and their involvement in nutrition and its links with agro diversity.

Muslim Aid implemented multiple projects in Balochistan, Pakistan, focusing on addressing the community's nutritional needs. In Quetta, Pishin, Chagai, Kalat, and Killa Saifullah, Muslim Aid distributed food packs to support 1,400 families, while in Killa Saifullah, quality meat was provided to 1,152 families. These initiatives aimed to ensure food security, promote hygiene practices, and enhance the overall well-being of the communities. By providing immediate relief and support, Muslim Aid played a vital role in assisting vulnerable populations in Balochistan. Muslim Aid Pakistan supported 2,552 families through this project during 2022.

MH reached more than 264000 people through different interventions in 2022. During Ramadan 2022, MH distributed 10,000 food packs (including dry food staples) covering the one month ration requirements of the poor. 70,000 individuals benefitted from it. On Eid-ul-Azha, MH distributed Qurbani meat among two thousand families to cover the nutritional needs of the poor and deserving families across the country. Each pack contained 5kg meat which was maintained hygienically in biodegradable bags.

Through another project, MH distributed 180,000 hot meals among poverty-stricken people during Iftar and Sahur and this activity took place in eleven major cities across the country.

© Welthungerhilfe

Using its own funds, Welthungerhilfe promotes localized and climate-adapted solutions to hunger and malnutrition. While exploring indigenous food sources in the Thar desert, WHH and its partners conducted mapping and analysis of the nutritional value of various local food sources. These food sources primarily consisting of plant based options have adapted to the climate conditions of the region. Recipes were developed, demonstrated, and compiled in a recipe book. Findings will be further disseminated.

Protection

The significance of protection sector in ensuring the well-being and safety of vulnerable individuals cannot be overstated. Organizations such as CBM, Human Appeal, Mercy Corps, Qatar Charity and Save the Children have made notable contributions to promoting well-being and creating a safer environment. Their efforts include supporting street children, enhancing the protection of women and girls, and providing assistance to vulnerable groups. These initiatives are instrumental in creating a safe and secure environment for those in need.

GEOGRAPHICAL OUTREACH: Balochistan, AJ&K, Sindh, Punjab, Khyber Pakhtunkhwa, Islamabad

Development Interventions

Protection

CBM supported two protection-focused projects under the community based inclusive development initiative.

The first project aimed to improve the protection system for women and girls including persons with disabilities in District Multan and Muzaffargarh. This project addressed community and family level barriers in accessing protection systems through awareness and building capacity of public facilities. The key activities under this project were counselling, capacity building, and policy advocacy. This project also facilitated persons with disabilities in the process of accessing special CNICs.

The second project focused facilitating persons with disabilities in obtaining special CNICs and enrolling them in social protection schemes. The project aims to remove barriers faced by persons with disabilities in accessing social protection.

Human Appeal established the 'Aminah Learning & Protection Centre' in the vibrant Shahdara area of Lahore, Punjab. The center offers comprehensive support to street children and youth who reside in

© Alight Pakistan

high-incidence areas across Pakistan. By means of its extensive outreach and drop-in services, the project extends a wide array of essential provisions to address the multifaceted needs of these vulnerable individuals, including basic healthcare, education, a secure environment, nutrition, skills training, and psychological support.

The project extends non-formal education to street children, inculcating reading and writing skills in them and provides daily free nutritious meals. A resolute psychologist is also there to provide psychosocial counselling to distressed children and help them overcome psychological challenges.

The project also imparts vocational skills specifically for young girls and provides free medical consultations and medications to the public. In 2022, the project successfully served a total of 3,553 individuals with its various services.

Mercy Corps has been implementing the Program for Retention, Enrolment, and Protection (PREP-II) in 13 peri-urban locations in Quetta for the third year. The program aims to improve the psychosocial and well-being outcomes of Afghan refugees and host community children and adolescents through equitable access to education in a safe and inclusive environment. The project adheres to PRM Principles for Refugee Protection in Urban Areas and focuses on local integration, capacity building, and community-based approaches. During the third year, the Mercy Corps project will continue to support public schools and ALP centres to adhere to COVID-19 preventive measures. Activities implemented in the first and second year will be continued, building on the previous accomplishments. The education component includes formal school support, ALP learning, life skills, child protection, MHM sessions, and mental health support for vulnerable children. The project team also promotes social cohesion through mass mobilization of communities, engagement

with notables and religious leaders, and student activities during international celebrations. The project provides personal protective equipment and conducts COVID-19 safety and preventive measure sessions in schools.

Qatar Charity has implemented the Youth Leadership and Social Protection program in several districts in Pakistan and Azad Jammu and Kashmir. Providing orphan care and welfare services, the program supports more than 11000 orphans and families. Under the Orphan Care & Welfare, Qatar Charity extends financial support to the extremely needy and vulnerable orphans in 10 districts of Pakistan and Azad Jammu & Kashmir.

Along with Orphan Care & Welfare, Qatar Charity is catering to the needy and Extremely Vulnerable Families EVFs including widows headed families, aged persons and differently abled persons in Pakistan and Azad Kashmir. Similarly, Qatar Charity is supporting Persons with Disabilities (PWDs) and University or College Graduates for higher education in Pakistan and Azad Kashmir.

Qatar Charity also provides additional support for winter, Ramadan food packages, Zakat ul Fitr, Qurbani Program, and Eid Gifts to approximately 106,670 individuals in Punjab, Sindh, Khyber Pakhtunkhwa, Baluchistan, and AJ&K.

Sesame Workshop ECD Pilot Project is implemented in selected schools of District Chaman in Balochistan, benefiting children, parents, and teachers with Afghan and host communities regarding early childhood social-emotional learning skills to mitigate the impact of trauma caused by forced migration. This pilot project used Sesame Workshop content and resources – a play-based approach – to improve children's social-emotional well-being, thus enabling them to learn to their fullest potential and supporting families and communities to provide an enabling, nurturing, and stable environment.

● Social Cohesion

Social cohesion encompasses the level of harmony, cooperation, and inclusiveness within a society. Organizations such as CBM, Norwegian Church Aid (NCA), Right to Play, and Tearfund have actively worked in promoting social cohesion and contributed to creating more inclusive and cohesive societies where individuals can live together harmoniously and thrive within diverse communities. These organizations have implemented multiple projects and initiatives aimed at fostering social cohesion by addressing underlying divisions, promoting dialogue, and building bridges between different groups.

GEOGRAPHICAL OUTREACH: Balochistan, Khyber Pakhtunkhwa, Sindh, AJ&K, Punjab, Islamabad

Development Interventions

Social Cohesion

| CBM

The project “Enabling Social Cohesion and Resilience through Livelihood Improvement in Peri-Urban Areas of Quetta, Balochistan province, Pakistan” is a new initiative supported by CBM under the community based inclusive development initiative. Its primary objective is to enhance social cohesion and resilience among the refugee population and host communities in the peri-urban areas of Quetta. The project focuses on improving livelihoods, promoting gender equality, and providing recreational activities as key strategies. The project consists of various activities including technical and vocational education and training (TVET), mental health and psychosocial support (MHPSS), and assistance to social organizations. These interventions aim to empower the communities and foster their social cohesion and resilience. By improving livelihood opportunities, the project contributes to the economic empowerment of the beneficiaries, enabling them to enhance their living conditions and overall well-being.

| NORWEGIAN CHURCH AID

Norwegian Church Aid (NCA) is implementing two initiatives aimed at promoting social cohesion and

© Right to Play

harmony in Pakistan. The Joint Social Action for Inclusive Societies initiative focuses on building the capacity of diverse communities and facilitating interaction and dialogue among religious leaders, civil society organizations, and faith leaders. The aim is to engage stakeholders for improved service delivery while ensuring outreach to marginalized and dispossessed segments of society. Additionally, the initiative aims to enhance understanding and

interaction among different faith groups. The Transforming Communities for Cultural Co-existence initiative focuses on strengthening community structures and promoting peace and harmony in Lahore and Gujranwala Districts in Punjab. This initiative engages young people and encourages cultural cohesiveness and harmony through the establishment and capacity building of community groups, engagement with a wide

range of stakeholders, and the encouragement of dialogue. The project provides training to the youth in areas of climate change, cultural cohesiveness, and harmony, as well as awareness-raising regarding 2% quota in education for marginalized communities. It also envisages training for police officials.

The “Team Up” project by Right to Play has been implemented in the urban slums of Islamabad, Pakistan. It targeted a diverse population, including 25,000 Afghans, over 20,000 Temporarily Displaced People (TDPs) from tribal districts, approximately 5,000 TDPs from Dir, and a community of 10,000 religious minorities, bringing the total estimated population to 250,000. The project brought a positive change by empowering children from disadvantaged backgrounds through sports activities. It promoted peace, conflict resolution, and the development of essential life skills within the community.

The project also undertook minor rehabilitation of sports and play spaces, and provided necessary sports equipment. Daily sports and play-based activities benefited approximately 3,000 children. There were orientation sessions as well with parents, community elders, etc. Sports events were conducted for better engagement and sensitization of the community. Additionally, psychosocial support and counselling sessions addressed the emotional well-being of the children.

Tearfund | TEARFUND

Tearfund’s project focused on addressing broken relationships in four different areas: strengthening the self-relationship, nurturing the relationship with God, developing the relationship with the earth, and restoring the relationship with faith communities. The project aimed to strengthen the social and cultural fabric of society by promoting peace and social cohesion among multi-faith communities. The project engaged participants in interactive activities

within a conducive learning environment to foster an understanding of different faiths. Its goal is to equip participants to become peace ambassadors, actively working to reduce communal conflicts. The project contributes to peacebuilding and conflict resolution through activities such as peace building and conflict resolution training, youth camps, an art exhibition on the theme of peace and the environment, and awareness raising on solid waste management. The project is playing a significant role in fostering peace, understanding, and sustainable relationships among diverse communities.

Technical Education & Vocational Training (TVET)

Technical and Vocational Education and Training (TVET) plays a crucial role in equipping individuals with practical skills and knowledge necessary to enhance their employability and foster economic growth. CBM, CONCERN Worldwide, and WHH have contributed significantly to Pakistan's TVET sector. Their efforts have focused on enhancing employability, reducing unemployment, promoting entrepreneurship, and empowering marginalized groups. Their efforts helped the individuals acquire market oriented skills, providing them with opportunities for sustainable employment and economic empowerment.

GEOGRAPHICAL OUTREACH: Khyber Pakhtunkhwa, Islamabad, Sindh, Balochistan, Punjab

8 DECENT WORK AND ECONOMIC GROWTH

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Development Interventions

Technical Education & Vocational Training (TVET)

The project, titled “Improving access to income-generating activities for young adults in selected slum areas of Rawalpindi and Islamabad,” focuses on enhancing economic opportunities for individuals including those with disabilities in low-income areas through CBM’s support under community based inclusive development initiative. The project adopts an inclusive approach by mobilizing the community and addressing barriers faced by persons with disabilities. It implements various strategies such as vocational skills training, small business enterprise development, organization of Self-Help Groups (SHGs) and Out Patient Departments (OPDs), as well as establishing savings and loan groups. The project aims to empower young adults, improve their livelihood prospects, and foster economic inclusion in the designated slum areas of Rawalpindi and Islamabad.

Concern Worldwide, in partnership with the Indus Cultural Heritage Foundation (ICHF), is implementing the “Supporting Afghan refugees in Livelihoods and Access to Markets (SALAM)” program in District Swabi (KP) and Islamabad. The

program specifically targets Afghan refugee women who possess Proof of Registration (PoR) cards. In total 220 female Afghan refugee beneficiaries received livelihood skill training. To ensure the beneficiaries’ success, the program provides on-the-job practical training, allowing the women to gain firsthand experience in their chosen fields. Additionally, the program establishes links with the market, connecting the beneficiaries with potential employers or customers. The program has improved livelihoods and increased economic independence for the Afghan refugee women in Swabi and Islamabad.

Welthungerhilfe and its partners are contributing to the Sustainable Development Goals, including ending poverty, zero hunger, decent work and economic growth, and reduced inequality. To build resilience and reduce vulnerabilities, WHH and the partners support income generation of youth through technical and vocational education, aligned with national standards, in Peshawar, Bahawalpur and Bhambore Divisions. Funded by the German Ministry for Economic Cooperation and Development (BMZ), the project enables youth to participate in certified vocational trainings and

career counselling, receive financial and business development support, and generate income as entrepreneurs or employees. The capacity of training institutes is strengthened to offer programs as per the national standards. WHH and the partners are cooperating with provincial and national Technical and Vocational Training Authorities (TEVTAs and NAVTCC) to enforce standardized trainings and certification. In 2022, 165 youth (95 men and 65 women) were enrolled in training programs.

WASH

Access to clean water, adequate sanitation facilities and proper hygiene practices are fundamental to ensuring good health and well-being. Human Appeal, Islamic Relief, Muslim Hands, Norwegian Church Aid (NCA), Qatar Charity, SIF, Tearfund, Water Aid, and WHH have played a crucial role in addressing WASH challenges in Pakistan.

Through their initiatives, these organizations have provided access to clean water, and sanitation facilities, promoted essential hygiene practices, and raised awareness. Their efforts have had a significant impact on improving health outcomes, and overall well-being, creating a healthier and more prosperous future for the people of Pakistan.

GEOGRAPHICAL OUTREACH: Balochistan, Khyber Pakhtunkhwa, Sindh, AJ&K, Punjab, Islamabad

6 CLEAN WATER AND SANITATION

Development Interventions

WASH

HUMAN APPEAL

Human Appeal implemented five impactful projects to address water, sanitation, and hygiene issues and improve access in different districts of Punjab and Sindh. In Tharparkar, the 'Improved Potable Water Availability & Hygiene Awareness' project focused on providing access to safe drinking water and raising hygiene awareness in selected villages. The project installed solar-powered submersible pumps, water storage tanks, and water supply lines, benefiting households in need. Sensitization sessions on health, hygiene, and sanitation were conducted, contributing to improved knowledge and practices. In District Khairpur, Sindh, the 'Scale-Up Provision of WASH Services' project facilitated the certification of 1,370 villages as open defecation-free by promoting behavior change and social mobilization. Under the 'Integrated Water, Health, Food Security & Livelihood Project for Tharparkar,' water tanks and distribution networks were installed to provide distressed communities with access to clean water close to home. In total, 1,056,280 people were reached with clean water, sanitation, and hygiene.

ISLAMIC RELIEF

Islamic Relief implemented the project

"Provision of Drinking Water Facilities in Balochistan" with the aim of providing safe and clean drinking water to vulnerable and affected communities in the Districts of Kharan and Washuk. The project included the rehabilitation of seven water supply schemes in the two districts, meeting national standard indicators for WASH, as well as the rehabilitation of 10 need-based WASH facilities in girls' schools. Additionally, a water filtration plant was constructed and installed to purify saline water, reducing waterborne diseases among the targeted population. It involved the formation of WASH committees comprising local community participants who were trained and equipped with toolkits to maintain and manage the DWSS. Furthermore, 20 health and hygiene awareness sessions were conducted, along with intra-provincial exposure visits by technical staff and community members, to encourage innovative and adaptive practices.

MUSLIM HANDS

MH WASH program benefitted a total of 593073 people through 3 WASH schemes,

Under communal WASH schemes, MH has successfully installed 275 communal wells, five deep solar wells, 17 Water Filtration Plants, 10

deep solar community wells, 1407 Dig-a-Wells and 07 Reverse Osmosis (RO) water filtration plants, providing communities with clean and safe drinking water.

At the domestic level, 10,217 tube wells were installed and H&H/Dignity kits were distributed. Alongside these efforts, awareness/sensitization sessions on hygiene & nutrition were conducted to promote better practices and improve community health.

At the institutional level to enhance the WASH

© Muslim Hands

(Water, Sanitation, and Hygiene) conditions in schools, a total of twenty public sector schools have been identified in Peshawar, Khyber Pakhtunkhwa Khyber Pakhtunkhwa. These schools will undergo the construction of new, spacious, and well-ventilated latrines equipped with essential amenities, thereby benefiting a significant number of students.

Emphasizing on Menstrual Hygiene Management (MHM) and Health and Hygiene (H&H), a total of 40 toilets, specifically designed for girls and persons with disabilities, have been built-in public-sector girls' schools in Karachi, Sindh. Moreover, awareness sessions were conducted.

| NORWEGIAN CHURCH AID

The Sustainable Climate Resilient Water Sanitation and Hygiene (CR WASH) project, implemented by Norwegian Church Aid (NCA), is a five-year project that commenced in 2020 and will continue until 2024. The project aims to focus on climate-resilient water supply, sanitation, and hygiene, and is being implemented in Districts Swat and Peshawar in Khyber Pakhtunkhwa province, and District Sanghar in Sindh province of Pakistan. The project includes various interventions such as the construction of rain harvesting systems, solar-powered tube wells, DR hand pumps, irrigation ponds, DR gravity water schemes, and repairing WASH systems in schools and health facilities. The project also involves the formation of village committees and

clean-up campaigns, kitchen gardening, providing menstrual hygiene management (MHM) training for women, promoting climate-smart agriculture, capacity building on solid waste management and climate change adaptation, afforestation activities, and community management skill training. Overall, the project aims to promote sustainable climate resilience in the WASH sector through these various interventions.

| QATAR CHARITY

Qatar Charity implemented two programs: the Integrated Rural Development Program (IRDP) and the 1247 Project, aimed at improving water,

sanitation, and hygiene (WASH) facilities in targeted communities. The IRDP focused on health, WASH, education, and food security and livelihoods, while the 1247 Project specifically aimed to increase access to safe drinking water and sanitation facilities. Both programs led to positive outcomes in terms of health, as people were no longer at risk of contracting waterborne diseases, and hygiene practices were improved. The installation of boreholes, water ponds, and alternate energy sources meant that people would have access to safe drinking water even in water-scarce areas. Sanitation facilities were also improved with the installation of twin set latrines and hand washing stations. Hygiene education sessions conducted

in the community and schools promoted better hygiene practices, further reducing the spread of disease. These programs not only improved the health outcomes of the targeted communities but also enhanced their overall well-being by providing access to basic services such as WASH facilities.

Secours Islamique France (SIF) implemented the project “Building Sustainable Solutions to Disaster Response (BEST)” in selected Union Councils of Taluka Chachro, District Tharparkar. The project aimed to enhance community resilience and reduce the impact of climate change and natural disasters in Chachro, Tharparkar. SIF focused on community-led sustainable Water, Sanitation and Hygiene (WASH) initiatives, livelihood development, and capacity building on disaster risk reduction and climate change adaptation. Key project activities included the construction and rehabilitation of climate-resilient water sources, the establishment of gender-sensitive and disability-friendly sanitation facilities, awareness sessions on health and hygiene, the celebration of international WASH days, training for community-based organizations on WASH facility operation and maintenance, distribution of hygiene kits, the establishment of bio-saline farms, training on kitchen gardening for women, and planting drought-resilient saplings. These efforts aimed to build resilient communities and develop sustainable models for bio-saline kitchen gardening.

Additionally, under the ILM project, improvements were made to the latrines and washing areas of three schools providing safe sanitation facilities in District Tharparkar, Sindh.

Tearfund | TEARFUND

Our WASH Project empowers communities to establish sustainable and secure water and sanitation services. The project’s primary objective is to mobilize and inspire communities by conducting awareness sessions, providing training, and distributing necessary resources, all aimed at improving their overall quality of life. Emphasizing

a behavioural change approach, the project seeks to transform hygiene practices within communities and encourage the adoption of safe and sanitary behaviours, thereby reducing the prevalence of diseases like cholera, diarrhea, and skin ailments. The project’s key outcomes include enhancing the capacity of community members to protect the health of both children and adults, promoting awareness on WASH-related issues, facilitating the construction of latrines, and disseminating information on health and hygiene matters. Through these efforts, the WASH project contributes to the well-being and improved living conditions of the targeted communities.

© WaterAid

WaterAid | WATERAID

WaterAid Pakistan (WAP) has implemented several impactful projects across different regions of Pakistan, focusing on improving water, sanitation, and hygiene (WASH) services.

One notable project, “Envisioning and Catalysing PATS Plus for SDG 6 in Pakistan,” was carried out in Taluka Badin, Sindh. This initiative aimed to strengthen government systems and ensure access to sustainable and climate-resilient WASH services. As a result, significant progress was achieved in terms of improved service delivery, enhanced

planning and budgeting processes, water quality monitoring, and gender mainstreaming.

WAP, in collaboration with NUST, constructed a nature-based Decentralised Wastewater Treatment System (DWTS) in Saidpur Village, Islamabad. The completed project effectively managed and treated liquid waste, leading to improved sanitation practices in the area. To ensure its long-term sustainability, the system was handed over to the Capital Development Authority (CDA)

WAP also implemented the “HerWash” project in District Thatta, focusing on improving personal

hygiene and sanitation facilities for women and girls in rural areas. The project aimed to increase the utilization of gender-sensitive WASH facilities and menstrual hygiene product supplies in schools, healthcare centres, and communities. Additionally, efforts were made to improve government and civil society responsiveness to the menstrual hygiene needs of women and adolescent girls.

As part of a global system-strengthening initiative, funded by the German Ministry for Economic Cooperation and Development (BMZ), Welthungerhilfe and its partners work with stakeholders on micro-, meso-, and macro levels to bolster WASH systems and achieve the SDGs in Pakistan. The project includes the development of knowledge and advocacy materials, national-level workshops, sector dialogues, and the improvement of WASH infrastructure. Representatives of authorities and sector actors benefit from tailored training sessions and advisory services, emphasizing the implementation of the Clean Green Index for rural WASH. By fostering collaboration and coordination among 28 NGOs, public and private WASH actors, the project fortifies WASH systems and ensures sustained access to water, sanitation, and hygiene in District Muzaffargarh, Punjab. In 2022, the project benefited 3,385 individuals (1,706 males and 1,679 females).

Women Empowerment

Women empowerment leads to economic growth, poverty reduction, improved health, education, gender equality, and social and political participation. CARE International, NCA, OXFAM, Right to Play, and Tearfund implement initiatives in education, healthcare, economic opportunities, and decision-making processes to support women empowerment and bring positive societal changes. Their efforts create a more equitable and inclusive society where women thrive and contribute to development.

GEOGRAPHICAL OUTREACH: Punjab, Sindh, Balochistan, Khyber Pakhtunkhwa, AJ&K, Islamabad, Gilgit Baltistan

Development Interventions

Women Empowerment

The IGNITE Initiative, a collaboration between CARE International Pakistan and the Mastercard Impact Fund, focused on empowering women entrepreneurs globally and driving economic growth. Over the course of three years in four countries, IGNITE successfully engaged over 3.9 million entrepreneurs, enabling them to expand their businesses, access capital, and thrive in the digital economy. Through partnerships with six financial service providers and mobile network operators, IGNITE utilized technology and media to identify and support entrepreneurs, impacting a total of 945,531 individuals. Notably, at least 50% of IGNITE participants were women.

CARE International Pakistan and the MARS joined hands to address child labor in Punjab's rice value chain. It implements proven interventions, including daycare centers for 65 children, skills training for 88 young boys and girls (35 of whom started their own businesses), and promoting safe working conditions for female farm workers.

NORWEGIAN CHURCH AID

Norwegian Church Aid (NCA) played an incredibly significant role in empowering the marginalized

communities of Mirpurkhas, Rawalpindi, and Islamabad through its Women Empowerment project, which aimed to create equal opportunities for socioeconomic empowerment. The project targeted hard-to-reach areas and transformed the lives of young girls and women by focusing on their economic development and providing protection services for their safety and security. NCA also worked to engage men in the patriarchal setting of the country to play a productive role in social, economic, and cultural development. The Women Empowerment Project established women's helpdesks and two skill training centres to better equip beneficiaries and provided on-the-job training to better initiate their startups. In addition, faith leaders and community members set up five action plans to prevent and mitigate violence and abuse at the community level. The project also trained youth on the implementation of Social Action Plans to create social cohesion and harmony and engaged khateebis and faith leaders to promote harmony, social cohesion, and tolerance among diverse fractions of communities.

Oxfam's project is in implementation phase in 12 target districts including Lower Dir, Mardan,

Peshawar, Islamabad, Lahore, Multan, Bahawalpur, Quetta, Jaffar Abad, Mirpur Khas, and Karachi. It aims to enhance and support local women's rights organizations in Pakistan. Strengthening Participatory Organization acts as the lead partner for this initiative, which runs from April 1, 2019, to March 31, 2024. The project targets 13 Women Rights Organizations, focusing on improving their management and sustainability. Particularly, it aims to empower vulnerable and marginalized women and girls. The desired impact of the project is the promotion of human rights and gender equality in Pakistan, resulting in increased rights and opportunities for women and girls.

© Right to Play

The GOAL project by Right to Play aims to empower adolescent girls from low-income communities in Pakistan by equipping them with basic financial literacy education, and essential life and leadership skills, through creating greater access to sports and play-based opportunities.

The Girls Education Challenge and Leave No Girl Behind project has improved literacy and numeracy skills, promoted health and hygiene practices, and increased confidence among participating girls

in non-formal centres. Additionally, the project has also focused on promoting gender equality, reducing discrimination and violence against girls, and increased awareness about the importance of education.

“The Empowering Young Women and Girls through Self-Defence Workshops” by Right to Play and Fight Fortress Mixed Martial Arts Pakistan aimed to strengthen young women and girls in Pakistan by improving their confidence and self-esteem, knowledge and skills in self-defence, and increased safety and security in public spaces.

Tearfund | TEARFUND

Tearfund implemented the Rural Women Socio-Economic Development Project in Sindh and Punjab provinces of Pakistan. It aimed to uplift rural women’s socio-economic status. The project adopted an integrated approach, combining Water, Sanitation, and Hygiene (WASH) initiatives, livelihood development, and community empowerment. Key activities included raising awareness among women about their roles and responsibilities, conducting capacity building programs on education, sustainable livelihoods, and access to social services. The project established self-help groups, organized awareness campaigns on various topics such as voter education, ID registration, health, hygiene, and sanitation. It provided hygiene kits and school bags to children and supported fodder plant distribution. In Jamshoro, , the project focused on enhancing women’s socio-economic status through self-help groups. Women’s participation in self-help groups led to their increased confidence, empowerment, and financial stability.

AAR Japan was founded in 1979 by Yukika SOHMA, our first chairperson, with a mission to help refugees from Indochina, and as a civil organization without any political, religious, or ideological affiliations. It has since then grown into an international organization approved and registered by the United Nations. AAR Japan is an international NGO that reaches out to the most vulnerable populations around the globe, guided by the principles of neutrality and impartiality. In 1979, we began supporting refugees with the idea that “when in need, we are all there for each other.”

AAR Japan expanded activities to include more than 65 countries and regions. AAR Japan is currently active in 15 countries: Japan, Pakistan, Turkey, Cambodia, Afghanistan, Sudan, Laos, Tajikistan, Kenya, Myanmar, Ukraine, Uganda, Bangladesh, Moldova and Zambia.

Our major programs include, Refugee Assistance, Disability and Development, Disaster Relief, fighting infections/WASH, Advocacy/awareness raising, mine action and Emergency support.

AAR Japan envisions a world where all people, as unique and diverse human beings, can coexist with respect for human dignity and in harmony with the environment. AAR Japan provides those affected by hardships such as conflicts, natural disasters and impoverishments, the assistance they need, and make tomorrow better than today for everyone. In doing so through the support from across the world and Japan, we hope to demonstrate that each individual has an important role to play for world’s peace and stability. AAR Japan will work to realize a global society where the weak are not left behind, and where the minority would not face social rejection.

Acted, a renowned international non-governmental organization, was established in Afghanistan in 1993 during a period of severe crisis. Since its inception, Acted has been committed to a triple mandate encompassing emergency response, development interventions, and environmental programming. The organization’s presence expanded to Pakistan in 2005, where it has been diligently providing both immediate relief and sustainable development initiatives to marginalized communities across various provinces.

Acted Pakistan boasts an impressive portfolio of 190 projects that cover a wide array of critical themes, including emergency response, recovery, resilience building, poverty alleviation, and disaster risk management. Through these endeavors, Acted has positively impacted the lives of over 19.6 million individuals, showcasing its expertise in swiftly responding

to sudden-onset disasters, such as large-scale floods. The organization’s ability to operate effectively in Baluchistan, KP, and Sindh Provinces has garnered widespread acceptance and support from local communities and authorities.

Supported by esteemed donors such as the United Nations, USAID-BHA, ECHO, and Start Fund, Acted’s current activities in Pakistan are primarily focused on shelter, water, sanitation, and hygiene (WASH), food security and livelihoods (FSL), as well as Education in Emergencies (EiE). Its operations extend across 23 districts, ensuring broad coverage and impactful assistance.

Acted remains steadfast in its commitment to providing immediate humanitarian relief to those in urgent need while upholding and preserving the dignity of individuals.

Action Against Hunger has been implementing emergency responses and long-term development programs to address the root causes of hunger in Pakistan for over 15 years. Our interventions aim to reduce hunger, malnutrition, and poverty, as well as increase access to clean water, sanitation, and health services in disaster-prone regions. We have a strong focus on community participation and capacity building, working with local communities to develop sustainable solutions that address their needs. In 2022, Action Against Hunger continued its work in response to the floods in Pakistan. We provided emergency assistance to affected communities in Sindh and

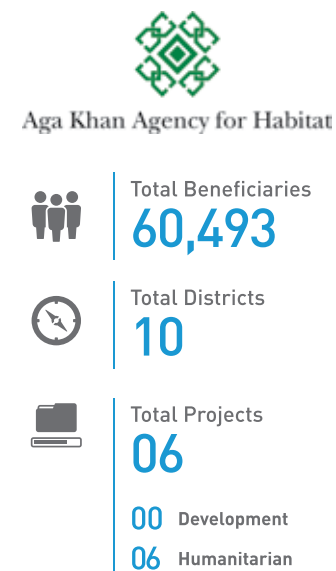

Balochistan provinces, distributing food, water, and other essentials to those in need. In addition to emergency relief, we are committed to long-term development programs that address the underlying causes of hunger and malnutrition, such as poverty, inadequate access to education, and limited economic opportunities. Our goal is to help communities become self-reliant and resilient in the face of future disasters. We are proud to work in partnership with local organizations and governments to achieve these goals and create lasting change in Pakistan.

The Aga Khan Agency for Habitat (AKAH) is an apex agency of the Aga Khan Development Network (AKDN) mandated to address the impacts of climate change, and create safe and sustainable habitats that provide opportunities for prosperity and wellbeing to the communities it serves both in rural and urban contexts. Established in 2016, AKAH brings together several AKDN agencies and programmes that had been working on habitat, disaster preparedness and humanitarian assistance since early 1990s. Currently, AKAH has footprints in five countries including Pakistan, Afghanistan, Tajikistan, Syria and India. AKAH is the lead agency of AKDN that responds to and manages disasters. The core strengths of AKAH constitute emergency preparedness and response, resilient habitat planning, climate-smart built environment improvement, relief and rehabilitation, nature-based solutions, natural resource conservation/management, water sanitation and hygiene (WASH), and green/energy-efficient building and construction.

In Pakistan, AKAH's programmes are implemented nationally including Sindh, Punjab, Balochistan, Khyber-Pakhtunkhwa, Azad Jammu and Kashmir, and Gilgit-Baltistan. With a particular focus on the isolated, low-income and climate change-induced disasters vulnerable communities and marginalized groups, including women, children, elderly and differently-abled persons. AKAH's initiatives are community-centric, grounded in the principles of equity, empowerment and sustainability.

Currently, AKAH Pakistan has its head office in Islamabad and regional offices in Karachi, Gilgit and Chitral. AKAH Pakistan employs over 250 people with national and international academic and professional experience in project management, financial management, engineering, architecture, supply chain management, water quality management, health and hygiene education, social and community mobilization, disaster risk reduction, emergency response, and monitoring and evaluation.

Alight (Formerly American Refugee Committee – ARC) is an international humanitarian organization, working in over 20 countries and delivering humanitarian aid and development services for over 40 years. Working in Pakistan since 2002, Alight Pakistan led many successful projects addressing the needs of Afghan refugees and asylum seekers as well as working with displaced people, and underserved communities. Alight has worked with diverse donors, including UN agencies, USAID, Islamic Development Bank, Education Above All Foundation and many others.

Between 2018-2021, Alight Pakistan has implemented the nation's largest project for out of school children, enrolling 1.1 million children across the country. Alight Pakistan has an extensive experience of work in all the humanitarian sectors; shelter, protection, nutrition, health-care, education, livelihood, skill development, psychosocial support, and building community resilience. We are part of all the clusters including recent flood response 2022, delivering healthcare, WASH services, shelter, women protection, food, education and water channels rehabilitation.

CARE International has been working in Pakistan since 2005, implemented over USD (US Dollar) 4000 million worth of programs, and reached 13 million beneficiaries through humanitarian and development projects focusing on Food security & Livelihoods, Nutrition, Health, Education, Protection, Shelter/NFIs, and WASH. CARE International focuses on addressing the challenges of equal access to economic assets and decision-making for women and men at the individual and household levels. Disaster response and gender-focused programming are also among the key areas of intervention.

In response to the catastrophic 2022 flooding, CARE International has mobilized over USD \$10 million to provide critical lifesaving support to 3,85,092 individuals in thematic areas of FSL, MPCA, Shelter, NFIs, Protection, Health & Nutrition in 8 districts of Sindh, Baluchistan, and Punjab till 31st March 2023. CARE International envisages scaling up its operations in the most affected districts of Sindh and Balochistan through lifesaving assistance and early recovery support as per CARE's flood response strategy.

CBM is an international development organisation, committed to improving the quality of life of people with disabilities in the poorest communities of the world irrespective of race, gender or religious belief. Based on its core values and over 100 years of professional expertise, CBM addresses poverty both as a cause and as a consequence of disability and works in partnership with local and national organisations to create an inclusive society for all. Disability-inclusive development (DID) is the framework of all CBM's initiatives and the key theme which drives our activities and the impact of our work. CBM believes that this is the most

effective way to bring positive change to the lives of people with disabilities living in poverty and their communities. Through DID approach, CBM addresses the barriers that hinder access and participation and actively seeks to ensure the full participation of people with disabilities as empowered self-advocates in all development and emergency response processes. In 2022 alone, CBM, together with 298 partners globally, supported a total of 391 projects in 44 countries and reached to more than 53.7 million people through inclusive eye health, community based disability development and inclusive humanitarian action initiatives.

Cesvi is an international aid organization that responds to humanitarian crises and disasters and has been working to alleviate poverty and support sustainable development for the last 35 years. Cesvi operates around the world under the pillars of social justice and respect of human rights to bring about positive change in the most vulnerable communities through WASH, Shelter, livelihood, DRR, Climate Change, and health support. Cesvi's work in Pakistan began with rehabilitation and WASH support to communities affected by the massive earthquake in 2005. Cesvi, since then, has successfully implemented 51 projects through the support of 16 donors

targeting over 2.5 million people across the country. Moreover, Cesvi implemented one of the first COVID-19 response projects in Pakistan, strengthening the public health response to the pandemic through the provision of medical/non-medical equipment, PPEs, capacity development trainings and WASH support. At present, in Sindh, CESVI is implementing an ongoing 2022 flood response supporting 54,100 households (3,78,700 Individuals) through the funding of ECHO, USAID, and FCDO. During 2022, Cesvi facilitated 3,27,800 beneficiaries in eight districts of Sindh and Balochistan through five projects.

Concern Worldwide is an international humanitarian organization that passionately works towards creating a world free from poverty, fear, and oppression. In Pakistan, the organization has been at the forefront of responding to major humanitarian crises, ranging from floods and earthquakes to the ongoing COVID-19 pandemic and droughts. In 2022, Concern's Country Strategic Plan (CSP) has been highly successful, exceeding its yearly targets and supporting the poorest and most vulnerable communities in Pakistan. In response to the recent flood emergency, CONCERN Worldwide worked tirelessly to provide integrated and multi-

sectoral assistance to over one million extremely vulnerable flood-affected populations in the severely affected districts of Sindh, Baluchistan, Punjab, and Khyber Pakhtunkhwa. The organization has made it a priority to ensure the meaningful participation of women, persons with disabilities (PWDs), and older age people (OP) in its programming. With a strong commitment to local partnerships and community engagement, Concern Worldwide continues to make a positive impact in Pakistan by helping those in need and advocating for a more equitable and just world.

Catholic Relief Services (CRS) is a humanitarian agency that provides international relief and development assistance to those in need, regardless of their religion, race, or ethnicity. With a presence in over 100 countries around the world and a track record of reaching more than 120 million people, CRS has established itself as a leading organization in the field of humanitarian assistance. In Pakistan, CRS has decades of experience in implementing emergency response programs and multi-year education and resilient livelihood initiatives. Following the 2022 flooding, CRS remains committed to supporting vulnerable communities in their recovery efforts

and identifying ways to mitigate the impacts of future climatic shocks. CRS works in partnership with local actors to ensure that programs are tailored to the specific needs of communities, and to strengthen local capacity. The organization's focus on building resilience and supporting sustainable development has had a positive impact on the lives of millions of people. CRS's dedication to humanitarian aid and development has made a significant difference in the lives of those it serves. Its continued commitment to providing assistance and building local capacity ensures that it remains a vital partner in creating a more just and equitable world.

Diakonie Katastrophenhilfe is a German Humanitarian Organization, providing humanitarian assistance worldwide for the last 65 years. It supports people who have fallen victim to Natural Disasters, War, and Displacement and are not able to cope on their own in the emergency they find themselves in. Our humanitarian action is carried out on the grounds of

needs alone, making no distinction based on ethnicity, gender, religious affiliation, or political opinion. DKH is operational and active in Pakistan since 2005 and has supported more than 1.5 million people through the delivery of life-saving humanitarian assistance as well as Early Recovery, Rehabilitation, and DRR programs through our partners.

The Global Alliance for Improved Nutrition (GAIN) is a foundation launched at the United Nations in 2002 to combat malnutrition. Its aim is to transform food systems so that they provide more nutritious food for all people, especially the most vulnerable. GAIN works with governments, businesses, and civil society to achieve this goal. To support its efforts, GAIN has offices in countries with high levels of malnutrition such as Bangladesh, Ethiopia, India, Indonesia, Kenya, Mozambique, Nigeria, Pakistan, and Tanzania. In addition, it has a head office in Switzerland and representative offices in Denmark,

the Netherlands, the United Kingdom, and the United States. At GAIN, the belief is that everyone in the world should have access to nutritious, safe, and affordable food. Unfortunately, one in three people - from almost every country on the planet - cannot consume enough nutritious food. This is a significant challenge, and GAIN is dedicated to developing and delivering solutions to address it. By working collaboratively, GAIN strives to make a meaningful difference in the lives of those who suffer from malnutrition.

Handicap International is a global organization that works in situations of poverty, conflict, and disaster. The organization was awarded the Nobel Peace Prize in 1997 and is committed to working alongside persons with disabilities and vulnerable populations. Its mission is to respond to their essential needs, improve their living conditions, and promote respect for their dignity and fundamental rights. Since its presence in Pakistan, Handicap International has touched the lives of millions of people through various programs such as Afghan refugees response, earthquake and flood emergency responses, IDPs response, and COVID-19 response. Additionally, the organization has

implemented several humanitarian and development projects across the country. Handicap International is known for being the world's most comprehensive mine action charity. In all its interventions, HI places specific emphasis on the needs and development of people with disabilities, women, and children. The organization works to improve the living conditions of the most vulnerable populations by providing them with essential services and support. Handicap International is dedicated to making a positive impact in the lives of people in Pakistan and around the world.

HelpAge International is an international NGO that helps older people claim their rights, challenge discrimination, and overcome poverty, so that they can lead dignified, secure, active, and healthy lives. HelpAge works for and with older people by lobbying governments to achieve policy change, undertaking research programs, and via community projects on the ground. The organization focuses on issues that affect older people worldwide, such as disaster risk reduction and climate change, rights, health, social protection, work, and COVID-19 vaccines. HelpAge works with local partners to provide emergency relief, health care, and other support to older people affected by natural disasters and other humanitarian crises. HelpAge International works to promote

the development of a United Nations convention on the rights of older persons. The organization engages in lobbying and advocacy efforts at the national and international level to raise awareness about the need for such a convention and to ensure that the rights and needs of older people are taken into account in the drafting process. Additionally, the organization works with its members and partners to promote the inclusion of older people in the development of the convention and to provide training and capacity building to older people and their organizations. HelpAge International also conducts research and produces publications and other resources to support the development of the convention.

Helping Hand for Relief and Development (HHRD) is a globally recognized humanitarian relief and development organization that responds to emergency and disaster situations worldwide. With a mission to fulfil its responsibility towards humanity, HHRD works on both emergency relief efforts in natural or man-made disasters and long-term development programs in over 51 countries around the world regardless of race, gender, ethnicity, location, religion, or social background. With a particular focus on countries where most of the population

lives below the poverty line, HHRD's programs are designed to address the root causes of poverty and empower local communities to create sustainable change. The organization has received several accolades for its work, including a 4-star rating by charitynavigator.org and accreditation by give.org in the USA. HHRD is committed to delivering aid and support to those in need and providing a path towards a brighter future for vulnerable communities around the world.

Hundreds of Original Projects for Employment (HOPE'87) is an Austrian non-profit initiative for the support of youth employment and youth training projects worldwide. In Pakistan, HOPE'87 works on youth employment through skills training, women empowerment, education, safer habitat, health, humanitarian aid and disaster risk reduction with the support of donors such as ECHO, ADC, Federal Ministry of Social Affairs, Health Care and Consumer Protection, Ministry of Interior Austria, UN agencies, Ant Hiroshima (Japan), YOU Foundation Germany and other private sector

donors. The programmatic approach of HOPE'87 is focused on strengthening the resilience of communities through education, livelihood development, gender equality, promotion of safer habitat, capacity building and disaster preparedness. The strengthening of livelihood structures, especially in rural areas, provides an opportunity for the communities to revive their local economies. HOPE'87 contributes to the promotion of community-driven livelihood initiatives for poverty reduction including women's socioeconomic empowerment and rights.

Human Appeal (HA) is a UK based not-for-profit, nongovernmental relief and development sector organization, working in 24 countries around the globe. In collaboration with the government departments, the civil society and the non-governmental organizations, Human Appeal has been working in Pakistan since 2005 and is registered with MOI under revised legislation for INGOs. We work across the globe to strengthen humanity's fight against poverty, social injustice, and natural disasters. Through the provision of immediate relief and the establishment of self-sustaining development programmes, we aim to invest in real, effective solutions. By establishing firm and loyal grassroots relationships with local, national, and international partners, we can access some of the most

hard-to-reach places in the world, at the most vulnerable of times. This means that we can help the people that many other organizations are unable to reach. Human Appeal believes that establishing stable healthcare, education and livelihood programmes pave the way for empowered, self-serving communities. We also recognize that the provision of food, medical aid and emergency shelter in times of humanitarian crisis is essential for the immediate preservation of life. As such, we value the importance of a multi-dimensional aid approach and dedicate our time between emergency relief and long-term development. In 2022, Human Appeal implemented 29 projects across Pakistan and reached out to 1,637,053 people.

International Medical Corps (IMC) is a global, humanitarian, non-profit organization dedicated to saving lives and relieving suffering through healthcare training and relief and development programs. Established in 1984 by volunteer doctors and nurses, International Medical Corps is a private, voluntary, non-political, and non-sectarian organization. Its mission is to improve the quality of life through health interventions and related activities that build local capacity in underserved communities worldwide. By offering training and healthcare to local population and medical assistance to people at highest risk, and with the flexibility to respond

rapidly to emergency situations, International Medical Corps rehabilitates devastated healthcare systems and helps bring them back to self-reliance. International Medical Corps has been at the forefront of response to all major emergencies in Pakistan including 2005 earthquake in Khyber Pakhtunkhwa; the conflict-affected IDPs in 2008-14, devastating floods in 2011 & 2012, earthquake in 2014, COVID-19 response in 2020-21 and response to the recent floods in 2022. IMC has carried out seven projects in 13 districts of Punjab, Sindh, and Balochistan, facilitating 6,41,320 beneficiaries during 2022.

The International Rescue Committee (IRC) is an international non-profit organization working in Pakistan since 1980, providing humanitarian assistance to disaster-affected populations. The International Rescue Committee has been functional in 42 countries across the globe since 1933. Major areas of the International Rescue Committee's work include Health, Education, WASH, Protection, Disaster Risk Reduction, Livelihood, and other essential services to the Afghan refugees and host communities. Over the years, IRC has expanded its portfolio to encompass a range of programming that is designed to help marginalized, vulnerable, and impoverished communities affected by climate crises, conflict, and health epidemics in Pakistan. The IRC's programs in Pakistan focus

on safety, economic well-being, health, education, disaster risk reduction, and livelihoods. This comprehensive approach ensures that those most in need receive the support they require to rebuild their lives and emerge from crisis situations stronger and more resilient than ever before. Working in close partnership with national, provincial, and local government and non-governmental organizations, IRC strives to make a difference in the lives of people across the country. The International Rescue Committee is a registered organization with 3 years MOU with the Ministry of Interior, ATW for the Afghan Refugee Project, NOC on Flood Response across Pakistan, and Project NOCs from PDMA's and District Authorities.

As part of one of the world's largest faith inspired charity, Islamic Relief (IR) in Pakistan has transformed the lives of millions spanning over a period of 31 years. Since 1994 we have transformed the lives of 24 million people living in remotest parts of the country including Punjab, Balochistan, Khyber Pakhtunkhwa, Azad Jammu & Kashmir, Sindh and Gilgit Baltistan. Whether it has been the earthquake of 2005 in AJ&K or the floods of 2010 in Punjab and Sindh, our teams have worked on the front lines providing lifesaving assistance to the affected. IR Pakistan aims to address the deep rooted issues in the country associated with poverty, education, health, water and sanitation and sustainable livelihoods through long term and effective partnerships with the government, private

sector, INGOs, academia and media. We are committed to address the climatic challenges being faced by Pakistan through effective and long term partnerships with other stakeholders. During recent flood in 2022, Islamic Relief has been on the ground providing support to the people for over 12 months. IR has been working on 58 projects in 31 districts, targeting 14,034,190 beneficiaries (unique beneficiaries) across the country. Being the first humanitarian organization that responded to the disaster since 3rd of August in the affected areas distributing tents, food packs, drinking water, Dignity Kits, Household Kits, Kitchen sets, tarpaulin sheets, and hygiene kits and multipurpose CASH grants.

JEN is a non-profit organization dedicated to empowering individuals and communities affected by disasters. We believe in utilizing local resources and building upon strengths to revitalize communities. Our goal is to inspire global recognition and support for peace and respect for human life. At JEN, we value every human life and aim to create a world where individuals and communities respect and support each

other. Our programs focus on economic wellbeing, disaster risk reduction, psychological recovery, health, and education. We collaborate with local governments and NGOs to meet community needs. Through sustainable solutions, we help individuals and communities overcome disaster challenges and build a brighter future together.

Jhpiego is an international, non-profit health organization and a Johns Hopkins affiliate that has been at the forefront of improving the health of women and families worldwide for over 50 years. With a strong commitment to innovation, Jhpiego creates and delivers healthcare solutions that are transformative, addressing the evolving health needs of women and their families. The organization works in partnership with national governments, health experts, and local communities to build health providers' skills and develop systems that save lives. Since its inception, Jhpiego has driven evidence-based, quality-focused public health intervention to save lives in some of the most challenging settings in the world. In doing

so, we always pursue practical, low-cost innovative and locally accepted solutions and options. Currently with a presence in over 40 countries, Jhpiego has strengthened health systems in various challenging contexts including fragile settings including some of the remote and disaster-stricken locations of Pakistan. We have remained agile and responsive to address emerging health challenges including outbreaks and pandemics. Creating systems to strengthen the delivery of health care services is at the core of Jhpiego's work. When strengthening health systems, we make certain to account for and include gender and equity, digital health and innovation.

(KnK) Japan is a humanitarian non-profit organization working for the welfare and rights of children around the world. It was established in Tokyo Japan in 1997 with the aim of providing support to street children, disadvantaged adolescents, young victims of trafficking, and those affected by natural calamities and conflicts. KnK Japan is actively engaged in seven countries worldwide, enhancing the well-being of children and youth through humanitarian aid, recovery efforts, education, shelter, WASH initiatives, disaster resilient infrastructure, human rights promotion, and advocating for policy changes. KnK Japan has been actively involved in Pakistan since the 2005 earthquake, offering humanitarian aid, recovery, rehabilitation, and constructing disaster-resilient public

educational infrastructure in KP province and AJ&K. They also focus on humanitarian sectors WASH, SHELTER, NUTRITION, EDUCATION, and have built numerous disaster-resilient schools in remote areas with no access to education. KnK launched a comprehensive COVID-19 response in 2020, providing support to health facilities, educational institutions, and individuals facing hunger due to lockdowns. They are also contributing to implementing sustainable development goals. Currently, their ongoing interventions for the Flood 2022 response prioritize shelter, WASH, and nutrition in the Early Recovery phase. They are also expanding their efforts in Sindh and Balochistan by providing education services.

Present in the country since 1996, Médecins du Monde (MdM) first started working in Punjab and has developed a strong acceptance in local communities. Since, 2015, MdM has focused primarily on reproductive health and has been a fervent advocate of the integration of family planning into the primary healthcare minimum package. To tackle both

demographic and health issues in the most populated region of Pakistan, MdM has been active in contributing to strengthen the acceptance, availability, and quality of family planning services as well as working with government health structures in developing and strengthening quality healthcare.

Mercy Corps' mission is to alleviate suffering, poverty, and oppression by helping people build secure, productive, and just communities. For over 40 years, Mercy Corps has been tackling the world's toughest challenges, providing over \$4 billion in assistance to more than 220 million people. Mercy Corps is able to tap into a significant body of knowledge and expertise across our 5,400+ member team — 84% of whom are from the countries where we work — to address the most significant and shared global challenges of our time. Mercy Corps' country-based team members are supported

by our global support team based in US and European Headquarters, and approximately 70 technical experts in Agriculture; Food Security; Nutrition; Financial Inclusion; Market, Economic Recovery and Growth; Youth, Gender and Protection; Environment, Energy and Climate; Governance and Partnerships; and Technology for Development who support the design and implementation of programs around the world. Mercy Corps has been operational in Pakistan since 1986 and is present in 120 districts across the country (including the four provinces, AJ&K and ICT).

Muslim Aid is an international charity organization registered in the UK (Registered Charity Number 1176462). The global organization currently has a presence in multiple countries including Bangladesh, Bosnia and Herzegovina, Palestine, Pakistan, Somalia, Sri Lanka, Sudan and Myanmar and eight partner organizations. Working since 1985, Muslim Aid has been serving humanity around the globe as one of the most extensive Muslim development and humanitarian organizations in the UK. In Pakistan, we continued to provide services to the most deprived and affected communities, the work we started in 2005. Our strategic thematic working areas are:

1. Improving integrated water resource management.
2. Access to education.
3. Sustainable livelihoods.
4. Health.
5. Emergency response.
6. Resilience building.

Our country programme comprising of dedicated experts is always striving to alleviate the sufferings of the most marginalized and vulnerable segments of society affected either because of natural calamities or man-induced disasters.

Norwegian Church Aid (NCA) is a non-profit international organization that started its operations in Pakistan in 1982, initially providing support to Afghan refugees. Over the years, NCA has responded to major humanitarian disasters in Pakistan, including the 2005 earthquake, 2010 and 2022 floods, and other emergencies. Since 2007, NCA has focused on long-term development programs and advocacy initiatives to address the root causes of inequalities and poverty. NCA's current priority thematic areas in Pakistan are Cultural

Cohesion, Understanding & Diversity, Gender Equality, Protection & Respect, and Climate Resilient Water, Sanitation and Hygiene (CR WASH). As part of their Country Strategy for 2020-2024, NCA primarily delivers programs through local partners, including civil society organizations and academic institutions. They also collaborate closely with relevant governmental ministries and departments at national and provincial levels to build effective synergies.

Oxfam is a global NGO working to reduce poverty and tackling social injustices. In Pakistan, Oxfam has been operating since 1973 to support communities and address issues like poverty, inequality, and social injustice. Their programs aim to enhance access to essential services, advocate for women's rights,

offer emergency aid during disasters, and foster sustainable livelihoods. Oxfam's projects in Pakistan may change to meet evolving community needs and challenges. Presently, they have two main program pillars: Humanitarian Response and Women's Voice and Leadership-Pakistan.

Qatar Charity (QC) as Non-Profit Organization in Qatar, started working in Pakistan in 1992. In Pakistan, QC is registered with the MOI, under the revised Policy for Regulation of INGOs. QC with vision, where all citizens enjoy fundamental rights and spend life with dignity, focused on six thematic areas, in partnership with vulnerable communities, and different stakeholders to secure a decent and dignified life for the poor, excluded and vulnerable communities.

In Pakistan, alongside its country office in Islamabad, has 23

district offices across country. QC reflects its greater scope of work to respond to extremely vulnerable communities keeping the Government's priorities intact for interventions. These field offices enable QC to strategically address the needs at the grass root level to attain ownership and sustainability.

The richness of experiences and ability to make human and financial resources contributions is a liberty which sets QC apart from other organizations in Pakistan.

Relief International (RI) operates in 16 countries globally, including several vulnerable ones such as Afghanistan, Bangladesh, Iran, Iraq, Jordan, Lebanon, Myanmar, Pakistan, Philippines, Somalia, Ghana, South Sudan, Sudan, Syria, Turkey, and Yemen. Since 2005, RI has been actively involved in Pakistan, primarily focusing on humanitarian responses and rehabilitation, strengthening education system, income generation and Afghan refugees focused programs across Pakistan. Pakistan currently hosts one of the largest long-term refugee populations worldwide, with over 2.5 million Afghan refugees. Many of these refugees have resided in Pakistan for more than 37 years, leading to the emergence of second and

third generations-living in displacement. RI works across Pakistan, collaborating with host communities and refugees, with key focus areas including Education, Livelihood, Protection, Water, Sanitation, Health & Hygiene, Shelter & Non-Food Items (NFIs), and Disaster Risk Reduction (DRR). RI has ongoing projects in the Khyber Pakhtunkhwa province in District Peshawar, Nowshera, Swabi, Charsadda, and Dera Ismail Khan. Furthermore, RI engages directly with communities and implements its interventions in consultation with various stakeholders such as the Education Department, the Commissionerate of Afghan Refugees, the respective Provincial Disaster Management Authority (PDMA), and other relevant entities.

Right To Play is a global organization that protects, educates, and empowers children to rise above adversity using the power of play. In Pakistan, Right To Play has been working since 2008, with footprints in over 24 districts in Sindh, Khyber Pakhtunkhwa and Islamabad. The organization has impacted the lives of over half a million Pakistani children and youth by providing access to quality education, empowering girls and fostering youth leadership. Our 2 key thematic areas of programming are Quality Education and Girls' Empowerment, with child-protection, gender equity and inclusion at the foundation of our work. Through play-based learning, Right To Play aims to develop children's physical, social, emotional,

and cognitive skills, thereby equipping them with the tools they need to overcome challenges and achieve their full potential. Since then, our programs have expanded to focus on increasing access to quality education for children by improving quality of Physical Education curriculum & pupil-teacher experiences as well as creating safe learning environments through mentoring, sports and play-based learning. Right To Play remains a leader in Physical Education and sport and play-based life and leadership skill development programs within the country, having worked closely with Provincial Education Departments and the Federal Directorate of Education.

Save the Children International (SCI) is a reputable development organization operating in approximately 120 countries to promote children's welfare globally. Save the Children began its work in Pakistan in 1979, responding to the needs of Afghan refugees. Since then, it has implemented sustainable and high-impact development and humanitarian projects throughout the country to benefit deserving Pakistanis. With over USD 900 million invested since its inception, Save the Children has impacted 14 million individuals, including children and adults in Pakistan. Its programs include Health & Nutrition, Education, Child Protection, Livelihoods, Humanitarian Response, and Climate Change Initiatives. Save

the Children's programming in Pakistan has been critical in promoting and protecting the rights of children and improving their lives. The organization has established itself as a leading advocate for children's rights, working towards the realization of their full potential. Through its child-focused programs, Save the Children has contributed significantly to increasing school enrollment, reducing child mortality, and providing opportunities for sustainable livelihoods. The organization works in close collaboration with local communities and government authorities to ensure that its interventions are effective, sustainable, and contextually appropriate.

Established in 1991, Secours Islamique France (SIF) is a non-governmental organization devoted to international solidarity and social and human causes in the fields of humanitarian assistance and development aid both in France and across the world. SIF has a valid MOU with the Ministry of Interior, Government of Pakistan, until 2023. SIF is a vibrant member of the Pakistan Humanitarian Forum (PHF) and its interventions in Pakistan so far. It is striving together to build a fairer world with CARE. SIF is dedicated to reducing poverty and vulnerability, without any proselytism or discrimination. It intervenes where humanitarian and social needs require the mobilization of emergency response as well as the implementation of development programmes and advocacy actions.

SIF has been operational in Pakistan since 2011 and implemented a number of humanitarian projects since its

inception in Pakistan. SIF is contributing to Water, Sanitation & Hygiene (WASH), Food Security and Livelihoods (FSL), Child Welfare and Education and Shelter & Humanitarian Response.

SIF believes in a more caring and fairer world, where the basic needs of vulnerable individuals are met. SIF draws the legitimacy of its action from a vision of humanity (women and men) as a whole and, in particular, its vulnerable condition. Human beings must serve each other. It is through giving and sharing that they are whole. Vision SIF is dedicated to reducing poverty and vulnerability in France and worldwide, without any proselytism or discrimination. It intervenes where humanitarian and social needs require the mobilization of emergency response as well as the implementation of development programs and advocacy actions.

SOLIDAR is a Swiss development organization with projects in Africa, Asia, Latin America and South-eastern Europe. Together with our local partners we fight for decent work, social justice, participation in democratic processes and against extreme inequality. Please find more information about our vision, mission, work, partnerships and decent work agenda on Solidar Suisse website. <https://solidar.ch/en/about-us/>

The humanitarian – development NEXUS is an important element of SOLIDAR's strategy, which mandates sustainable resilience of the most vulnerable people.

In Pakistan, SOLIDAR started implementing humanitarian and development assistance projects in 2010 and since then have benefitted over half a million people. Presently, SOLIDAR's work in Pakistan includes i) humanitarian assistance, ii) well-being of vulnerable children and iii) livelihood and decent work in the informal economy. SOLIDAR's projects are being implemented in Khyber Pakhtunkhwa, Sindh and slum areas of Islamabad and Rawalpindi (Punjab).

Tearfund is an international UK-based relief and development organization, established in 1968 and currently working in over 50 countries. As an institution, Tearfund wants to see individuals and communities transformed by hope, dignity and opportunity. We firmly believe that an end to extreme poverty is possible. Therefore, we work with local communities and organizations, equipping local people to own & lead development and to sustain change. We respond to both rapid-onset disasters and protracted crises and we strongly support collaborative humanitarian response and localization of aid. We help affected and vulnerable communities become resilient to shocks & stresses through capacity strengthening, knowledge sharing and inclusive & participatory community transformation interventions.

We recognize the adverse impact of climate change and environmental degradation on community well-being and therefore, promote solutions that contribute to environmental restoration, improved management and use of natural resources, creation of sustainable 'green' livelihoods and enhanced coordination between key stakeholders. Our vision is to see people freed from poverty, living transformed lives and reaching their full potential. Our mission is to go where the need is greatest, responding to crises and partnering with local actors to bring restoration to those living in poverty. Our thematic areas are: Community Transformation, Environment, Livelihoods and agriculture, WASH, Social Cohesion, Disaster preparedness, response and resilience.

Terre des hommes (Tdh) is an international, Switzerland based children's aid organization. Terre des hommes is an independent, neutral and impartial organization founded in 1960. It is dedicated to bringing about significant and lasting change in the lives of children and young people, especially those most at risk. Each year, we directly and indirectly support more than four million children and their relatives in health, protection, and emergency projects in more than 30 countries. Tdh has been active in Pakistan since 2002 and has carried out emergency projects following the 2005 earthquake and floods in 2010, Tdh continues to work on behalf of children, fostering their rights and protection, supporting them in emergency

and recovery situations. Tdh is registered with the Ministry of Interior of the Government of Pakistan and is a member of the Pakistan Humanitarian Forum with its office in Islamabad, Pakistan. Tdh's child-centered approach ensures that children are at the heart of everything we do, and we work closely with communities, local authorities, and other partners to ensure that our programs are sustainable and effective. Tdh's work in Pakistan has helped thousands of vulnerable children access health and education services, and receive the support they need to recover from emergencies and build a better future for themselves and their families.

WaterAid is an international not-for-profit, determined to make clean water, decent toilets, and good hygiene normal for everyone, everywhere within a generation. We have been working with government and non-governmental partners in Pakistan since 1992 to ensure that these essential services are available to poor and marginalized communities, especially women, persons with disabilities etc. WaterAid employs a public health and climate adaptation approach to addressing current water, sanitation and hygiene (WASH) service requirements and sustaining them for the future. Hygiene behavior change,

menstrual hygiene, rural and urban sanitation and safe water systems, WASH in institutions (healthcare facilities, schools, public places) and nature-based solutions for water conservation, groundwater recharge and waste-water treatment are some of the interventions used for achieving our objectives. We also work with sector partners to support and influence the behavioral, institutional and policy mechanisms for accelerating progress toward achieving safe and sustainable WASH access for the poor and marginalized communities.

Deutsche Welthungerhilfe e.V. (WHH) is a Germany-based, non-profit, non-aligned international NGO working for a world without hunger and poverty. In Pakistan, Welthungerhilfe's goal is to "Build resilience and assist food and nutrition insecure communities in rural, semi-urban and urban areas of Pakistan, in cooperation with the local civil society, government and the private sector". WHH's program in Pakistan is led by 3 main pillars: 1) Humanitarian Aid, 2) Food and Nutrition Security, and 3) Capacity Development, Stakeholder Engagement and Empowerment, in the provinces of Baluchistan, Khyber Pakhtunkhwa, Punjab, and Sindh. Together with 15 local partners, WHH provides humanitarian assistance and development cooperation. WHH promotes localized and anticipatory actions, in cooperation with the civil society and government authorities,

with the aim of strengthening capacities of the humanitarian eco-system, assisting disaster-prone communities to be resilient and enabled to anticipate and respond to crises. Welthungerhilfe's interventions on Food and Nutrition Security center around Pregnant and Lactating Women and children under five years, and apply a multi-sectoral approach including Nutrition, WASH, Agriculture, Climate Change Adaptation, Natural Resource Management, Disaster Risk Reduction, as well as Income generation, skill development and promotion of relevant policies and agendas. Welthungerhilfe follows a food systems approach to achieve nutrition outcomes. Considering Pakistan's geographical location and its significant exposure to climate change risks, Disaster Risk Reduction and Climate Change Adaption are key programme features.

Strategic Initiatives with Government

“

I am a ray of hope,
I am a symbol of resilience,
I am the beacon of a
prosperous **Pakistan**”

We deeply appreciate the exceptional support of our member organizations (INGOs) in compiling this annual report for the year 2022. Their proactive engagement and commitment to data accuracy have elevated its quality and significance. We sincerely thank the communication, MEAL, and program teams for their diligent efforts, contributing to the completeness and reliability of this report. We are truly grateful for their continued partnership and contribution to reflect the impactful work of the INGOs in the development and humanitarian sector of Pakistan.
